INTRODUCTION

This is the third edition of the **Directory of Early StagesClinical Research Units in Spain**. This current version has been developed with the collaboration of **37 Early Stages Units** and a network of centres within the BEST Project initiative. With respect to the second edition fourteen new Phase Units have been added, some of very recent creation.

The BEST Project is supported by the pharmaceutical industry, and involves many public and private stakeholders for the development of a Platform of Excellence in **Clinical Research** of Medicines in Spain. The BEST Project is included within the Clinical Research Area of the Spanish Technological Platform for Innovative Medicines. (www.medicamentos-innovadores.org)

The main objective of this Directory is to promote the selection of the Spanish Units in performing early stages clinical trials, and consequently to make an attractive and useful tool available for the pharmaceutical companies during this drug development project.

This Directory has been published in September 2015 and will have a complete diffusion among all kinds of organizations interested in Clinical Research.

A questionnaire was distributed to 37 Early Stages Units in Spain and the network during Febreaury and July 2015 to collect data for this Directory.

The Directory is divided in two main sections, the first one offering a general view of the Units, and the second presenting each Unit with complete descriptions and individual facilities.

SUMMARY

The table below depicts the Early Stages Units included in this Directory (Regions are in alphabetical order; see map on page 4):

Early Stages Unit	Short name	Region
Unidad de Ensayos Clínicos Fase I y II (Hospital General. Hospitales U. Virgen Macarena - Virgen del Rocío)	MACA-ROCÍO	Andalucía
Unidad de Fase I Hospitales Universitarios Regional y Virgen de la Victoria	V. VICTORIA	Andalucía
Unidad de Investigación Clínica - Hospital Universitario Reina Sofía	R. SOFÍA	Andalucía
Unidad de Ensayos Clínicos - Hospital Universitario Virgen de las Nieves	V. NIEVES	Andalucía
Unidad de Ensayos Clínicos Valdecilla	VALDECILLA	Cantabria
CIM-Sant Pau (Centre d´Investigació del Medicament)	CIM-S. PAU	Cataluña
Programa de Desarrollo de Ensayos Clínicos. Instituto Catalán de Oncología	ICO	Cataluña
Unidad de Ensayos Clínicos (Hospital Universitario de Bellvitge)	BELLVITGE	Cataluña
UPIC Unidad de Fase I - Hospital Universitari Germans Trias i Pujol	G. TRIAS	Cataluña
Unidad de Ensayos Clínicos Sant Joan de Déu	S. JOAN DEU	Cataluña
Unidad de Investigación Clínica del Institut Hospital del Mar d'Investigacions Mèdiques (IMIM)	IMIM	Cataluña
Unidad de Investigación de Nuevas Terapias. Inther Unit. Hospital ClInic de Barcelona	CLINIC	Cataluña
Unidad de Ensayos Clínicos Fase I de Oncología Médica del Hospital Vall D'Hebron	V. HEBRON	Cataluña
Unidad de Ensayos Clínicos de Alicante (UECA)	UEC ALICANTE	C. Valenciana
Unidad de Ensayos Clínicos Fase I de Hematología y Oncología Médica de INCLIVA	INCLIVA	C. Valenciana
Unidad de Investigación Clínica del Consorcio Hospital General Universitario de Valencia	HGU VALENCIA	C. Valenciana
UICAB- Instituto de Investigación Sanitaria La Fe	UICAB-LA FE	C. Valenciana
Unidad de Fase I Instituto Valenciano de Oncología IVO	IVO	C. Valenciana
CICAB- Centro de Investigación Clínica del Área de Salud de Badajoz	CICAB	Extremadura

Early Stages Unit	Short name	Region
Unidad de Ensayos Clínicos - Hospital Clínico Universitario de Santiago	HCU SANTIAGO	Galicia
Unidad de Fase I Servicio de Oncología Médica. Complejo Hospitalario Universitario A Coruña	HU CORUÑA	Galicia
Centro de Investigación Clínica del Anciano CICA. Hospital Universitario de Getafe	CICA GETAFE	Madrid
Unidad de Ensayos Clínicos Facultad de Medicina Universidad Autónoma de Madrid	UAM	Madrid
Unidad de Ensayos Clínicos del Hospital Central de la Defensa Gómez Ulla	G. ULLA	Madrid
Unidad de Ensayos Clínicos del Hospital Universitario de La Princesa UECHUP	LA PRINCESA	Madrid
Unidad de Estudios de Farmacología Clínica del Hospital Clínico San Carlos	CLÍNICO	Madrid
Unidad de Investigación Farmacológica. Hospital Universitario Puerta de Hierro Majadahonda	P. HIERRO	Madrid
Unidad de Estudios de Medicamentos en Fase Temprana ONCO-FI. HUPH Majadahonda	ONCO-P.HIERRO	Madrid
Unidad de Estudios Clínicos en Fase Temprana en Oncología - UFTO. Hospital Universitario 12 de Octubre	HU 12 OCTUBRE	Madrid
Unidad de Ensayos Clínicos. Hospital Ramón y Cajal	R. Y CAJAL	Madrid
Unidad Central de Investigación Clínica y Ensayos Clínicos. Hospital Universitario La Paz	LA PAZ	Madrid
Unidad de Ensayos START Madrid - CIOCC. Hospital HM Universitario Sanchinarro	HM-START	Madrid
Unidad de Fase I Oncología FJD-START. Hospital Universitario Fundación Jiménez Díaz	FJD-START	Madrid
Unidad de Investigación Clínica y Traslacional de Oncología Médica. HGU Gregorio Marañón	G. MARAÑÓN	Madrid
Unidad de Investigación Clínica - Clínica Universidad de Navarra CUN	CU NAVARRA	Navarra
Unidad de Ensayos Clínicos IIS Bioaraba. Hospital Universitario de Araba	HU ARABA	País Vasco
Unidad de Terapias Avanzadas - Onkologikoa Donostia	ONKOLOGIKA	País Vasco
net GEICAM Grupo de Investigación	netGEICAM	Nacional

Location of Early Stages Units

Summary

Main conclusions derived from the present directory are:

- Out of the 37 units included, 5 are **privately** owned, 30 belong to the national **public** healthcare system, most of them within a hospital structure, one **public** and **privately** owned and remaining one do not declare its condition.
- All units are devoted to **patients** and almost all units also to **healthy-volunteers studies**, only 13 units are exclusively devoted to **patients**. Only 4 units do not realize **oncology clinical trials**. Thirteen units perform studies on paediatric patients.
- The first Unit was found **in 1982** (the IMIM unit in Barcelona), and further units have been established through till **2015** (the Unit of Hospital Clínico Universitario de Santiago). In general, the first units established where located in Catalonia, followed by Madrid.
- The total **usable space** of units amounts to **15,144 square meters** (m^2), with an **average of 445 m^2 each**, although the size can range **from 25 m^2 to 2,778 m^2**.
- The total **number of beds** available in all the 37 Spanish Early Stages is **268**, with an **average of 7 beds per unit**. Units devoted to healthy-volunteers studies showed the higher average of beds per unit.
- The mean usable space (in m^2)/number of beds ratio was approximately of **56 m^2 per bed**, giving a preliminary idea about the availability in the Spanish units of enough space to carry out other study activities.
- There is a total of **684 Staff or personnel** working in the 37 Spanish units; 333 of which are permanent employees, 119 have specific-term contracts, and 232 are collaborators. **Each unit** would have an average **of 9 permanent employees**, **4 contracted employees**, **and 8 collaborators**.
- The **number of clinical trials** performed by the 37 units during the last 6 years (2009-2014) summed **2,818 studies**, 351 of them were linked to a PEI submission ("Producto En Investigación", equivalent to the IND). Each unit performed an **average of 76 clinical trials** (close to **13 per year**), corresponding 10 trials to PEI submissions (close to 2 per year).
- Regarding the **sponsorship** of clinical trials performed in the Spanish units, **local Spanish sponsors contracted 22% of the studies** and multinationals or sponsors from abroad contracted the remaining 78%.

Summary

The figures and tables shown below summarize the main features of the units included in this directory. This information comes under the following **8 main topics**:

1. Ownership and affiliation
2. Accreditations and audits
3. Facilities
4. Staffing and resources
5. Services capabilities
6. Study participants
7. Pharmacodynamic and pharmacokinetic capabilities
8. Experience

Accreditations and audits

Items collected in the table below are:

- **Accreditations**: number of accreditations obtained by the unit coming from the regions' administration (*comunidad autónoma*) o any other local, national or international organization during the last 3 years.
- **Audits by authorities**: number of audits carried out on the unit by national or international regulatory agencies during the last 3 years.
- **Audits by sponsors**: number of audits carried out on the unit by sponsors (private or public) during the last 3 years.
- **Internal audits per year**: number of internal audits carried out per year, including the general audits and those related to particular clinical trials.
- **SOPs**: availability of its own Standard Operating Procedures (SOPs).

Facilities

The table below summarizes information about:

- **Usable space:** the usable space of the unit in square meters.
- **Number of beds:** the number of beds available in the unit for clinical trial participants.
- **Simultaneous clinical trials:** the number of clinical trials that the unit can perform simultaneously.
- **Armchairs:** the number of armchairs suitable for volunteers/patients monitoring in the unit.
- **Resuscitation or emergency trolley:** availability in the unit of a crash or emergency trolley with equipment and medications needed for advanced life support and CPR (cardiopulmonary resuscitation).

Facilities

Unit Staffing and Resources

The table below shows:

- **Permanent staff:** unit employees who work at the unit as their main activity and have a permanent-contract
- **Fixed-term or contracted staff:** unit employees who work at the unit as their main activity but have a fixed-term contract, such as internship or grant holders
- **Part-time collaborators:** unit employees who work at the unit as a secondary or temporary work activity. They are contracted temporarily for fixed activities in the unit, such as nurses from the affiliated hospital on specific clinical trials.

Services Capabilities

Tables below collect the following topics:

- **Central lab. (bioch.-hemat.):** availability of Central laboratory for safety analysis (biochemical and haematological parameters).
- **Bioanalytical Unit:** the unit has its own Bioanalytical Department.
- **Genotyping and Fenotyping:** availability of genotyping or fenotyping methods for study participants.
- **Data management:** Data Management Department availability.
- **Biometry or Statistical Dept.:** biometry or statistical department available.
- **Drug Accountability:** the Unit regularly uses drug accountability procedures, such as reception, preparation and dispensing forms.
- **Pharmacokinetics:** pharmacokinetic analysis available in the Unit.
- **Medical Writing:** accessibility to Medical Writing Department.
- **Quality Assurance:** the Unit can perform quality assurance activities.
- **Project Management:** available project management department in the Unit.
- **Drug storage and preparation area: a**vailability in the Unit of a specific area for drug storing and for the preparation of medications to carry out studies.
- **Archives:** the Unit has its own archives for study documentations.

The Study Participants

Table below collects the following topics:

- **Healthy volunteers, patients**: these are the kind of participants the Unit includes in clinical trials.
- **Clinical Trials in Oncology:** the Unit has experience in different oncology diseases and age groups.
- **Surgery rooms for screening:** the number of available surgery rooms for subject screening.
- **Register of volunteers:** the Unit keeps paper or electronic database of volunteers.

Pharmacodynamic / Pharmacokinetic Capabilities

The Table below depicts the Unit capabilities in terms of pharmacodynamic and pharmacokinetic assessments:

- **Digital blood pressure devices:** number of digital blood pressure measuring devices available.
- **Pulsioximetry devices:** number of pulsioximetry devices available.
- **12-leads ECG devices:** number of 12-leads ECG devices available.
- **QTc evaluation:** familiarity with evaluation of the QTc interval prolongation according to current rules.
- **CNS function testing:** availability for tests on assessing CNS drug effects in the Unit.
- **Poblational PK/PD modelling:** familiarity in poblational analysis and PK/PD modelling, including writing of clinical reports.
- **Electronic Data Capture capabilities:** familiarity with Electronic Data Capture –EDC applied to clinical trials

Unidad de Ensayos Clínicos Fase I y II (Hospitales U. Virgen Macarena - Virgen del Rocío)

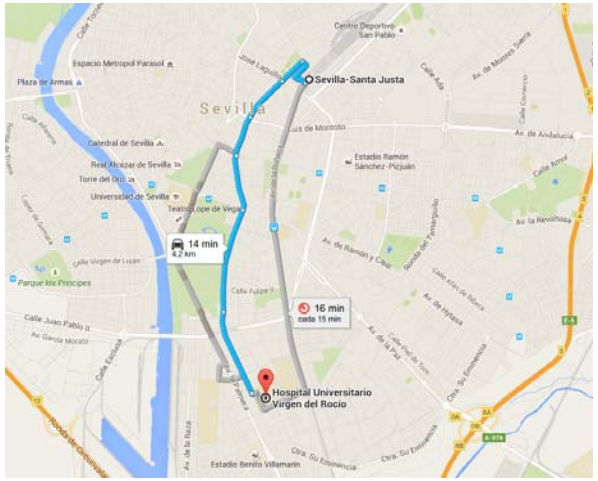
General Information

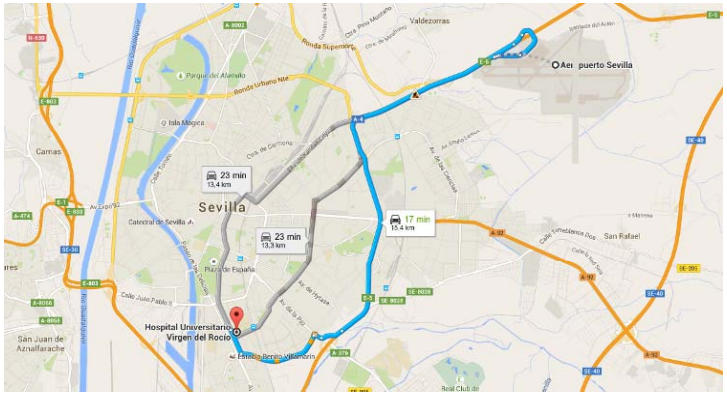
Who filled in this survey	Antonio Cervera Barajas
E-mail contact (Phone number)	uec.hvr.sspa@juntadeandalucia.es
Date of survey filling in	15 May 2015
Unit web address	
Formal name of the unit	Phase I-II Clinical Trial Unit
Postal address	Virgen del Rocío Hospital Universitary General Hospital Avda. Manuel Siurot s/n 41013 SEVILLE SPAIN

Unidad de Ensayos Clínicos Fase I y II (Hospitales U. Virgen Macarena - Virgen del Rocío)

Location



From Santa Justa train station



From San Pablo airport

Unidad de Ensayos Clínicos Fase I y II (Hospitales U. Virgen Macarena - Virgen del Rocío)

Ownership

Ownership	Public hospital
Established	2004
Linked hospital	Virgen del Rocío
Distance between linked hospital and Unit	Allocated in the same hospital
Linked Ethics Committee (CEIC)	CEIC Virgen del Rocío

Unit Manager

First and last names	Juan R. Castillo
Qualifications	MD PhD, full Professor
Medical specialty	Clinical Pharmacology
Manager since	2004
E-mail and phone	jcastillo@us.es 955013175

Unidad de Ensayos Clínicos Fase I y II (Hospitales U. Virgen Macarena - Virgen del Rocío)

Ownership

Short CV

Historial Académico

- Lcdo. En Medicina y Cirugía, en la Facultad de Medicina de Granada el 30-06-1975
- Doctor en Medicina y Cirugía por la F. De Medicina de Granada el 9-11-1978

Historial Profesional

- Situación actual y fecha de inicio: Funcionario a tiempo completo en la Universidad de Sevilla-SAS
  - Catedrático –Facultad de Medicina (Universidad de Sevilla)
  - Jefe de la Unidad Asistencial y Docente de Farmacología Clínica en HHUU Virgen del Rocío Sevilla desde 1989.
  - Coordinador del Centro Andaluz de Farmacovigilancia desde 1994 y Presidente del mismo Centro, según resolución de 5 de Noviembre de 2008 de la Secretaría General de Salud Pública y Participación de la Junta de Andalucía.
  - Responsable de la Unidad de Ensayos Clínicos Fase I y II desde su inicio en 2004

Resumen de Actividad científica

- Publicaciones libros y capítulos de libro: 21. Publicaciones nacionales: 94. Publicaciones internacionales: 50. Tesis Doctorales dirigidas: 13. Proyectos de investigación financiados: 19

Otros méritos

- Presidente del Comité Técnico Andaluz de Farmacovigilancia
- Miembro del Comité Autonómico de Ensayos Clínicos de Andalucía
- Miembro del Comité de Seguridad de Medicamentos de Uso Humano (Órgano colegiado de la Administración General del Estado), nombrado por la Ministra de Sanidad, Servicios sociales e Igualdad el día 11/05/2012 por un periodo de cuatro años.
- Miembro de la Red de Investigadores en Salud Pública dependiente de la Secretaría de Calidad, Innovación y Salud Pública de la Consejería de Igualdad, Salud y Políticas Sociales de la Junta de Andalucía.

Unidad de Ensayos Clínicos Fase I y II (Hospitales U. Virgen Macarena - Virgen del Rocío)

Accreditations and audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

No

Audits by regulatory agencies (last 3 years)

No

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? **Yes**

Audits by sponsors (last 3 years)

Yes, 3 audits since 2014

Do you follow your own Standard Operating Procedures (SOPs)? Yes Do you supply with a SOP copy to a sponsor if requested? Yes

Would you follow the sponsor SOPs if requested: In situations cosidered relevant to the clinical trial

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: None

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

There is a SOP regarding this procedures.

Unidad de Ensayos Clínicos Fase I y II (Hospitales U. Virgen Macarena - Virgen del Rocío)

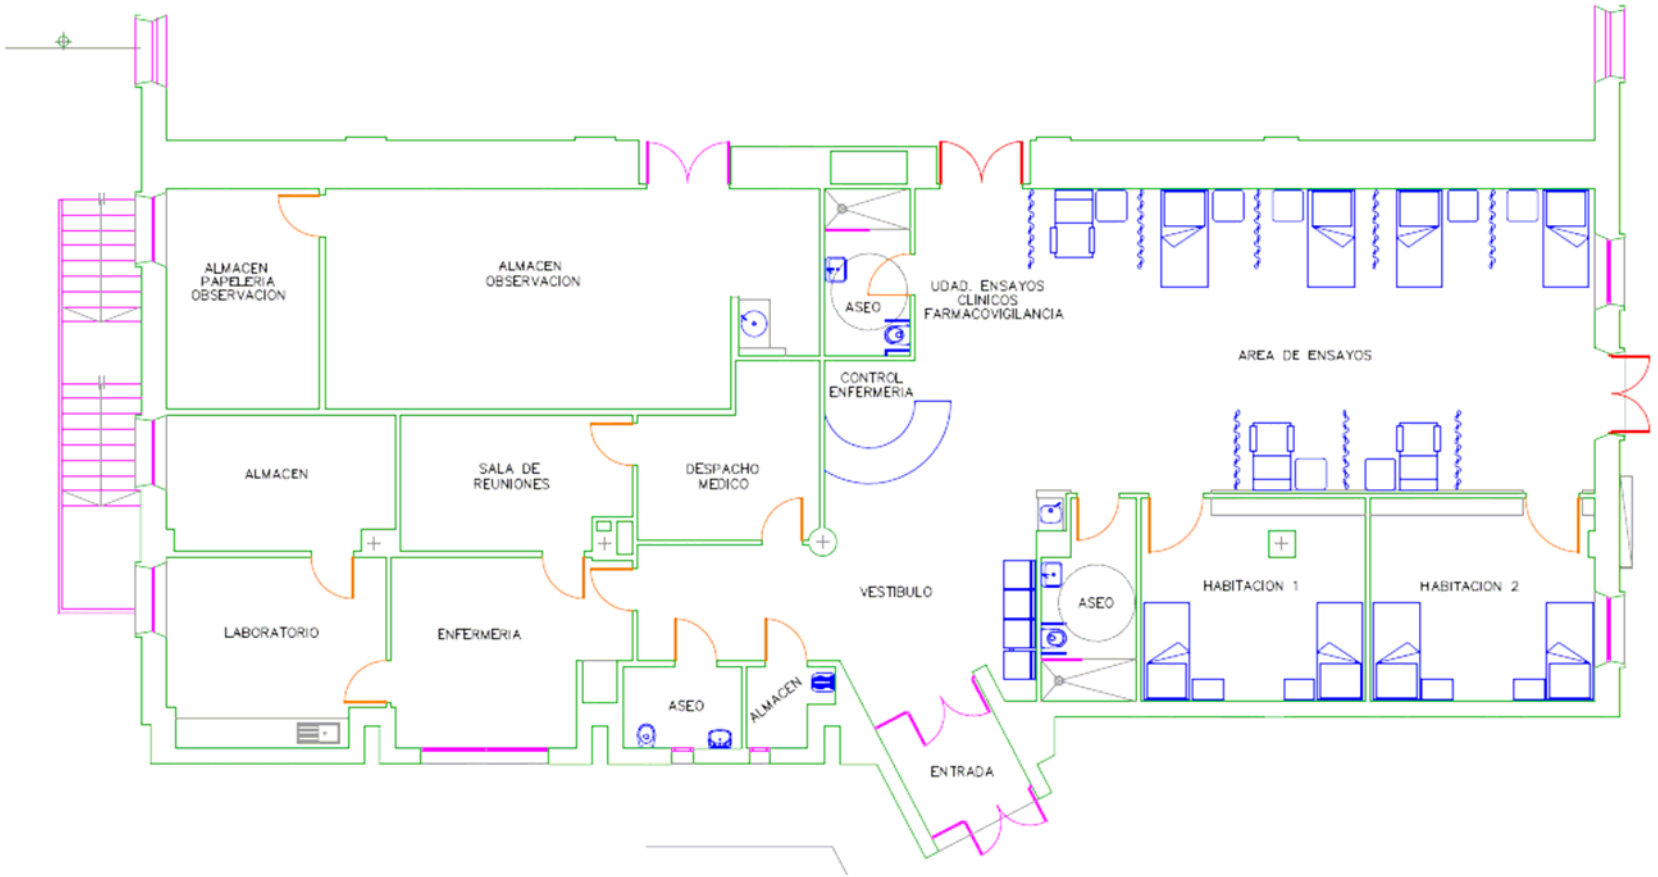
Facilities

Year of Unit building	1956	Last Unit reform	2014
Usable space	226.28	The Unit building is separate from the linked hospital	No
Number of CTs the unit could perform simultanously	12-15	Number of beds	11
Beds distribution	2 rooms with 2 beds each and 1 ward with 7 armchairs for patients		
Beds distribution allows a complete and continuous visual control by nurses			Yes
Number of bed with intensive or continuous monitoring	9	Number of armchairs suitable for subject monitoring	2
Owned kitchen	NO	Meals supervision by dietitian	Yes
Dining-room available for volunteers	Yes	Individual lockers available for volunteers	No
Relaxing room available for volunteers independent from the beds area			Yes
Availability in the unit of an emegency trolly for cardiopulmonary resuscitation			Yes
The emergency trolly has available suitable medications with immediate by controlled access			Yes
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)	Yes		
Unit availability of an evacuation plan for volunteers in emergency situations			Yes
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			Yes
Volunteers/patients healthcare would be covered by the national or the regional health system if required			Yes
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers	Critical Care Unit, Accident & Emergency Unit		
Distance and time to get the former services	AE is allocated just at the end of the Clinical Trial Unit		
Unit entrance/Exit door controlled	Yes, with a key	Unit with Closed Circuit Television	No
Availability of an alternate electrical generating set that automatically works in case of a general system failure			Yes

Unidad de Ensayos Clínicos Fase I y II (Hospitales U. Virgen Macarena - Virgen del Rocío)

Facilities

Unit distribution plan:



Unidad de Ensayos Clínicos Fase I y II (Hospitales U. Virgen Macarena - Virgen del Rocío)

Staffing and Resources

Unit employees

Permanent staff 5 Fixed-term/contracted staff (internship, grant holders) 1 Part-time collaborators 1

Distribution of Unit staff by functions

Function	Permanent staff	Contracted or part-time staff
Principal Investigator	1	
Co-investigator (physician)	1	
Nurse	2	
Monitor or CRA	5	
Pharmacist	3	
Biometry	1	
Data management	3

Project Management	3	
Finance		
Recruitment		
IT (informatics)		
Other (specify): CTA, psychologist, etc	1 CTA+1 lab tecnician	

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit

X Physician **X** Nurse

Unidad de Ensayos Clínicos Fase I y II (Hospitales U. Virgen Macarena - Virgen del Rocío)

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameteres)	Yes
The quality assurance activities are subcontracted by the Unit	We have our own Department
Availability of a specific area for drug storing and preparation of medications for the study	Yes
The former area or room has restricted access by key or code	Yes
Laminar flow chamber availability for preparation of parenteral treatments	Yes
Perfusion pumps for intravenous treatment	Yes
Who is the responsible for drug preparation and dispensing	**Dispensing:** Pharmaceutical **Preparation**: Pharmaceutical Department
Drug accountability procedures, such as reception, preparation and dispensing forms	Yes
SOPs available for drug preparation and dispensing	Yes
SOPs available for drawing and managing of biological fluids	Yes
System or procedure used for samples identification	
Numeric and bard code. Identifique sticks.	
Availability of a specific area for blood samples managing	Yes
The former area or room has restricted access by key or code	Yes
Number of centrifuges available	2
System for plasma/fluids samples storing	Yes
Fridges and freezers available in the Unit	2 freezers -20ºC and 1 freezer -80ºC
The Unit has its owned Bioanalytical Department	Yes. Biomedicine Institute of Seville (IBIS)
Availability of genotyping or fenotyping methods for participants	Yes

Unidad de Ensayos Clínicos Fase I y II (Hospitales U. Virgen Macarena - Virgen del Rocío)

Services Capabilities

Data Management and software used (describe)	Yes. Database
Biometry or Statistical Analysis and software used (describe)	Yes
Pharmacokinetic Analysis and software used (describe)	Yes
Medical Writing and skilled languages	Yes
Owned archives in the same Unit building (describe)	Yes

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

Once the clinical trial is closed, all the documentation are sent to the main building of Archive Unit where are custodiated over 15 years.

The study files are digitized and converted in a CD or web format	Yes

Project management

Unidad de Ensayos Clínicos Fase I y II (Hospitales U. Virgen Macarena - Virgen del Rocío)

Study Participants

Kind of participants included in clinical trials performed in the Unit

X	Healthy volunteers	X	Patients
	Other populations		

If the Unit has experience in oncology, detail kind of tumour and age groups

X	Solid tumour	X	Haematological tumour	X	Adults		Pediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

All kind of cancer

Recruiting methods for healthy volunteers

Web site and informative flyers.

Recruting methods for patients

Do you have sugery rooms available for screening (separated from the in-house area)? (number)	Yes (2)
Do you keep a paper or electronic database of volunteers? (describe)	Yes
Have you implemented any measure for avoiding the over-volunteering? (describe)	Yes

Unidad de Ensayos Clínicos Fase I y II (Hospitales U. Virgen Macarena - Virgen del Rocío)

Pharmacodynamic/Pharmacokinetic Capabilities

Digital blood pressure devices (number)	Yes (11)	Pulsioximetry devices (number)	Yes (11)	12-leads ECG devices (number)	Yes (2)

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	Yes
Availability in the Unit of tests for assessing CNS drug effects	No
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	Yes
Familiarity with Electronic Data Capture –EDC applied to clinical trials	Yes

Experience in other kind of PD or PK evaluations not formerly collected

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

Yes. In different clinical trials with food interactions.

Unidad de Ensayos Clínicos Fase I y II (Hospitales U. Virgen Macarena - Virgen del Rocío)

Experience

Number of clinical trials per year and type of study	Year					
Type of study	**2009**	**2010**	**2011**	**2012**	**2013**	**2014**
Bioequivalence			1	1	2	2
First single-dose administration in humans						
First multiple-dose administration in humans			1		1	
Drug interaction						
Food interaction					2	2
Special populations (Renal or liver impairment, elderly)	8	1	3	3	4	2
Proof of concept (Phase Ib or I/II)	7	6	9	9	8	11
Own research lines		2			1	1
Others (specificying)						

Number of trials linked to a PEI (IND) submission 2009 15 2010 9 2011 14 2012 13 2013 18 2014 18

Type of drugs (pharmacological group or mechanism of action) tested in the trials performed in the last 4 years

Biologicals drugs in different areas: medical oncology, haematology, nephrology and digestive. Inmunology in medical oncology.

Sponsor typology for Early Stages trials performed in the last 4 years (2011 to 2014)

Number of trials promoted by Spanish companies 8 Number of trials promoted by multinational companies 79

Median time for approval by the Ethics Committee and the Spanish Agency for the Early Stages trials

Number of Early Stages trials performed in the Unit and published in the last 4 years

Ownership

Ownership	Andalusian Health Service (SAS)
Established	2014
Linked hospital	Virgen de la Victoria University Hospital
Distance between linked hospital and Unit	No distance
Linked Ethics Committee (CEIC)	Provincial de Málaga

Unit Manager

First and last names	Trigo-Pérez, José Manuel
Qualifications	MD
Medical specialty	Medical Oncology
Manager since	2014
E-mail and phone	E-mail: jmtrigo@seom.org Tel.: + 34 951032083

Short CV

Graduate in Medicine and Surgery at the University of Malaga (Spain) in 1990.
Specialist in Medical Oncology "Doce de Octubre" Hospital in Madrid (Spain) in 1996.
Fellow in the Deaprtment of Clinical Pharmacogy (assistant in the development of phase I trials) at the Royal Marsden Hospital in London (UK) from 1997 to 1999.
Medical Oncologist (assitant in the development of pahe I clinical trials according to ICH Guidelines / GCP) at the Vall d'Hebron Hospital in Barcelona (Spain) from 2000 to 2003.
Medical Oncologist (assisting in the development of clinical trials according to ICH Guidelines / GCP) at the University Hospital Virgen de la Victoria in Malaga (Spain) from 2003 to the present.
Since 2003, he has participated as principal investigator in over 60 clinical trials (according to ICH / GCP guidelines).
Since 2014 in charge of Phase I Trials Unit of Regional and Virgen de la Victoria University Hospitals in Malaga.

Unidad de Fase I Hospitales Universitarios Regional y Virgen de la Victoria

Accreditations and audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

NO

Audits by regulatory agencies (last 3 years)

NO

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? YES

Audits by sponsors (last 3 years) NO

Do you follow your own Standard Operating Procedures (SOPs)? YES Do you supply with a SOP copy to a sponsor if requested? YES

Would you follow the sponsor SOPs if requested: YES

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: NO

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data: Accorfing to the Good Clinical Practice Guidelines

The documents are processed in accordance with the protocols and legal regulations of Clinical Trials. The paper documents are kept in the Archives of liabilities of the Clinical Hospital Documentation that has only access by authorized personnel.

All Databases in digital format has only authotized access by authorized pernonel; no data that would allow the identification of the patients will be provided.

Unidad de Fase I Hospitales Universitarios Regional y Virgen de la Victoria

Facilities

Year of Unit building	1971	Last Unit reform	2014
Usable space	275 m^2	The Unit building is separate from the linked hospital	NO
Number of CTs the unit could perform simultanously	3	Number of beds	4
Beds distribution	Two bedrooms with two beds each one and a room with four recliners as a day hospital		
Beds distribution allows a complete and continuous visual control by nurses			YES
Number of bed with intensive or continuous monitoring	4	Number of armchairs suitable for subject monitoring	4
Owned kitchen	No	Meals supervision by dietitian	YES
Dining-room available for volunteers	YES	Individual lockers available for volunteers	YES
Relaxing room available for volunteers independent from the beds area			YES
Availability in the unit of an emegency trolly for cardiopulmonary resuscitation			YES
The emergency trolly has available suitable medications with immediate by controlled access			YES
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)	YES		
Unit availability of an evacuation plan for volunteers in emergency situations			YES
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			YES
Volunteers/patients healthcare would be covered by the national or the regional health system if required			YES
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers	Urgency/Emergency Unit and Intensive care		
Distance and time to get the former services	This is a Unit attached to the Emergency Service of the Hospital		
Unit entrance/Exit door controlled	YES	Unit with Closed Circuit Television	NO
Availability of an alternate electrical generating set that automatically works in case of a general system failure			NO

Unidad de Fase I Hospitales Universitarios Regional y Virgen de la Victoria

Facilities

Unit distribution plan:

The Unit has the following facilities:

- Waiting room
- Blood extraction room
- Two outpatient clinic facilities
- One toilet
- One room for stogare of materials and documentation
- Two rooms for hospitalization with two beds each
- One treatment room (day hospital) with 4 reclinable armchairs
- One refrigeration room witn two freezers (-20 and -80) and one fridge, and a conduct to send blood test directly to our hospital laboratory
- One room for cleaning supplies

SOPs available for drawing and managing of biological fluids	YES

System or procedure used for samples identification

Barcode (identification is determined generally in kits according to the extraction times provided by the promotor/sponsor about the trial to performe. In independent tests, using a code assigned to it and request the extracted tubes are sent to the Central Laboratory of the Hospital

Availability of a specific area for blood samples managing	YES
The former area or room has restricted access by key or code	YES
Number of centrifuges available	1

System for plasma/fluids samples storing

There is one -20 freezer with alarm system, onother -80 freezer with alarm system, a refrigerator and racks for those who need room temperature.

Fridges and freezers available in the Unit	3

Unidad de Fase I Hospitales Universitarios Regional y Virgen de la Victoria

Services Capabilities

The Unit has its owned Bioanalytical Department	YES. In the same hospital
Availability of genotyping or fenotyping methods for participants	YES. TacMan, Applied Biosistem 7500 Fast Real Time PCR, Circulating Tumor Cells (isoflux), multi-Array (Light) in Pathology Department
Data Management and software used (describe)	Not in the Unit. Yes in the hospital
Biometry or Statistical Analysis and software used (describe)	Not in the Unit. Yes in the hospital
Pharmacokinetic Analysis and software used (describe)	Yes, WinNonlin software
Medical Writing and skilled languages	NO medical writer. Skill in English and Spanish
Owned archives in the same Unit building (describe)	YES. Own files in Unit, which are accessed with a key. Hospital files itself where all the documentation is sent once the trial is over. Passive file with restricted access.

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

All the information of a trial is locked. Only when a trial is finished, files are sent to the hospital until legal time is over and the documentation can be destroyed.

The study files are digitized and converted in a CD or web format	YES
Project management	YES

Unidad de Fase I Hospitales Universitarios Regional y Virgen de la Victoria

Study Participants

Kind of participants included in clinical trials performed in the Unit

X Healthy volunteers X Patients

Other populations

If the Unit has experience in oncology, detail kind of tumour and age groups

X Solid tumour X Haematological tumour X Adults X Pediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

All kind of tumors

Recruiting methods for healthy volunteers

Detection by the investigator or subinvestigators of candidates for a given clinical trial. We have not yet begun trials with healthy volunteers.

Recruting methods for patients

Following inclusion criteria and advertising in satellite centers asking them to send us patients candidates.

Do you have sugery rooms available for screening (separated from the in-house area)? (number)	YES
Do you keep a paper or electronic database of volunteers? (describe)	NO
Have you implemented any measure for avoiding the over-volunteering? (describe)	NO

Unidad de Fase I Hospitales Universitarios Regional y Virgen de la Victoria

Pharmacodynamic/Pharmacokinetic Capabilities

Digital blood pressure devices (number)	2	Pulsioximetry devices (number)	2	12-leads ECG devices (number)	2

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	YES
Availability in the Unit of tests for assessing CNS drug effects	Not in the Unit, but they are in the Hospital
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	NO
Familiarity with Electronic Data Capture –EDC applied to clinical trials	YES
Experience in other kind of PD or PK evaluations not formerly collected	NO

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

Usually, they are externalized to pharmaceutical industries and sponsors.

Unidad de Fase I Hospitales Universitarios Regional y Virgen de la Victoria

Experience

Number of clinical trials per year and type of study	Year					
Type of study	**2009**	**2010**	**2011**	**2012**	**2013**	**2014**

General Information

Who filled in this survey	**José López Miranda**
E-mail contact (Phone number)	jlopezmir@uco.es (0034 957 01 10 40)
Date of survey filling in	20th May 2015
Unit web address	http://www.imibic.org/
Formal name of the unit	Clinical Research Unit – Unidad de Investigación Clínica
Postal address	Hospital Universitario Reina Sofía / Instituto de Investigación Biomédica de Córdoba (IMIBIC) Edificio del Hospital Provincial, 1ª planta - ala izquierda Edificio de Investigación Clínica Avda. Menéndez Pidal, s/n 14004 CÓRDOBA (SPAIN)

Unidad de Investigación Clínica - Hospital Universitario Reina Sofía

Location

La Unidad está ubicada en dos edificios:
Edificio del Hospital Provincial, 1ª Planta con 400 m2: Inaugurado en 1969.
Edificio de Investigación Clínica, con 1.500 m2 en dos plantas: Inaugurado en 1976.

Unidad de Investigación Clínica - Hospital Universitario Reina Sofía

Ownership

Ownership	**Reina Sofía University Hospital / Córdoba Institute of Biomedical Research (IMIBIC in Spanish)**
Established	2014
Linked hospital	Reina Sofía University Hospital
Distance between linked hospital and Unit	The Unit is located in two different buildings within the Reina Sofía University Hospital Provincial Hospital Building, first floor Clinical Research Building
Linked Ethics Committee (CEIC)	Ethics Committee of Córdoba

Unit Manager

First and last names	José López Miranda
Qualifications	Medical Doctor
Medical specialty	Internal Medicine
Manager since	2015
E-mail and phone	jlopezmir@uco.es / 0034 957 01 10 40

Unidad de Investigación Clínica - Hospital Universitario Reina Sofía

Ownership

Short CV

Bachelor and doctor in Medicine by the University of Córdoba in 1986 and 1991, respectively. Dr. López Miranda is a full professor at the Department of Internal Medicine of the University of Córdoba. He is also Director of the Internal Medicine Management Unit of the Reina Sofía Hospital. Whitin the University, he is also Vice-Dean of Hospital Affairs and Director of the Faculty of Medicine.

On the other hand, he is Scientific Director of the Centre of Excellence Research Olive Oil and Health (CEAS in Spanish).

Dr. López Miranda is the principal investigador of the IMIBIC research group of Nutrigenomics and metabolic syndrome which is part of the Biomedical Research Networking Centre in Physiopathology of Obesity and Nutrition (CIBERobn), associate at the Carlos III Health Institute.

Dr. López Miranda has extensive experience in both, healthcare and research fields. Up to date, he has been principal investigator of 26 research projects and has also directed 34 doctoral theses. He is the author of 54 papers published in national journals, 236 papers published in high-impact international journals of the field of Clinical Nutrition, Nutrigenomics, Internal Medicine, Atherosclerosis and their clinical impact. He has published 25 book chapters and has contributed over 520 congress communications.

Unidad de Investigación Clínica - Hospital Universitario Reina Sofía

Accreditations and audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

No

Audits by regulatory agencies (last 3 years)

No

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? Yes

Audits by sponsors (last 3 years)

No

Do you follow your own Standard Operating Procedures (SOPs)? Yes Do you supply with a SOP copy to a sponsor if requested? Yes

Would you follow the sponsor SOPs if requested: Yes, in these SOPs are acceptable and there are no conflict of interest.

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: The Unit performed an internal audit in 2014

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

The Unit has its own Standard Operating Procedures.

Trial subject's safety: it is specified in the clinical trials protocols. Continued monitoring of the subjects the period of time they remain hospitalised in the Unit.

Data safety: the documents are processed according to the protocol and current legal regulations on clinical trials matters. The data of personal nature is treated in fulfilment of that stipulated in the Spanish Organic Law 15/1999, of December 13, on the Protection of Data of a Personal Nature.

The paper documentation is stored in the file of the Unit in a locked cabinet and with restricted access to authorized staff.

The Unit has a centralised computerized system of the Hospital with personal access and following the Regulation.

Databases access, exclusively restricted to authorised personnel.

Unidad de Investigación Clínica - Complejo Hospitalario Reina Sofía

Facilities

Year of Unit building		Last Unit reform	2014

The Unit is located in two different buildings: Provincial Hospital Building, opened in 1969 and Clinical Research Building, opened in 1976

The Unit building is separate from the linked hospital	No
Usable space	Provincial Hospital Building:400 m², Clinical Research Building: 1.500 m² distributed across two floors of which 200 m² are specially conditioned for Paediatric use.

Number of CTs the unit could perform simultanously	3	Number of beds	3
Beds distribution	1 room with 2 single beds and 1 room with 1 bed		
Beds distribution allows a complete and continuous visual control by nurses			No
Number of bed with intensive or continuous monitoring	All of them	Number of armchairs suitable for subject monitoring	14
Owned kitchen	Yes	Meals supervision by dietitian	Yes
Dining-room available for volunteers	Yes	Individual lockers available for volunteers	Yes
Relaxing room available for volunteers independent from the beds area			Yes
Availability in the unit of an emegency trolly for cardiopulmonary resuscitation			Yes
The emergency trolly has available suitable medications with immediate by controlled access			Yes
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)	Yes		
Unit availability of an evacuation plan for volunteers in emergency situations	061 emergency line and Emergency and ICU Services of the Hospital		
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			Yes

Unidad de Investigación Clínica - Complejo Hospitalario Reina Sofía

Facilities

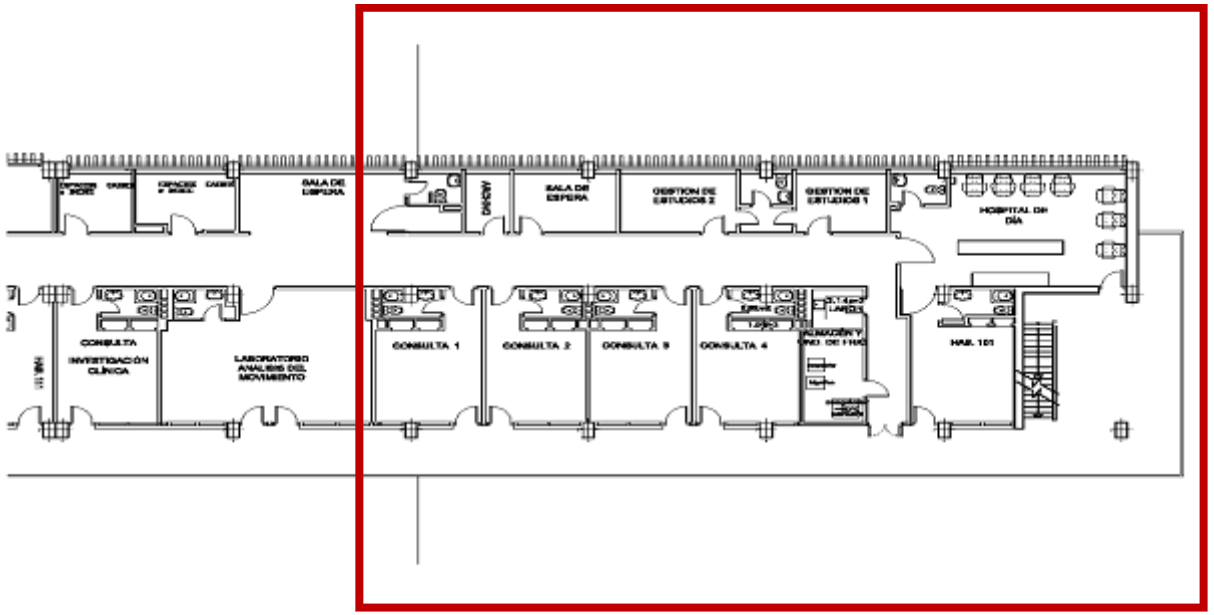
Volunteers/patients healthcare would be covered by the national or the regional health system if required	Yes		
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers	Yes		
Distance and time to get the former services	100 metres. In the event of emergency, the 061 service would arrive in less than 5 minutes		
Unit entrance/Exit door controlled	Yes, keys and Identity Card	Unit with Closed Circuit Television	Yes
Availability of an alternate electrical generating set that automatically works in case of a general system failure	Yes		

Unidad de Investigación Clínica - Complejo Hospitalario Reina Sofía

Facilities

Unit distribution plan:

The Unit situated in the Provincial Hospital (first floor) has 1 outpatient care, 1 room with 2 beds for hospitalised patients, 4 consulting rooms, 1 processing laboratory and storage of biological samples, 2 data manager offices (Data manager 1 and 2), 1 document archives and 1 waiting area for participants.

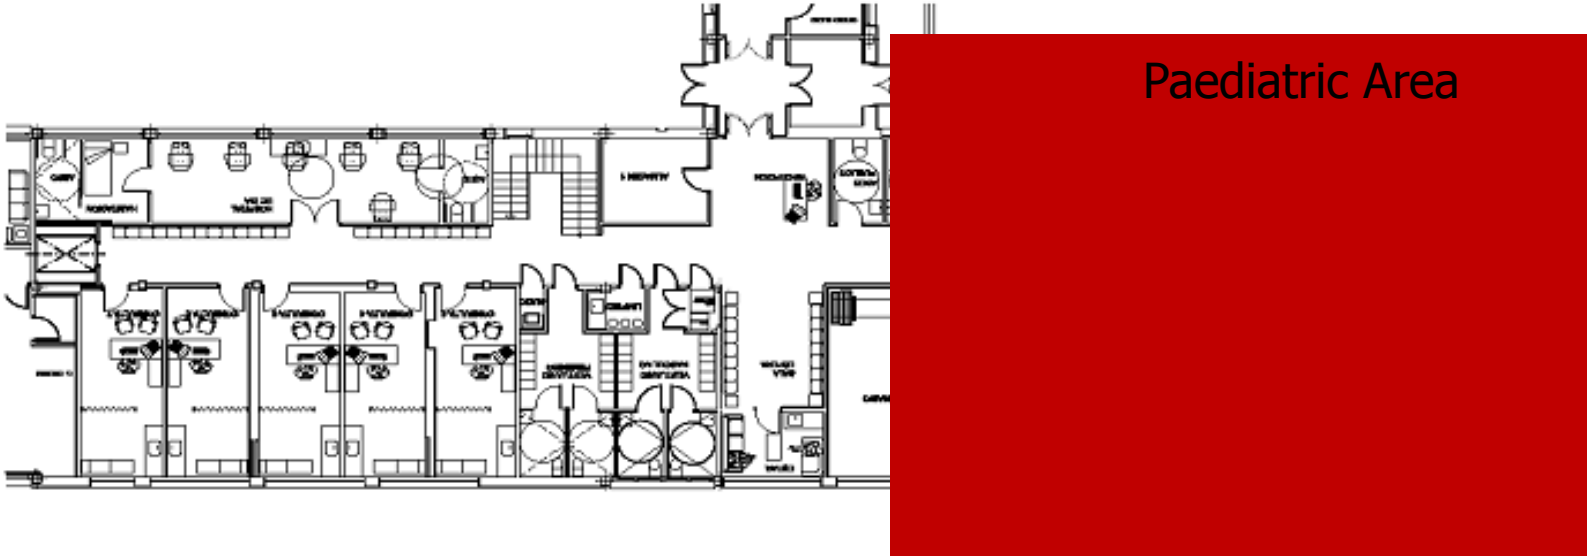


Unidad de Investigación Clínica - Complejo Hospitalario Reina Sofía

Facilities

Unit distribution plan:

The Unit situated in the Clinical Research building, level 0, has an Adult Area: 1 outpatient care, 1 room with 1 bed for hospitalised patients, 5 consulting rooms, 1 reception desk and 1 waiting area for participants with changing rooms. The Paediatric Area has 1 waiting room, 1 consulting room, 1 outpatient care, changing room, storeroom and multifunction room.

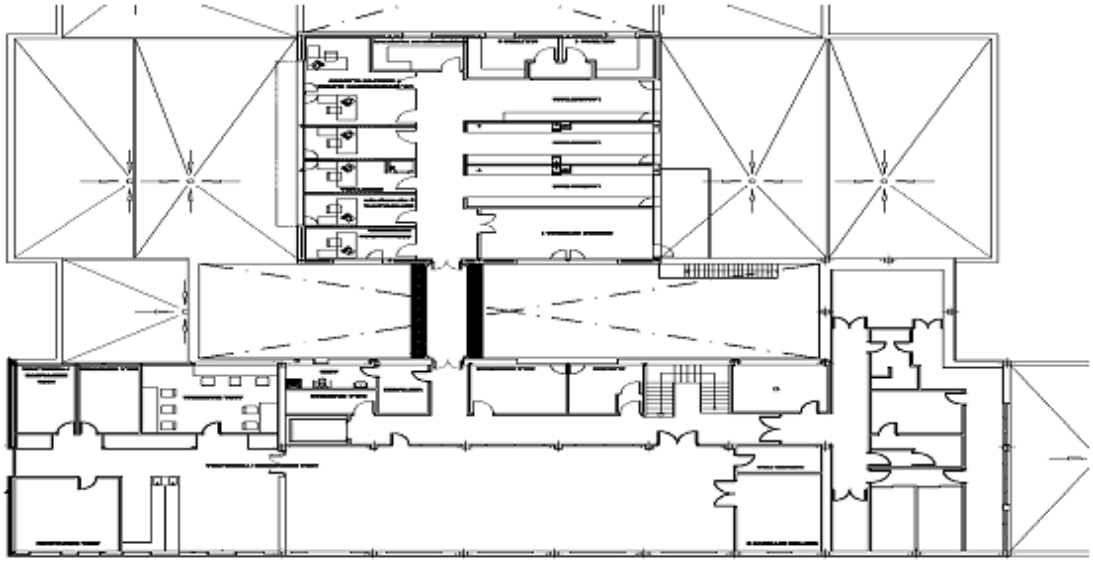


Unidad de Investigación Clínica - Complejo Hospitalario Reina Sofía

Facilities

Unit distribution plan:

There is in level 1, 1 processing laboratory and storage of biological samples, 2 data manager offices, 1 storeroom, 1 document archives and 1 clinical trials managers' office. The Hospital also has a biobank.



Unidad de Investigación Clínica - Complejo Hospitalario Reina Sofía

Staffing and Resources

Unit employees

Permanent staff 7 Fixed-term/contracted staff (internship, grant holders) Part-time collaborators 20

Distribution of Unit staff by functions

Function	Permanent staff	Contracted or part-time staff
Principal Investigator	1	
Co-investigator (physician)	1	
Nurse	4	
Monitor or CRA	2	
Pharmacist	2	
Biometry		
Data management	8	
Medical writing	2	
Pharmacokinetics		
Quality assurance	1	
Project Management	1	
Finance	1	
Recruitment		
IT (informatics)	1	
Other (specify): CTA, psychologist, etc	2 Nursing assistant, 1 orderly	

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit

X Physician **X** Nurse

Unidad de Investigación Clínica - Complejo Hospitalario Reina Sofía

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameteres)	Yes
The quality assurance activities are subcontracted by the Unit	No
Availability of a specific area for drug storing and preparation of medications for the study	Yes
The former area or room has restricted access by key or code	Yes
Laminar flow chamber availability for preparation of parenteral treatments	Yes, in the pharmacy hospital.
Perfusion pumps for intravenous treatment	Yes
Who is the responsible for drug preparation and dispensing	**Dispensing:** Pharmacist in the hospital **Preparation**: Pharmacist in the hospital
Drug accountability procedures, such as reception, preparation and dispensing forms	Yes
SOPs available for drug preparation and dispensing	Yes
SOPs available for drawing and managing of biological fluids	Yes

System or procedure used for samples identification stickers with barcode and numbers sticking one of them to each bottle and the same sticker to a petition document.

Availability of a specific area for blood samples managing	Yes
The former area or room has restricted access by key or code	Yes
Number of centrifuges available	6
System for plasma/fluids samples storing	Freezers in the unit
Fridges and freezers available in the Unit	2 refrigerators and 2 freezers

Unidad de Investigación Clínica - Complejo Hospitalario Reina Sofía

Services Capabilities

The Unit has its owned Bioanalytical Department	Yes, the techniques, infraestructures and equipments are the typicals of the UCAIB belonging to the IMIBIC
Availability of genotyping or fenotyping methods for participants	Yes
Data Management and software used (describe)	Red Cap
Biometry or Statistical Analysis and software used (describe)	SPSS
Pharmacokinetic Analysis and software used (describe)	No
Medical Writing and skilled languages	Spanish and English
Owned archives in the same Unit building (describe)	Yes, restricted access with ID card and cupboards with keys

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived The documentation is sent to file all documentation of the clinical trial being stored during the time stipulated by law

The study files are digitized and converted in a CD or web format	No
Project management	Yes

Unidad de Investigación Clínica - Complejo Hospitalario Reina Sofía

Study Participants

Kind of participants included in clinical trials performed in the Unit

Healthy volunteers Yes Patients Yes

Other populations Yes

If the Unit has experience in oncology, detail kind of tumour and age groups

Solid tumour Yes Haematological tumour Yes Adults Yes Paediatrics Yes

What kind of cancer (by organ) patients could be recruited by the Unit

This must be determined by the oncology department

Recruiting methods for healthy volunteers

This has been described in the SOP of the unit

Recruting methods for patients

In collaboration with the different services of the hospital through the main Principal Investigators of each Trial and electronic medical history

Do you have sugery rooms available for screening (separated from the in-house area)? (number) Current legislation will apply

Do you keep a paper or electronic database of volunteers? (describe)

No, we do not because the unit is very recent

Have you implemented any measure for avoiding the over-volunteering? (describe)

The measures dictated by the law

Unidad de Investigación Clínica - Complejo Hospitalario Reina Sofía

Pharmacodynamic/Pharmacokinetic Capabilities

Digital blood pressure devices (number)	Yes, 17	Pulsioximetry devices (number)	Yes,17	12-leads ECG devices (number)	Yes,2

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	No
Availability in the Unit of tests for assessing CNS drug effects	No
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	No
Familiarity with Electronic Data Capture –EDC applied to clinical trials	Yes
Experience in other kind of PD or PK evaluations not formerly collected	No

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

No

Medical specialty	Clinical Trials
Manager since	September 2009
E-mail and phone	agustin.martin.garcia.exts@juntadeandalucia.es / 622795953

Short CV

Master Degree in Chemistry 2002
University of Granada, Spain
Post-grade in Integrated Management System 2007
"Centro de Estudios Jurídicos" (CEJ- Granada) Spain
GCP training course 2010
"Agencia Española del Medicamento" AEMPS
Positions held in the last 5 years including current position:
Date From:
September 2009 Coordinator of UCICEC – CAIBER
"Hospital Universitario Virgen de las Nieves"
December 2012 Coordinator of Clinical Trial Unit
"Hospital Universitario Virgen de las Nieves"
Brief Summary of Relevant Clinical Research Experience:
I worked as a Data Manager for 4 months in Carlos Haya Hospital in 2006.
From September 2008 till June 2009, I worked in an investigation group in Granada's University.

Unidad de Ensayos Clínicos - Hospital Universitario Virgen de las Nieves

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

ACSA. Local accreditations of quality, every year

ISO. International accreditations of quality, every year

Audits by regulatory agencies (last 3 years)

We have audits by Sponsors and CROs every other month

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? **NA**

Audits by sponsors (last 3 years)

In last 3 years we have 18 audits by sponsors

Do you follow your own Standard Operating Procedures (SOPs)?	yes	Do you supply with a SOP copy to a sponsor if requested?	no, we let the sponsor to see it, but copies are not supply
Would you follow the sponsor SOPs if requested:	no		

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: ACSA and ISO

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

Yes, we follow the National and County law's. We work with numbers and we keep lock in a computer document or paper the relation between these numbers and names.

Unidad de Ensayos Clínicos Valdecilla

General Information

Who filled in this survey	Mª BLANCA SANCHEZ SANTIAGO
E-mail contact (Phone number)	bsanchez@humv.es (+34 942204084)
Date of survey filling in	15.MAY.2015
Unit web address	http://www.idival.org/ES/APOYOALINVESTIGADOR/ENSAYOSCLINICOS/Paginas/Inicio.aspx
Formal name of the unit	CLINICAL TRIALS UNIT VALDECILLA
Postal address	UNIVERSITY HOSPITAL "Marqués De Valdecilla" PABELLÓN 15-2nd Floor AVD. VALDECILLA S/N 39008 SANTANDER. SPAIN

Unidad de Ensayos Clínicos Valdecilla

Location

CLINICAL TRIALS UNIT VALDECILLA. SANTANDER. CANTABRIA. SPAIN

Unidad de Ensayos Clínicos Valdecilla

Ownership

Ownership	Valdecilla Biomedical Research Institute (IDIVAL) and University Hospital "Marqués de Valdecilla".
Established	University Hospital "Marqués de Valdecilla"
Linked hospital	
Distance between linked hospital and Unit	The Unit is inside the Hospital
Linked Ethics Committee (CEIC)	Ethics Committee of Cantabria

Unit Manager

First and last names	BLANCA SANCHEZ SANTIAGO
Qualifications	MD, phD
Medical specialty	Clinical Pharmacology
Manager since	2013
E-mail and phone	bsanchez@humv.es (+34 942204084)

Short CV

Clinical pharmacology specialist, Doctor in Medicine and Master by King Juan Carlos University (Madrid) in Study and Treatment of Pain.
Professor of the Department of Physiology and Pharmacology, Faculty of Medicine, University of Cantabria, teaching in medicine and nursing
Secretary of the Ethics Committee of Cantabria from 2010 to 2013.
Numerous publications in the field of clinical pharmacology

Unidad de Ensayos Clínicos Valdecilla

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

ISO 9001: 2008 Certification, on February 2015.

Audits by regulatory agencies (last 3 years)

None

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? **yes**

Audits by sponsors (last 3 years)

2

Do you follow your own Standard Operating Procedures (SOPs)? yes Do you supply with a SOP copy to a sponsor if requested? yes

Would you follow the sponsor SOPs if requested: Yes if they are not in conflict with Unit Procedures which habe been validates by ISO 9001:2008 audit.

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: One per year

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

The general procedures of the Unit include a specific procedure for information management. The Clinical Trials Management System (CTMS), an electronic tool in our Unit, is under controlled access by permission keys which are mandatory changed periodically; this system allows traceability of access and use.

The Unit has also access to the medical records of patients, as the Unit is included in the Hospital electronic information system that counts with the pertinent security systems.

Unidad de Ensayos Clínicos Valdecilla

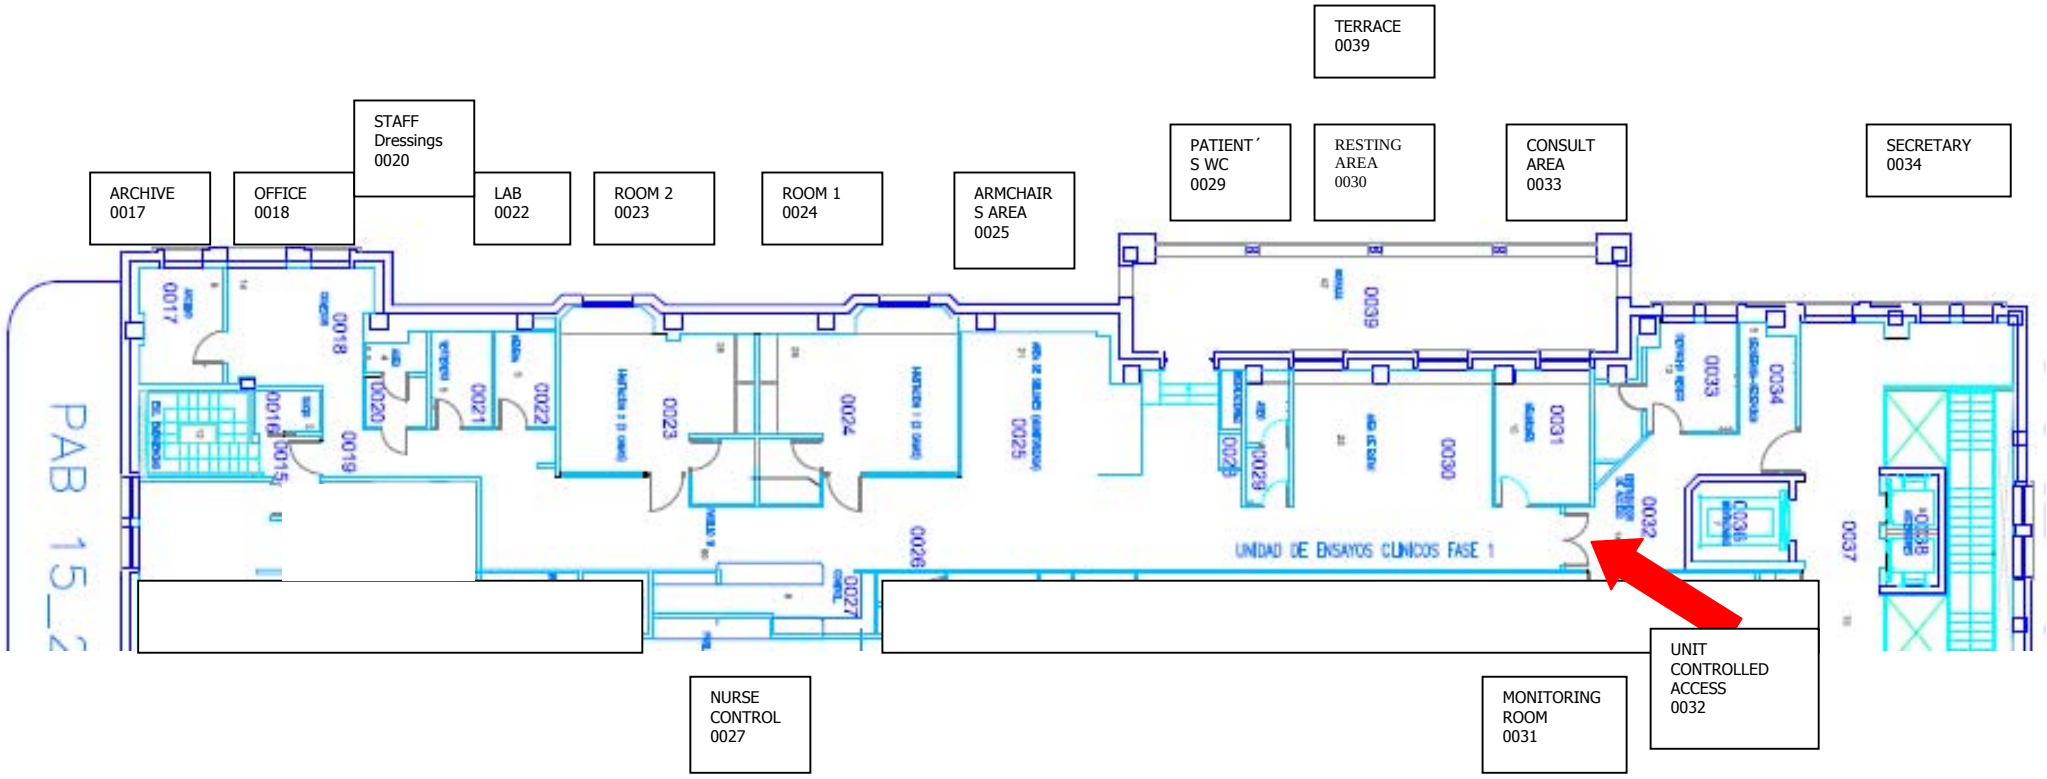
Facilities

Year of Unit building	2012	Last Unit reform	
Usable space	249 m2	The Unit building is separate from the linked hospital	NO
Number of CTs the unit could perform simultanously	2	Number of beds	4
Beds distribution	2 BEDS PER ROOM (TWO ROOMS,)		
Beds distribution allows a complete and continuous visual control by nurses			YES
Number of bed with intensive or continuous monitoring	4	Number of armchairs suitable for subject monitoring	5
Owned kitchen	YES	Meals supervision by dietitian	YES
Dining-room available for volunteers	YES	Individual lockers available for volunteers	YES
Relaxing room available for volunteers independent from the beds area			YES
Availability in the unit of an emegency trolly for cardiopulmonary resuscitation			YES
The emergency trolly has available suitable medications with immediate by controlled access			YES
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)	YES		
Unit availability of an evacuation plan for volunteers in emergency situations			YES
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			YES
Volunteers/patients healthcare would be covered by the national or the regional health system if required			YES
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers	Emergency Service and Critical Care Service, both in the same hospital that the Unit, AND Cardiac arrest in hospital-telephone number (3)		
Distance and time to get the former services	The Unit is in the second floor of the building and Emergency and Critical Care services are in floor –1 in the same building. After calling the cardiac arrest telephone number, the time to in-site response will be less than 1 min.		
Unit entrance/Exit door controlled	YES, by an intercom	Unit with Closed Circuit Television	NO
Availability of an alternate electrical generating set that automatically works in case of a general system failure			YES

Unidad de Ensayos Clínicos Valdecilla

Facilities

Unit distribution plan:



Unidad de Ensayos Clínicos Valdecilla

Staffing and Resources

Unit employees

Permanent staff 7 Fixed-term/contracted staff (internship, grant holders) 4 Part-time collaborators 2

Distribution of Unit staff by functions

Function	Permanent staff	Contracted or part-time staff
Principal Investigator	1,2,3	
Co-investigator (physician)	1,2,3	10,11
Nurse	4,5	8
Monitor or CRA		9
Pharmacist	3	
Biometry		12
Data management	2,3	8,9,10,11
Medical writing	1,2,3	
Pharmacokinetics	2	
Quality assurance	3	
Project Management	1,2,3	
Finance	3	
Recruitment	5	8,10,11
IT (informatics)		13
Other (specify): LAB TECH	6,7	

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit

X Physician X Nurse

Unidad de Ensayos Clínicos Valdecilla

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameteres)	YES
The quality assurance activities are subcontracted by the Unit	NO
Availability of a specific area for drug storing and preparation of medications for the study	YES
The former area or room has restricted access by key or code	YES
Laminar flow chamber availability for preparation of parenteral treatments	YES
Perfusion pumps for intravenous treatment	YES
Who is the responsible for drug preparation and dispensing	**Dispensing:** If medications don´t need preparation in a laminar flow hood, when it arrives to the Pharmacy Service, the pharmacist makes a block dispensation to the Unit. Then the unit pharmacologist will dispense patient by patient in the trial. Medication in the Unit will be under temperature control and under controlled access. The Unit has a SOP for dispensing and administration. **Preparation**: If medications need to be prepared in a laminar flow hood, pharmacists in the Pharmacy Service (Clinical Trials Section) will be in charge of this issue.
Drug accountability procedures, such as reception, preparation and dispensing forms	The Unit has its own SOP and Logs
SOPs available for drug preparation and dispensing	YES
SOPs available for drawing and managing of biological fluids	YES
System or procedure used for samples identification	

Labelling samples in the point of care. Double check by nurse and physician, and traceability document that accompanies samples to the managing room.

Availability of a specific area for blood samples managing	YES
The former area or room has restricted access by key or code	YES
Number of centrifuges available	1 Refrigerated

Unidad de Ensayos Clínicos Valdecilla

Services Capabilities

Data Management and software used (describe)	CTMS-FUNDANET (Clinical Trials Management System)
Biometry or Statistical Analysis and software used (describe)	The Unit outsources this activity. Dr. LLorca. Chair of Preventive Medicine and Public Health Department of the University of Cantabria.
Pharmacokinetic Analysis and software used (describe)	Compartmental and Non-compartmental analysis. WinNonlin
Medical Writing and skilled languages	NO
Owned archives in the same Unit building (describe)	YES

A 10m2 archive in the Unit, with controlled access and with antifire measures. In this archive, files are kept during the clinical trial progress; when the trial ends, the unifie file will be sent to the General Archive (Section of clinical trials) in Liencres Hospital.

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

It depends on the Promotor and legal requirements.

The study files are digitized and converted in a CD or web format	NO
Project management	YES
System for plasma/fluids samples storing	Under a central electronic temperature control system, using annually calibrated probes.
Fridges and freezers available in the Unit	4 Fridges and 2 Freezers (-20ºC, and –70ºC)
The Unit has its owned Bioanalytical Department	The Unit uses the Hospital Bioanalytical Department
Availability of genotyping or fenotyping methods for participants	NO

Unidad de Ensayos Clínicos Valdecilla

Study Participants

Kind of participants included in clinical trials performed in the Unit

Healthy volunteers	X	Patients	X
Other populations			

If the Unit has experience in oncology, detail kind of tumour and age groups

Solid tumour	X	Haematological tumour		Adults	X	Pediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

Breast, Lung, Prostate, Kidney, Colorectal, Skincancer (including Melanoma), osseous,…. The Oncology Service in University Hospital "Marqués de Valdecilla, is a national reference.

Recruiting methods for healthy volunteers

Through advertisements on the website of the Valdecilla Biomedical Research Institute and in newspapers.

Recruting methods for patients

We directly work with professionals in each service in our hospital. In each trial there is at least one investigator (principal or sub-intestigator) coming from the implicated Service; they directly recruit patients or they inform us and introduce us the patient.

Do you have sugery rooms available for screening (separated from the in-house area)? (number)	YES / 1
Do you keep a paper or electronic database of volunteers? (describe)	In process at this moment.
Have you implemented any measure for avoiding the over-volunteering? (describe)	In process at this moment.

Unidad de Ensayos Clínicos Valdecilla

Pharmacodynamic / Pharmacokinetic Capabilities

Digital blood pressure devices (number)	1	Pulsioximetry devices(number):	8	12-leads ECG devices (number)	1

Also monitors in each bed and armchair (9)

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	YES
Availability in the Unit of tests for assessing CNS drug effects	NO
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	NO
Familiarity with Electronic Data Capture –EDC applied to clinical trials	YES
Experience in other kind of PD or PK evaluations not formerly collected	NO

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

Unidad de Ensayos Clínicos Valdecilla

Experience

Number of clinical trials per year and type of study	Year					
Type of study	**2009**	**2010**	**2011**	**2012**	**2013**	**2014**
Bioequivalence						
First single-dose administration in humans						
First multiple-dose administration in humans						1

Unit Manager

First and last names	Rosa Mª Antonijoan Arbòs
Qualifications	Physician
Medical specialty	Clinical Pharmacologyst
Manager since	January, 1st 2011
E-mail and phone	rantonijoana@santpau.cat

Short CV

Since 1989 develops her professional activity, teaching and research, in the Department of Clinical Pharmacology and Drug Research Center (CIM) at the Santa Creu I Sant Pau Hospital (HSCSP) in Barcelona as researcher of the Research Institute at Sant Pau Hospital.
In 2009, she became part of the hospital staff as associated doctor of the Clinical Pharmacology Service. From January 2011 she also is Director of CIM Sant Pau and the Platform for Clinical Trials of the Hospital, dependent of the Institute of Health Carlos III (UICEC Sant Pau), and director-in-charge of the Pharmacology Service
As associated doctor of the Clinical Pharmacology Service at HSCSP is responsible for the development and supervision of clinical trials (CT) carried out at the CIM, mainly Phase I CT in Healthy Volunteers to establish the drug effects in the early stages of development and Phase II CT in limited groups of patients in collaboration with several clinical services of HSCSP to establish more wide kinetic and conceptual information in relation to the study drugs
Her research activity is focuses on the effects of drugs in humans, both from a pharmacological and therapeutic perspective, in order to evaluate tolerability and pharmacokinetics, pharmacodynamics or bioequivalence between different formulations of drugs. An important part of her research is focused on the study of drugs acting on the central nervous system, evaluating different aspects of the motor and sensory-cognitive processing.
She has participated in over 120 clinical trials as principal investigator (PI) and more than 300 clinical trials sponsored by industry. In addition, she has participated in 11 projects of competitive funding (FIS Marató, etc.), being the PI in one of them (FIS 04 / 2268).

CIM-Sant Pau (Centre d´Investigació del Medicament)

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

Generalitat de Catalunya. Health Department. January 2008. Certificate of compliance with GCP

Audits by regulatory agencies (last 3 years) 1

Spanish Medicines Agency. December, 20th 2011

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? YES

Audits by sponsors (last 3 years) 6

Do you follow your own Standard Operating Procedures (SOPs)? YES Do you supply with a SOP copy to a sponsor if requested? YES

Would you follow the sponsor SOPs if requested: YES

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: 2014 – 15 internal audits

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

During admission in the CIM, the participants remain in zones allowing continued visual supervision by specialized and trained personnel for the emergency situations management. There are acoustic alarms installed in beds and washrooms which the subject can activate at any time and none submission area allows the closing access by participants.
The CIM is inside the Hospital de la Santa Creu i Sant Pau and near to emergency department. The main emergency procedure in case of serious urgency situation consist in to transfer the subject to the emergency department (5 minutes). In the CIM, there are available SOPs with specific emergency procedures and emergency equipment (crash cart and medication).
All participants have an indentification card indicating his participation in the study and the telephone of the investigator to contact (24h) in any situation of emergency
The personal and medical data from the participants are managed in accordance with Law 15/1999 on Personal Data Protection, and its regulation (RD 1720/2007 of December 21st). Access to this information is restricted to authorized personnel of the CIM. In addition, all information of nature personal is coded in the study documentation.

CIM-Sant Pau (Centre d´Investigació del Medicament)

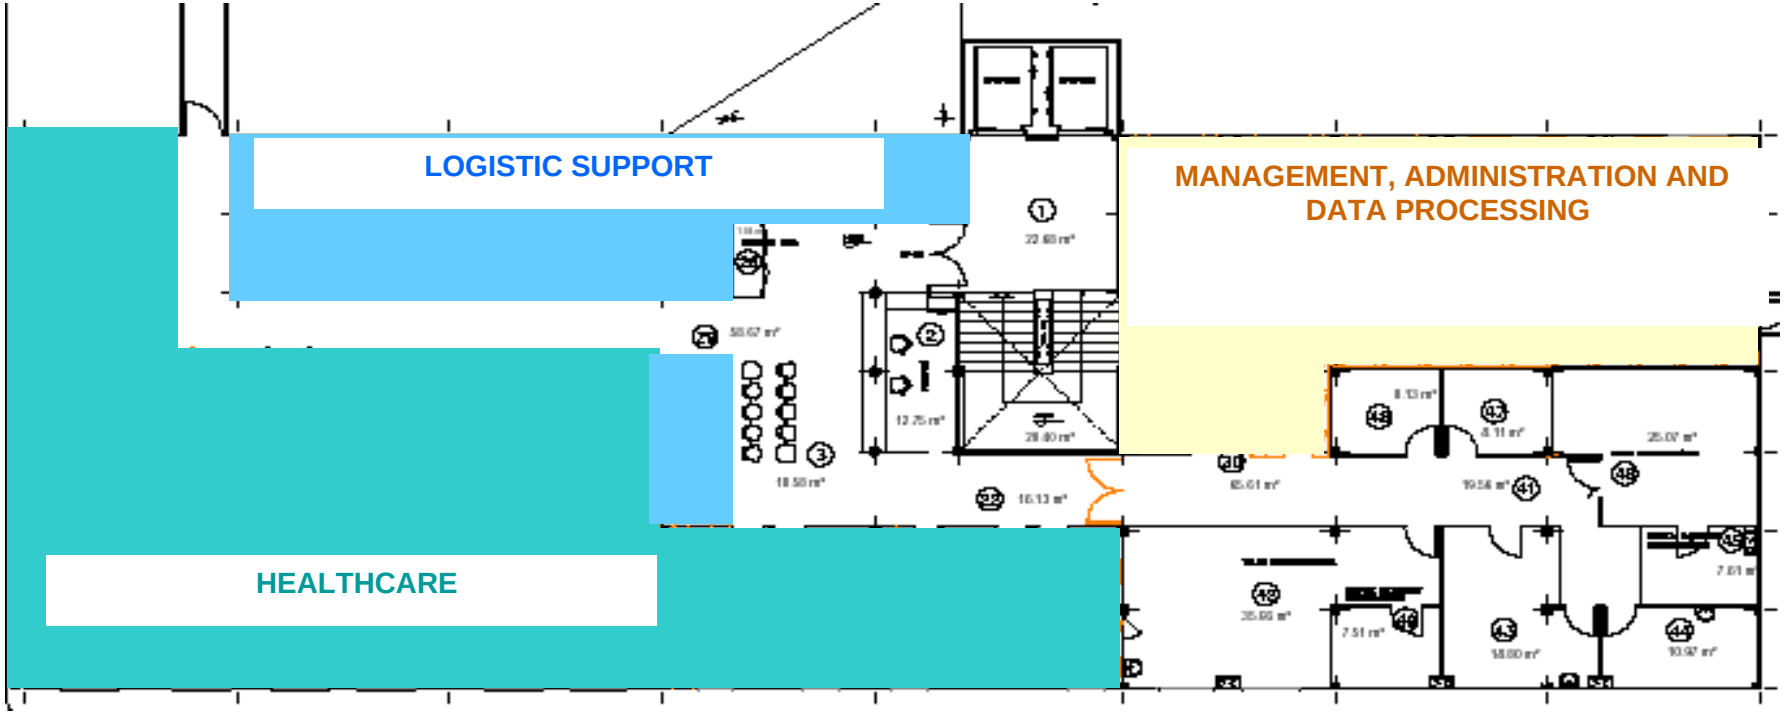
Facilities

Year of Unit building	1986	Last Unit reform	2006
Usable space	620 m^2	The Unit building is separate from the linked hospital	YES
Number of CTs the unit could perform simultanously	2	Number of beds	26
Beds distribution	24 beds in a room (distributed in 4 modules) and 2 independents single-bed rooms		
Beds distribution allows a complete and continuous visual control by nurses			YES
Number of bed with intensive or continuous monitoring	24	Number of armchairs suitable for subject monitoring	4
Owned kitchen	YES	Meals supervision by dietitian	YES
Dining-room available for volunteers	YES	Individual lockers available for volunteers	YES
Relaxing room available for volunteers independent from the beds area			YES
Availability in the unit of an emegency trolly for cardiopulmonary resuscitation			YES
The emergency trolly has available suitable medications with immediate by controlled access			YES
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)			YES
Unit availability of an evacuation plan for volunteers in emergency situations			YES
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			YES
Volunteers/patients healthcare would be covered by the national or the regional health system if required			YES
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers	Emergency Service of HSCSP		
Distance and time to get the former services	400 m and 5 min		
Unit entrance/Exit door controlled	YES	Unit with Closed Circuit Television	YES
Availability of an alternate electrical generating set that automatically works in case of a general system failure			NO

CIM-Sant Pau (Centre d´Investigació del Medicament)

Facilities

Unit distribution plan:



CIM-Sant Pau (Centre d´Investigació del Medicament)

Staffing and Resources

Unit employees

Permanent staff 20 Fixed-term/contracted staff (internship, grant holders) Part-time collaborators 1

Distribution of Unit staff by functions

Function	Permanent staff	Contracted or part-time staff
Principal Investigator	1, 2, 3, 6, 13	
Co-investigator (physician)	2, 3, 4, 5	
Nurse	7, 8, 9, 10	
Monitor or CRA	11, 12	
Pharmacist	6	22
Biometry	13	
Data management	14, 15	
Medical writing	1, 2, 3, 4, 5, 6	
Pharmacokinetics	6, 13	
Quality assurance	16	
Project Management	1, 2, 3, 4, 5, 6	
Finance	17	
Recruitment	7, 8, 9, 10	
IT (informatics)	18	
Other (specify): CTA, psychologist, etc	Lab. Technician (19), Psycologist (20), Secretary (21)	

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit

Physician Nurse **X**

CIM-Sant Pau (Centre d´Investigació del Medicament)

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameteres)	YES
The quality assurance activities are subcontracted by the Unit	NO, since we have a specific department.
Availability of a specific area for drug storing and preparation of medications for the study	YES
The former area or room has restricted access by key or code	YES
Laminar flow chamber availability for preparation of parenteral treatments	YES
Perfusion pumps for intravenous treatment	YES
Who is the responsible for drug preparation and dispensing	**Dispensing:** Dispensing is done by the own unit staff **Preparation**: The medication is prepared by the Pharmacy Service at Sant Pau Hospital
Drug accountability procedures, such as reception, preparation and dispensing forms	YES
SOPs available for drug preparation and dispensing	YES
SOPs available for drawing and managing of biological fluids	YES
System or procedure used for samples identification	codified Labels including study information and subject identification
Availability of a specific area for blood samples managing	YES
The former area or room has restricted access by key or code	YES
Number of centrifuges available	3
System for plasma/fluids samples storing	Freezers of -20 ºC or -80 ºC
Fridges and freezers available in the Unit	1 fridge, 3 freezers of -20ºC and 3 freezers of -80ºC
The Unit has its owned Bioanalytical Department	NO. We work with Anapharm, Echevarne, Kymos.
Availability of genotyping or fenotyping methods for participants	NO

CIM-Sant Pau (Centre d´Investigació del Medicament)

Services Capabilities

Data Management and software used (describe) YES

When paper CRFs are used, the data management is carried out by the DPM section of the CIM-Sant Pau for data entry in the database of the study. Data management is carried out according to the SOPs of the CIM-Sant Pau. Data entry is performed in duplicate way by two impartial trained operators using two independent computers (connected to the hospital network in order to facilitate the subsequent database comparisons and to ensure ongoing and long-term security of the data storage). Comparisons between both database and resolution of "queries" are carried out until no discrepancies are found in the comparisons. The software used is ACCESS (versio 2007).
When e-CRFs are used, CIM-Sant Pau collaborates with the company BIOCLEVER, in services for data collection (e-CRF) and data management by means the Clinsight software.

Biometry or Statistical Analysis and software used (describe) YES

Statistical analysis is realized by a statistician following the methodology specified in the Statistical Analysis Plan, approved by de principal investigator and the sponsor prior to obtain study results. The following software are regularly used: IBM-SPSS v. 22.0 and Win-Nonlin-Pro v. 2.0.

Pharmacokinetic Analysis and software used (describe) YES.

Included in the previous item

Medical Writing and skilled languages YES

Owned archives in the same Unit building (describe) YES

The CIM-Sant Pau have a specific area for temporal archive of study documentation. This area has access control and fire detector. The Investigator TMF remains filed in the CIM-Sant Pau up to the study close-up.

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

After study close-up all study related documentationThen is sent to the central department of Management and Clinical Trials Documentation (AGDAC) of the hospital. Later, this documentation will be sent to the General Archive of the Hospital de la Santa Creu I Sant Pau. Study documentation will remain filed for 25 years after the end of the clinical trial a longer period, if required by the applicable regulatory requirements

The study files are digitized and converted in a CD or web format YES (only 90% of documentation)

Project management YES

CIM-Sant Pau (Centre d´Investigació del Medicament)

Study Participants

Kind of participants included in clinical trials performed in the Unit

X Healthy volunteers X Patients

Own Data Base

Recruting methods for patients

Healthcare staff of the Hospital

Do you have sugery rooms available for screening (separated from the in-house area)? (number) YES. 4

Do you keep a paper or electronic database of volunteers? (describe) YES

The unit have an internal electronic database with more than 700 active healthy joung volunteers (demografics: age 18-45; nº females: 351; nº men: 380).

Have you implemented any measure for avoiding the over-volunteering? (describe) YES

Prior to the subject inclusion in a clinical study, it's verified that the subject has not taken part in any clinical trial during the previous months consulting database "Registro de Voluntarios Clínicos" managed by Generalitat de Catalunya and shared by Phase I Units of Barcelona.

CIM-Sant Pau (Centre d´Investigació del Medicament)

Pharmacodynamic/Pharmacokinetic Capabilities

Digital blood pressure devices (number)	5	Pulsioximetry devices (number)	1	12-leads ECG devices (number)	3

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	YES. 1 Study
Availability in the Unit of tests for assessing CNS drug effects	YES. Psychomotor performance, , pupillometry, evoked potencials, polysomnography
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	YES. Nonmen
Familiarity with Electronic Data Capture –EDC applied to clinical trials	YES

Experience in other kind of PD or PK evaluations not formerly collected

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

Postal address	Gran Via de l'Hospitalet, 199. 08908 L'Hospitalet de Llobregat. Barcelona Location and directions: https://www.google.com/maps/d/viewer?mid=zmOmBLzEFycI.kqtKmr0SqDyU&msa=0

Unidad de Ensayos Clínicos (Hospital Universitario de Bellvitge)

Ownership

Ownership	Public
Established	2000
Linked hospital	Bellvitge Hospital University
Distance between linked hospital and Unit	430mts
Linked Ethics Committee (CEIC)	CREC Bellvitge Hospital University

Unit Manager

First and last names	Marcela Manríquez Tapia
Qualifications	Doctor
Medical specialty	Clinical Pharmacology
Manager since	2009
E-mail and phone	mmanriquez@bellvitgehospital.cat (+34932607107)

Short CV

- Graduate in Medicine (1994)
- Specialist Qualification in Clinical Pharmacology (2000)
- Member of Sociedad Española de Farmacología Clínica
- Clinical pharmacologist Clinical Trials Unit 'Hospital Clínic de Barcelona' (2000 to 2006)
- Clinical pharmacologist Clinical Trials Unit 'Hospital Universitari de Bellvitge' (2006 to present)
- Member of CREC:
  * Corporació Sanitària Parc Taulí (2000 to present)
  * Hospital Universitari de Bellvitge (2006 to 2009)
  * Instituto de Microcirugía Ocular(2006 to present)
- Participation in several clinical trials of different phases (I, II, III)
- Drafting of clinical trial protocols and final reports
- Management and coordination of non-commercial clinical trial

Unidad de Ensayos Clínicos (Hospital Universitario de Bellvitge)

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

Pending accreditation for 2015

Audits by regulatory agencies (last 3 years)

Not

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? Yes

Audits by sponsors (last 3 years) Yes, November 2013

Do you follow your own Standard Operating Procedures (SOPs)? Yes Do you supply with a SOP copy to a sponsor if requested? Yes

Would you follow the sponsor SOPs if requested: Yes, If standards are met BPC

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: 1-2

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

Continuous supervision of patients who stay in the unit.
Confidentiality and data protection according Stated in Law 15/1999.
Camera monitoring all area of Unit.
Limited access to the Unit staff.
Restricted access to computers by means of passwords and manuals locked files.

Unidad de Ensayos Clínicos (Hospital Universitario de Bellvitge)

Facilities

Year of Unit building	1977	Last Unit reform	2007
Usable space	500m2	The Unit building is separate from the linked hospital	Yes
Number of CTs the unit could perform simultanously	2-3	Number of beds	10
Beds distribution	A room with four beds and three rooms with two beds each		
Beds distribution allows a complete and continuous visual control by nurses			Yes
Number of bed with intensive or continuous monitoring	3	Number of armchairs suitable for subject monitoring	0
Owned kitchen	No	Meals supervision by dietitian	Yes
Dining-room available for volunteers	Yes	Individual lockers available for volunteers	Yes
Relaxing room available for volunteers independent from the beds area			Yes
Availability in the unit of an emegency trolly for cardiopulmonary resuscitation			Yes
The emergency trolly has available suitable medications with immediate by controlled access			Yes
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)	yes, both (Basic Life Support or/and Advanced LS)		
Unit availability of an evacuation plan for volunteers in emergency situations			Yes
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			Yes
Volunteers/patients healthcare would be covered by the national or the regional health system if required			Yes
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers	Direct connection with emergency equipment		
Distance and time to get the former services	Some meters and few minutes (<5 min usually)		
Unit entrance/Exit door controlled	Yes, by keys	Unit with Closed Circuit Television	No
Availability of an alternate electrical generating set that automatically works in case of a general system failure

Other (specify): CTA, psychologist, etc		

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit

x Physician x Nurse

Unidad de Ensayos Clínicos (Hospital Universitario de Bellvitge)

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameteres)	UNE-EN ISO 15189: 2007
The quality assurance activities are subcontracted by the Unit	No
Availability of a specific area for drug storing and preparation of medications for the study	Yes
The former area or room has restricted access by key or code	Yes
Laminar flow chamber availability for preparation of parenteral treatments	No
Perfusion pumps for intravenous treatment	Yes
Who is the responsible for drug preparation and dispensing	**Dispensing:** Unit nurse **Preparation**: Unit nurse
Drug accountability procedures, such as reception, preparation and dispensing forms	Yes
SOPs available for drug preparation and dispensing	Yes
SOPs available for drawing and managing of biological fluids	Yes
System or procedure used for samples identification	
Label of clinical trial with the requested specific data.	
Availability of a specific area for blood samples managing	Yes
The former area or room has restricted access by key or code	Yes
Number of centrifuges available	Two centrifuges for samples refrigerated and not refrigerated
System for plasma/fluids samples storing	It depends on the type of sample and the sponsor instructions
Fridges and freezers available in the Unit	1 Fridge and 2 freezers
The Unit has its owned Bioanalytical Department	No
Availability of genotyping or fenotyping methods for participants	

Unidad de Ensayos Clínicos (Hospital Universitario de Bellvitge)

Services Capabilities

Data Management and software used (describe)	No
Biometry or Statistical Analysis and software used (describe)	No
Pharmacokinetic Analysis and software used (describe)	No
Medical Writing and skilled languages	Yes

Owned archives in the same Unit building (describe)

Yes, four files locked in rooms restricted to unit personnel

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

Master file and CRF non-electronic remain in the unit the time required by law

The study files are digitized and converted in a CD or web format	No
Project management	Yes

Unidad de Ensayos Clínicos (Hospital Universitario de Bellvitge)

Study Participants

Kind of participants included in clinical trials performed in the Unit

Healthy volunteers	Yes	Patients	Yes
Other populations	N/A		

If the Unit has experience in oncology, detail kind of tumour and age groups

Solid tumour		Haematological tumour	
Adults		Pediatrics	

What kind of cancer (by organ) patients could be recruited by the Unit

N/A

Recruiting methods for healthy volunteers

Specific posters previously approved by the CREC

Recruting methods for patients

Recruited by the clinical trial team doctor

Do you have sugery rooms available for screening (separated from the in-house area)? (number) Yes, a consulting room

Do you keep a paper or electronic database of volunteers? (describe)

No

Have you implemented any measure for avoiding the over-volunteering? (describe)

Yes, the database by healthy volunteers of health department of "Generalitat de Catalunya"

Unidad de Ensayos Clínicos (Hospital Universitario de Bellvitge)

Pharmacodynamic / Pharmacokinetic Capabilities

Digital blood pressure devices (number)	3	Pulsioximetry devices (number)	2	12-leads ECG devices (number)	2

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	No
Availability in the Unit of tests for assessing CNS drug effects	N/A
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	No
Familiarity with Electronic Data Capture –EDC applied to clinical trials	Yes
Experience in other kind of PD or PK evaluations not formerly collected	N/A

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

N/A

Short CV

Education
MD / Degree in Medicine (Universidad Autónoma de Barcelona, 1978)
PhD / Doctor in Medicine (Universidad Autónoma de Barcelona, 1990)
Clinical Pharmacology specialist MIR (Hospital Clínic, 1984)
Master in Pharmacoepidemiology (Universidad Autónoma de Barcelona, 1993)
Diploma in Pharmaceutical Medicine (Universidad Autónoma de Barcelona, 1997)
Diploma in Bioethics and Quality of Life (Universidad de Barcelona, 2002)
Diploma in Medical Ethics (Organización Médica Colegial e Instituto Universitario de Investigación Ortega y Gasset, 2012)

Professional experience
Head of Unit, Cliinical Pharmacology Unit, Hospital Universitari Germans Trias i Pujol. Badalona. Institut Català de la Salut (ICS), (2015-act)
Professor of Pharmacology, Departamento Farmacología, Terapéutica y Toxicología, Universidad Autónoma de Barcelona (2008-actualidad)
Professional experience (cont.)
Senior Consultant-3, HUman Pharmacology Unit, Institut Hospital del Mar d'Investigacions Mèdiques (IMIM, Parc de Salut MAR) (1986-2015)
Mentor Clinical Pharmacology residents (1988 – act)
Chairman Human Research Ethical Committee CEIC-PSMAR (2001-2015)

Research
Principal investigator or subinvestigator in 196 clinical trials with medicines, non-prescription drugs, drugs of abuse and nutraceutics
Director de 17 Doctoral Thesis
Publications: 249 original manuscripts in international journals, 534 manuscripts in total

UPIC Unidad de Fase I – Hospital Universitari Germans Trias i Pujol

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

No. During 2015 first semester it's planned to apply for Phase I Unit acreditation to Catalonia's Generalitat (government) Health Department.

Audits by regulatory agencies (last 3 years)

No.

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? **Yes**

Audits by sponsors (last 3 years)

No audit has been performed at the Unit, however several Pharmacy industry sponsor evaluation pre-shight visits have been performed in order to assess the unit as site for Phase II to IV clinical trials.

Do you follow your own Standard Operating Procedures (SOPs)? Yes Do you supply with a SOP copy to a sponsor if requested? No

Would you follow the sponsor SOPs if requested: Yes if they are feasible with the unit conditions.

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: Unit internal audit one per year

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

UPIC is integrated as a functional unit in the hospital organigram. The computerized clinical history is used as a tool for daily activity, matching the hospital requirements on confidentiality and data protection for volunteers/patients treated on it. Furthermore there is a unit specific SOP in data protection.

UPIC Unidad de Fase I – Hospital Universitari Germans Trias i Pujol

Facilities

Year of Unit building	1982 the hospital building. 2010 the specific unit (UPIC)	Last Unit reform	--
Usable space	400 m^2	The Unit building is separate from the linked hospital	No
Number of CTs the unit could perform simultanously	2 Phase I	Number of beds	6
Beds distribution	1 hospitalization with 6 beds		
Beds distribution allows a complete and continuous visual control by nurses			Yes

The former area or room has restricted access by key or code	Yes
Laminar flow chamber availability for preparation of parenteral treatments	No
Perfusion pumps for intravenous treatment	Yes
Who is the responsible for drug preparation and dispensing	**Dispensing:** Hospital Pharmacy **Preparation**: depending on the study design: Hospital Pharmacy / Nurse **Administration:** specialized nurse under research team supervision
Drug accountability procedures, such as reception, preparation and dispensing forms	Yes
SOPs available for drug preparation and dispensing	Yes
SOPs available for drawing and managing of biological fluids	Yes
System or procedure used for samples identification	
Stickers computer generated. Covered with transparent plastic adhesive to prevent data loss during freezing	
Availability of a specific area for blood samples managing	Yes
The former area or room has restricted access by key or code	No
Number of centrifuges available	1 refrigerated, 1 not refrigerated
System for plasma/fluids samples storing	-27ºC and -80ºC Freezers(the last one located in the Health Sciences Research Institute of the "Germans Trias i Pujol" Foundation (IGTP) building, 200 meters away from the hospital)
Fridges and freezers available in the Unit	2 fridges, 2 freezers (-20ºC)

UPIC Unidad de Fase I – Hospital Universitari Germans Trias i Pujol

Services Capabilities

The Unit has its owned Bioanalytical Department	No. Subcontracting companies if needed and depending on budget
Availability of genotyping or fenotyping methods for participants	No. Subcontracting to IGTP Foundation or specific companies
Data Management and software used (describe)	No. Subcontracted depending on the project.
Biometry or Statistical Analysis and software used (describe)	No. Subcontracted depending on the project.
Pharmacokinetic Analysis and software used (describe)	No. Subcontracted depending on the project.
Medical Writing and skilled languages	Yes. English, French, Spanish.
Owned archives in the same Unit building (describe)	Yes

Ongoing studies Trial Master File at the UPIC unit.

Hospital historic archive for the sponsor closed studies.

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

Full Trials doccuments are sent to the archives and are kept for 15 years.

The study files are digitized and converted in a CD or web format	No
Project management	Yes

UPIC Unidad de Fase I – Hospital Universitari Germans Trias i Pujol

Study Participants

Kind of participants included in clinical trials performed in the Unit

X Healthy volunteers X Patients

X Other populations Pediatrics

If the Unit has experience in oncology, detail kind of tumour and age groups

X Solid tumour X Haematological tumour X Adults Pediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

Oncology studies at site are managed from Catalan Institut of Oncology (ICO).

Recruiting methods for healthy volunteers

Advertisements distributed throughout the hospital and the School of Medicine Docent Unit of Universitat Autònoma de Barcelona. Also through receipt of voluntary requests to participate in Phase I clinical trials.

Recruting methods for patients

Through contacts with specialists doctors in the hospital, according to the study.

Do you have sugery rooms available for screening (separated from the in-house area)? (number) Yes (3)

Do you keep a paper or electronic database of volunteers? (describe) Yes

Electronic database with following information: name, age, sex, nationality, date of contact with the unit for inclusion in the database, personal identification code in national health system (CIP), contact information data (phone, e-mail, address), previous participation in clinical trials and unit in which participation was performed.

Have you implemented any measure for avoiding the over-volunteering? (describe) Yes

Interrogation about other projects participation. Acces to the Clinical Trials Volunteers Registry of the Catalonia Generalitat

Unidad de de Ensayos Clínicos Sant Joan de Déu

Location

Hospital Sant Joan de Déu - Barcelona
Passeig Sant Joan de Déu, 2
08950 Esplugues de Llobregat
Barcelona

Unidad de de Ensayos Clínicos Sant Joan de Déu

Ownership

Ownership	Sant Joan de Déu Research Foundation
Established	2012
Linked hospital	Hospital Materno Infantil Sant Joan de Déu and Hospital Parc Sanitari Sant Joan de Déu
Distance between linked hospital and Unit	Within the same pediatric- maternity hospital . 10 km from the Parc Sanitari Hospital
Linked Ethics Committee (CEIC)	CEIC Fundació Sant Joan de Déu

Unit Manager

First and last names	Joana Claverol Torres
Qualifications	Biology D.
Medical specialty	Clinical Research
Manager since	2012
E-mail and phone	jclaverol@fsjd.org +34 610 58 14 29

Short CV

Academic history:
- 1999 Degree in Biological Sciences Autonomous University of Barcelona
- 1999 Master of monitoring clinical trials Universitat de Barcelona
- 2002 Master in Pharmaceutical Marketing Universitat Pompeu Fabra, Barcelona

Professional history and research:
- April 2012-present: Clinical Reserach Unit Manager, Fundació Sant Joan de Deu
- November 2011-April 2012: Regional-Osteoporosis Medical Liaison Amgen SA
- November 2010 - November 2011 International Manager of Regional Medical Officers, Amgen HQ (Zug, Switzerland)
- March 2004-October 2010 Amgen SA Regional Medical Liaison, Nephrology and General Medicine.
- January 2002-March 2004 Pfizer SA, Project Manager, Cardiovascular area
- January 2000-January 2002 Pfizer SA CRA Cardiovascular Clinical Trials
- November 1999-January 2000 Parke Davis S. A CRA Cardiovascular Clinical Trials

Unidad de de Ensayos Clínicos Sant Joan de Déu

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

None

Audits by regulatory agencies (last 3 years)

None

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? Yes

Audits by sponsors (last 3 years)

4 audits in 2014 and 3 in 2013

Do you follow your own Standard Operating Procedures (SOPs)? Yes Do you supply with a SOP copy to a sponsor if requested? Yes

Would you follow the sponsor SOPs if requested: Yes if they do not conflict with the procedures of the unit

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: 3

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

Unit SOPs are followed, the Guidelines for Good Clinical Practice, the RD 223/2004 of clinical trials and the Law on Data Confidentiality Protection .Annually an internal audit on compliance with the Data Confidentiality is performed.

Access to confidential information is restricted and locked. Access to clinical patient data is restricted to center staff that has permissions and access code, and monitors who have access to reading data on paper. All other information is encrypted and anonymized according to the trial sponsor requirements.

We follow an internal SOPs describing the retention policy documents (according to ICH), and documentation is stored for 15 years in an external archive facility that fulfils all applicable regulations.

Unidad de de Ensayos Clínicos Sant Joan de Déu

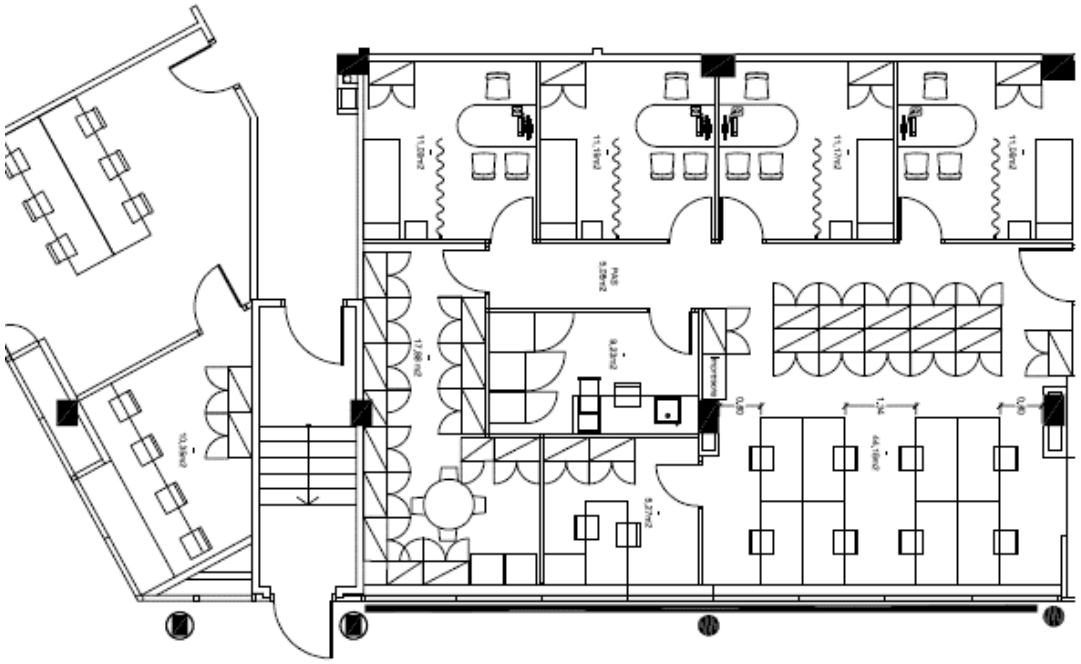
Facilities

Year of Unit building	2012	Last Unit reform	2015
Usable space	150 m^2	The Unit building is separate from the linked hospital	No
Number of CTs the unit could perform simultanously	3-4 ph1	Number of beds	4
Beds distribution	Single rooms in the unit, and single or double rooms in the hospital		
Beds distribution allows a complete and continuous visual control by nurses			Yes
Number of bed with intensive or continuous monitoring	All beds	Number of armchairs suitable for subject monitoring	4
Owned kitchen	Hospital	Meals supervision by dietitian	yes
Dining-room available for volunteers	na	Individual lockers available for volunteers	na
Relaxing room available for volunteers independent from the beds area			na
Availability in the unit of an emegency trolly for cardiopulmonary resuscitation			yes
The emergency trolly has available suitable medications with immediate by controlled access			yes
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)	Yes		
Unit availability of an evacuation plan for volunteers in emergency situations			yes
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			yes
Volunteers/patients healthcare would be covered by the national or the regional health system if required			yes
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers	Yes, ICU and emergency department of the hospital		
Distance and time to get the former services	In the same building		
Unit entrance/Exit door controlled	Doors are blocked electronically and can only be accessed by authorized personnel with a specific badge	Unit with Closed Circuit Television	no
Availability of an alternate electrical generating set that automatically works in case of a general system failure	No, is the one of the Hospital		

Unidad de de Ensayos Clínicos Sant Joan de Déu

Facilities

Unit distribution plan



Unidad de de Ensayos Clínicos Sant Joan de Déu

Staffing and Resources

Unit employees

Permanent staff 8 Fixed-term/contracted staff (internship, grant holders) 1 Part-time collaborators 4

Distribution of Unit staff by functions

Function	Permanent staff	Contracted or part-time staff
Principal Investigator *		
Co-investigator (physician)		
Nurse	3,4,5,6,7	
Monitor or CRA		
Pharmacist	9,10	
Biometry	8	
Data management	8	
Medical writing		
Pharmacokinetics		
Quality assurance		
Project Management	11	
Finance	12	
Recruitment		
IT (informatics)		
Other (specify): CTA, psychologist, etc	2	
Other (specify): Clinical Trials Unit Manager	1	

* The Principal Investigators are Hospital staff. Currently there are 41 IPs with active clinical trials conducted in the clinical trials unit

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit

x Physician **x** Nurse

Unidad de de Ensayos Clínicos Sant Joan de Déu

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameteres)	Yes, the Hospital Lab
The quality assurance activities are subcontracted by the Unit	Data protection confidentiality
Availability of a specific area for drug storing and preparation of medications for the study	yes
The former area or room has restricted access by key or code	yes
Laminar flow chamber availability for preparation of parenteral treatments	No,we use chambers from the pharmacy service
Perfusion pumps for intravenous treatment	yes
Who is the responsible for drug preparation and dispensing	**Dispensing:** research nurses **Preparation**: clinical trials pharmacist
Drug accountability procedures, such as reception, preparation and dispensing forms	yes
SOPs available for drug preparation and dispensing	yes
SOPs available for drawing and managing of biological fluids	yes

System or procedure used for samples identification

Labels provided by the sponsor in the study kits and local lab labels if required. There is an SOP that describes how to identify all biological samples stored in the research unit freezer, with code assignment system.

Availability of a specific area for blood samples managing	yes
The former area or room has restricted access by key or code	yes
Number of centrifuges available	1
System for plasma/fluids samples storing	Freezer (-80º and -20º)
Fridges and freezers available in the Unit	1 fridge, 2 freezers
The Unit has its owned Bioanalytical Department	No, we use the Hospital Department

Unidad de de Ensayos Clínicos Sant Joan de Déu

Services Capabilities

Availability of genotyping or fenotyping methods for participants	Yes, hospital genetic lab
Data Management and software used (describe)	Yes, there is a statistician that provides support to the investigator initiated trials
Biometry or Statistical Analysis and software used (describe)	SPSS, access, excel
Pharmacokinetic Analysis and software used (describe)	Performed in the Hospital lab
Medical Writing and skilled languages	No, we contract CRO services
Owned archives in the same Unit building (describe)	No, external facility that fulfils all the security regulations

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

The ISF, CRFs and all the essential documents as described in our SOPs and ICH. We agree with the sponor the archiving period (usually 15 years)

The study files are digitized and converted in a CD or web format	No
Project management	Yes

Unidad de de Ensayos Clínicos Sant Joan de Déu

Study Participants

Kind of participants included in clinical trials performed in the Unit

Healthy volunteers No Patients Yes

Other populations

If the Unit has experience in oncology, detail kind of tumour and age groups

Solid tumour Haematological tumour Adults yes Pediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

All pediatric tumours

Recruiting methods for healthy volunteers

NA

Recruting methods for patients

Patients from outpatient, inpatient and patients referred from other centers in Spain and other countries

Do you have sugery rooms available for screening (separated from the in-house area)? (number) Yes, 4

Do you keep a paper or electronic database of volunteers? (describe) NA

Have you implemented any measure for avoiding the over-volunteering? (describe) NA

Unidad de de Ensayos Clínicos Sant Joan de Déu

Pharmacodynamic/Pharmacokinetic Capabilities

Digital blood pressure devices (number)	2	Pulsioximetry devices (number)	2	12-leads ECG devices (number)	2

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	-
Availability in the Unit of tests for assessing CNS drug effects	-
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	No, performed by the sponsors
Familiarity with Electronic Data Capture –EDC applied to clinical trials	Yes
Experience in other kind of PD or PK evaluations not formerly collected	-

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

Unidad de de Ensayos Clínicos Sant Joan de Déu

Experience

Number of clinical trials per year and type of study	Year					
Type of study	**2009**	**2010**	**2011**	**2012**	**2013**	**2014**
Bioequivalence						
First single-dose administration in humans						
First multiple-dose administration in humans						
Drug interaction						
Food interaction						
Special populations (Renal or liver impairment, elderly)						
Proof of concept (Phase Ib or I/II)	2	2	2	4	5	10
Own research lines	2	4	5	2	2	1
Others (specificying) Pediatirc trials (from phase II_III)	26	10	17	18	21	22

Number of trials linked to a PEI (IND) submission | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 | 1

Type of drugs (pharmacological group or mechanism of action) tested in the trials performed in the last 4 years

Pediatric investigation plans (PIPs) and own pediatric trials in the following specialties: Anesthesia, Cardiology, Surgery, Dermatology, Endocrinology, Gastroenterology, Hematology, Immunology, Microbiology, Nephrology, Neonates,Neurology, Ophthalmology, Oncology, Pneumology, infectious diseases, Rheumatology, Rehabilitation, Palliative Psychiatry, ICU. Adults: Gynecology and obstetrics, pneumology, psychiatry and cardiolgy

Sponsor typology for Early Stages trials performed in the last 4 years (2011 to 2014)

Number of trials promoted by Spanish companies 0 Number of trials promoted by multinational companies all

Median time for approval by the Ethics Committee and the Spanish Agency for the Early Stages trials 60 days

Number of Early Stages trials performed in the Unit and published in the last 4 years Published by the sponsors

Unidad de Investigación Clínica del Institut Hospital del Mar - IMIM

Ownership

Short CV

Consultant 3, Parc de Salut Mar
Graduate (1979) and Doctor of Pharmacy (1985), University of Barcelona
Post-doctoral studies Department of Clinical Pharmacology. Royal Postgraduate Medical School. Hammersmith Hospital, London, UK.
Specialist in Pharmaceutical Analysis and Drug Monitoring (MINECO, 2003)
Toxicology Professor Pompeu Fabra University (credited as Professor ANECA)
Coordinator of the Human Pharmacology and Clinical Neurosciences Research Group
Director of the Neurosciences Research Program in IMIM
More than 300 international indexed scientific publications related to pharmacology. Index H = 45.

Principal investigator in the past 5 years of the following clinical trials:

- Multicentric, longitudinal study without treatment to assess neurocognitive tests and functional scales to determine cognitive and functional variations in individuals with DS. F.HOFFMAN-LA ROCHE LTD (2012-2013).
- Multicenter, randomized, double-blind, placebo-controlled, Phase 2 trial to assess the efficacy, safety and tolerability of RO5186582 in adults and adolescents with Down syndrome (CLEMATIS) (2014-present)
- Estrogen Receptors beta (ER-B) as therapeutic target for the improvement of cognitive performance in Fragile-X. FRAXA Research Foundation (2012-2103).
- Collaboration agreement between Jérome Lejeune Foundation and Fundació Institut Mar d'Investigacions Mèdiques: "Normalization of Dyrk1A function as therapeutic approach to improve cognitive performance in Down syndrome mental retardation: Epigallocatechin gallate (EGCG) as therapeutic tool". FONDATION JÉRÔME LEJEUNE. (2011-2014).
- Normalization of Dyrk1A and APP function to improve cognitive performance and slow the progression of AD in patients with SD: epigallocatechin gallate as a therapeutic tool. FIS/ISCIII PI11/00744

Unidad de Investigación Clínica del Institut Hospital del Mar - IMIM

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

No. Renovation of accreditation will be asked to Generalitat de Catalunya

Audits by regulatory agencies (last 3 years)

No

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies?

Audits by sponsors (last 3 years)

Yes (2013,2014)

Do you follow your own Standard Operating Procedures (SOPs)? Yes Do you supply with a SOP copy to a sponsor if requested? No

Would you follow the sponsor SOPs if requested: If is a requirement for a specific study

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: 1 each year

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

There is an agreement with Hospital del Mar for specialized care.

There is a specific SOP of the unit of data protection.

Unidad de Investigación Clínica del Institut Hospital del Mar - IMIM

Facilities

Year of Unit building	2005	Last Unit reform	
Usable space	280	The Unit building is separate from the linked hospital	Yes
Number of CTs the unit could perform simultanously	2	Number of beds	12
Beds distribution	1 room with 8 beds and 1 room with 4 beds		
Beds distribution allows a complete and continuous visual control by nurses			Yes
Number of bed with intensive or continuous monitoring	8	Number of armchairs suitable for subject monitoring	12
Owned kitchen	No	Meals supervision by dietitian	Yes
Dining-room available for volunteers	Yes	Individual lockers available for volunteers	Yes
Relaxing room available for volunteers independent from the beds area			Yes
Availability in the unit of an emegency trolly for cardiopulmonary resuscitation			Yes
The emergency trolly has available suitable medications with immediate by controlled access

Unidad de Investigación Clínica del Institut Hospital del Mar - IMIM

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameteres)	Reference Laboratory Catalunya (also responsible for emergency laboratory of Hospital del Mar) UNE -EN ISO 15189
The quality assurance activities are subcontracted by the Unit	No, an specific department exists
Availability of a specific area for drug storing and preparation of medications for the study	Yes
The former area or room has restricted access by key or code	Yes
Laminar flow chamber availability for preparation of parenteral treatments	No
Perfusion pumps for intravenous treatment	Yes
Who is the responsible for drug preparation and dispensing	**Dispensing:** Hospital del Mar pharmacy **Preparation**: Nurses
Drug accountability procedures, such as reception, preparation and dispensing forms	Yes
SOPs available for drug preparation and dispensing	Yes
SOPs available for drawing and managing of biological fluids	Yes
System or procedure used for samples identification	
Self-adhesive labels with plastic coating	
Availability of a specific area for blood samples managing	Yes
The former area or room has restricted access by key or code	No
Number of centrifuges available	2
System for plasma/fluids samples storing	-20ºC Freezer . If necessary, samples are moved to freezer room -40ºC or -80ºC which is 20 meters away

Unidad de Investigación Clínica del Institut Hospital del Mar - IMIM

Services Capabilities

Fridges and freezers available in the Unit	2 fridges, 1 freezer
The Unit has its owned Bioanalytical Department	Yes
Availability of genotyping or fenotyping methods for participants	In the laboratory analysis of the Human Pharmacology and Clinical Neurosciences Research Group
Data Management and software used (describe)	No, subcontracted depending on study and sponsor
Biometry or Statistical Analysis and software used (describe)	Yes, SPSS, SAS.
Pharmacokinetic Analysis and software used (describe)	Excel adapted software
Medical Writing and skilled languages	Yes, in IMIM
Owned archives in the same Unit building (describe)	Yes

Room 20 m^2. Access Control wrench and locked in closets.

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

Source data, Case report forms (CRF), Investigator's Brochure. 15 years

The study files are digitized and converted in a CD or web format	No
Project management	No. Subcontracted depending on sponsor.

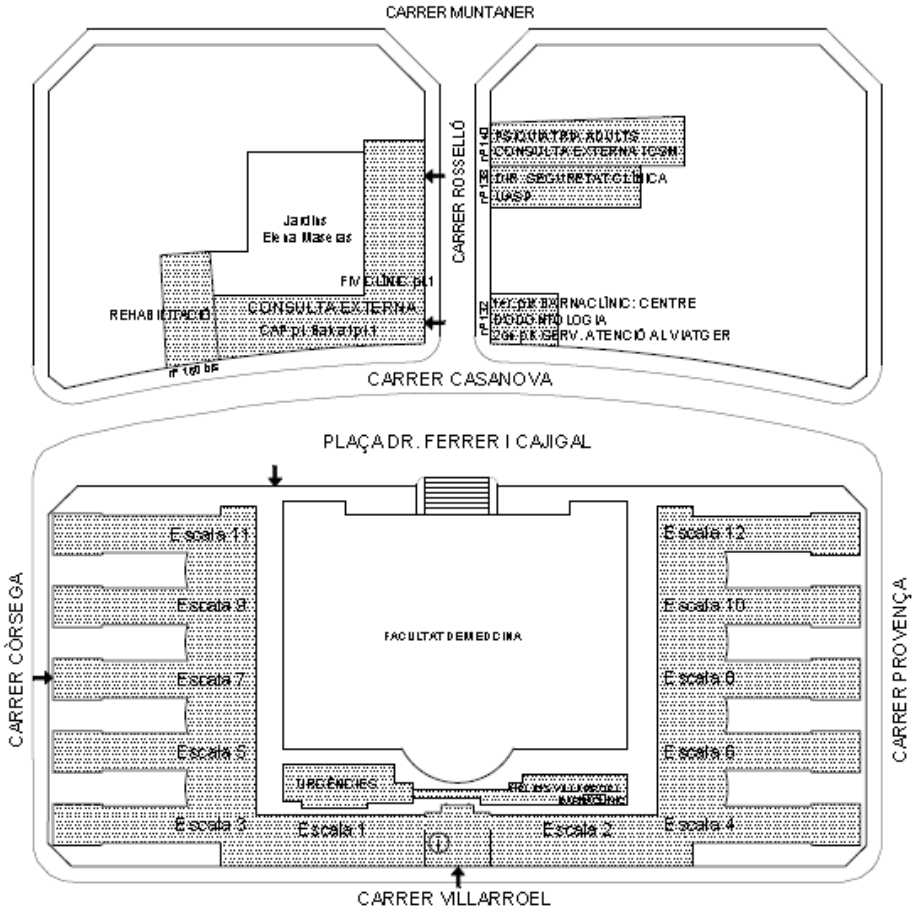
General Information

Who filled in this survey	Laura Vidal
E-mail contact (Phone number)	lvidal@clinic.ub.es
Date of survey filling in	16.01.2015
Unit web address	In process
Formal name of the unit	Investigational Therapy Unit
Postal address	Hospital Clínic de Barcelona Villarroel, 170 street - 08036 Barcelona 3rd floor, 2nd block

Unidad de Investigación de Nuevas Terapias; Inther Unit. Hospital Clínic de Barcelona

Location



Unidad de Investigación de Nuevas Terapias; Inther Unit. Hospital Clínic de Barcelona

Ownership

Ownership	Fundació Clinic per a la Recerca Biomèdica
Established	2008
Linked hospital	Hospital Clínic of Barcelona
Distance between linked hospital and Unit	Same place
Linked Ethics Committee (CEIC)	CEIC Hospital Clínic of Barcelona

Unit Manager

First and last names	Laura Vidal
Qualifications	Doctor
Medical specialty	Oncology
Manager since	2010
E-mail and phone	lvidal@clinic.ub.es

Short CV

Dr Laura Vidal finished his training in Medical Oncology in 2003. She moved to London where she did a fellowship in Clinical Pharmacology at the Royal Marsden Hospital. Her major research was in development therapeutics, particularly in the area of phase I clinical trials for what she was honoured with several awards by the American Society of Clinical Oncology and the American Association of Cancer Research. Particularly, her interest focuses in the development of relevant biological markers which can be predictive of antitumoral benefit for the novel molecular targeted agents. In addition, her subspecialized disease site of expertise is in gynaecologist malignancies. In 2007, she completed a fellowship in the Drug Development Unit at the Princess Margaret Hospital, Toronto, where was involved participating in phase II international clinical trials of newer molecular targeted agents for gynaecological tumors. She was awarded in 2008 with the Novartis Young Canadian Investigator Award for her work on identifying the value to use different preclinical models to determine a safe starting dose for new molecular agents. She is now working as a consultant at the Hospital Clinic, Barcelona in the section of gynecology oncology and coordinating the Clinical trials Unit for Hemato-oncology diseases.

Unidad de Investigación de Nuevas Terapias; Inther Unit. Hospital Clínic de Barcelona

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

No but there is the intention to apply for the accreditation of the Generalitat de Catalunya health department this year 2015

Audits by regulatory agencies (last 3 years)

No

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? **Yes**

Audits by sponsors (last 3 years)

Several. The last one was on 2014.

Do you follow your own Standard Operating Procedures (SOPs)? yes Do you supply with a SOP copy to a sponsor if requested? yes

Would you follow the sponsor SOPs if requested: yes

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: 4

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

Follow up our Standard Operating Procedures (SOPs)

Unidad de Investigación de Nuevas Terapias; Inther Unit. Hospital Clínic de Barcelona

Facilities

Year of Unit building	1906	Last Unit reform	2008
Usable space	130M^2	The Unit building is separate from the linked hospital	No
Number of CTs the unit could perform simultanously	3-5	Number of beds	1
Beds distribution	One room with one bed		
Beds distribution allows a complete and continuous visual control by nurses			yes
Number of bed with intensive or continuous monitoring	1	Number of armchairs suitable for subject monitoring	6
Owned kitchen	yes	Meals supervision by dietitian	yes
Dining-room available for volunteers	NA	Individual lockers available for volunteers	NA
Relaxing room available for volunteers independent from the beds area			NA
Availability in the unit of an emegency trolly for cardiopulmonary resuscitation			Yes
The emergency trolly has available suitable medications with immediate by controlled access			yes
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)	yes		
Unit availability of an evacuation plan for volunteers in emergency situations			yes
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			yes
Volunteers/patients healthcare would be covered by the national or the regional health system if required			yes
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers	30m^2		
Distance and time to get the former services	Same building and same floor		
Unit entrance/Exit door controlled	no	Unit with Closed Circuit Television	no
Availability of an alternate electrical generating set that automatically works in case of a general system failure			yes

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit

x Physician **x** Nurse

Unidad de Investigación de Nuevas Terapias; Inther Unit. Hospital Clínic de Barcelona

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameteres)	yes
The quality assurance activities are subcontracted by the Unit	No, specific quality department
Availability of a specific area for drug storing and preparation of medications for the study	Yes
The former area or room has restricted access by key or code	Yes
Laminar flow chamber availability for preparation of parenteral treatments	Yes
Perfusion pumps for intravenous treatment	Yes
Who is the responsible for drug preparation and dispensing	**Dispensing:** Pharmacy **Preparation**: Pharmacy
Drug accountability procedures, such as reception, preparation and dispensing forms	Yes
SOPs available for drug preparation and dispensing	Yes
SOPs available for drawing and managing of biological fluids	yes

System or procedure used for samples identification : Trial code, patient number (SAP number), date and time

Availability of a specific area for blood samples managing	Yes
The former area or room has restricted access by key or code	No
Number of centrifuges available	2
System for plasma/fluids samples storing	Yes
Fridges and freezers available in the Unit	2 freezer and 1 Fridge
The Unit has its owned Bioanalytical Department	No
Availability of genotyping or fenotyping methods for participants	NA

Unidad de Investigación de Nuevas Terapias; Inther Unit. Hospital Clínic de Barcelona

Services Capabilities

Data Management and software used (describe)	No. The same Hospital.
Biometry or Statistical Analysis and software used (describe)	No. The same Hospital.
Pharmacokinetic Analysis and software used (describe)	No. The same Hospital.
Medical Writing and skilled languages	No
Owned archives in the same Unit building (describe)	Yes

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

15 years

The study files are digitized and converted in a CD or web format	No
Project management	No

Unidad de Investigación de Nuevas Terapias; Inther Unit. Hospital Clínic de Barcelona

Study Participants

Kind of participants included in clinical trials performed in the Unit

Healthy volunteers	x Patients
Other populations	

If the Unit has experience in oncology, detail kind of tumour and age groups

x Solid tumour	x Haematological tumour	x Adults	Pediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

Every kind of Cancer

Recruiting methods for healthy volunteers

NA

Recruting methods for patients

Same patients that have been seeing by the PI-specialist doctor for each patology

Do you have sugery rooms available for screening (separated from the in-house area)? (number)	Yes (2)
Do you keep a paper or electronic database of volunteers? (describe)	NA
Have you implemented any measure for avoiding the over-volunteering? (describe)	NA

Unidad de Investigación de Nuevas Terapias; Inther Unit. Hospital Clínic de Barcelona

Pharmacodynamic/Pharmacokinetic Capabilities

Digital blood pressure devices (number)	Yes (6)	Pulsioximetry devices (number)	Yes (2)	12-leads ECG devices (number)	Yes. 1

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	No
Availability in the Unit of tests for assessing CNS drug effects	
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	No
Familiarity with Electronic Data Capture –EDC applied to clinical trials	Yes
Experience in other kind of PD or PK evaluations not formerly collected	
Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

Ownership

Short CV

Licensed physician

2000 -Barcelona Medical License # 35,823
2010- Clinical Head of the Molecular Therapies Research Unit (Phase I Program) at the Valld´HebronUniversity Hospital. Barcelona, Spain

Education

1994-2000 School of Medicine - Universitat Autònoma de Barcelona. Barcelona, Spain.

1999 Internship at the Body Scanner of the Radiology Department. Vall d'Hebron University Hospital. Barcelona, Spain.
1997/98/99 Several internships at the Internal Medicine Department. Vall d'Hebron University Hospital. Barcelona, Spain.

Certificates

2000-Degree in Medicine and Surgery. Universitat Autònoma de Barcelona. Barcelona, Spain.
2005-Board Certified in Medical Oncology. Spanish Board of Medical Oncology.Hospital, Barcelona, Spain.
2010- Clinical Head of the Molecular Therapies Research Unit (Phase I Program) at the Valld´HebronUniversity Hospital. Barcelona, Spain

Postdoctoral Training

2000-2001 Board examination (Spanish National MIR exam -Medical Internal Resident-). Preparation July 2000 – March 2001. Examination passed in March 2001 with a 312 ranking number (above 95 percentile).
2001-2005 Residency in Medical Oncology. Institut Català d'Oncologia. Hospital Univeritari de Bellvitge. Barcelona, Spain.
2004- Gradute education: Completed the first 2 years of the graduate program in Experimental Medicine at the Universitat de Barcelona. Barcelona, Spain.
2008 Master in Science degree (Diploma Estudios Avanzados/Suficiencia investigadora) by the Universitat de Barcelona. Barcelona, Spain.
2004-2007 ECFMG Certification: October 2005. USMLE Exams (US Medical Licence Exam): Step 1, December 2004; Step 2 CK, February 2005; Step 2 CS May 2005. Step 3. October 2007.
2005-2007 Advanced Oncology Drug Development Fellowship Program: Clinical research fellow at The Institute for Drug Development, Cancer Therapy and Research Center, and the University of Texas Health Science Center. San Antonio, Texas, USA.
2007-2008 Senior Clinical Research Fellow, Investigational Cancer Therapeutics, U.T. MD Anderson, Houston, Texas, USA.
2007-2008 Internship at the Kleberg Center for Molecular Markers (Director: Gordon B. Mills, M.D., Ph.D.) at MD Anderson Cancer Center. Houston, Texas, USA.

Positions and Appointments

2008- Attending physician. Member of the Phase I Unit and the CentralNervous System tumors program at the Vall d´Hebron University

Unidad de Ensayos Clínicos Fase I de Oncología Médica– Hospital Vall d´Hebron

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

no

Audits by regulatory agencies (last 3 years)

Yes (FDA) 2012,2015

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? **no**

Audits by sponsors (last 3 years) yes

Do you follow your own Standard Operating Procedures (SOPs)?	yes	Do you supply with a SOP copy to a sponsor if requested?	No (partially only)
Would you follow the sponsor SOPs if requested:	yes		

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: 4-5 per year

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

We work under the spanish and local laws that guarantee patient's safety and confidentiality of patients that participate in a trial in Vall Hebron . Medical reports are protected in the electronic chart of the hospital that is validated. All the staff involved in clinical trials are also keeping this confidentiality following the SOPs and GCPs

General Information

Who filled in this survey	María de los Ángeles Pena Pardo
E-mail contact (Phone number)	pena_marpar@gva.es (+34 965913868)
Date of survey filling in	5-May-2015
Unit web address	http://ueca.comuf.com
Formal name of the unit	UNIDAD DE ENSAYOS CLINICOS DE ALICANTE (UECA) Clinical Trials Unit of Alicante
Postal address	HOSPITAL GENERAL UNIVERSITARIO DE ALICANTE C/ PINTOR BAEZA, 12 EDIF. GRIS 6ª PLANTA 03010 Alicante. Telephone and fax: +34-965-913975

Unidad de Ensayos Clínicos de Alicante (UECA)

Location

For additional information about access and public transportation: http://alicante.san.gva.es/

Unidad de Ensayos Clínicos de Alicante (UECA)

Ownership

Ownership	Public- Clinical Pharmacology
Established	2010 in HGUA (before, 2000-2009, this Unit was located at Miguel Hernandez University, campus ofl San Juan, in Alicante)
Linked hospital	General University Hospital Alicante
Distance between linked hospital and Unit	0 (same location)
Linked Ethics Committee (CEIC)	CEIC del Hospital General Universitario de Alicante

Unit Manager

First and last names	José Francisco Horga de la Parte
Qualifications	MD, PhD
Medical specialty	Clinical pharmacology
Manager since	2000
E-mail and phone	horga_jos@gva.es +34 965913868

Short CV

Academic

- Medicine degree
- PhD in Medicine

Profesional Experience

- Professor in pharmacology of the University Miguel Hernández
- Director of Dep. of Pharmacology, Pediatry and Organic Chemistry, UMH
- Head of Clinical Pharmacology Unit in HGUA

Research experience

- Member of different research groups
- Member of different Ethics Committees at the Alicante province
- Member of assessors for observational and prospective post-authorized studies of the regions' administration (Conselleria Valenciana de Sanitat)
- Member of the Scientific Committee for Research of the regions' administration

Unidad de Ensayos Clínicos de Alicante (UECA)

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

The Unit received (in April, 2013) the favourable evaluation result by the Health Inspection Service (Department of Health of Generalitat Valenciana, Spain).

Audits by regulatory agencies (last 3 years)

None

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? **YES**

Audits by sponsors (last 3 years)

5 may 2012; 3 july 2013

Do you follow your own Standard Operating Procedures (SOPs)? **YES** Do you supply with a SOP copy to a sponsor if requested? **YES**

Would you follow the sponsor SOPs if requested: **YES**, if there are not major conflicts with the Unit SOPs

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial:
1 general audits and 1 audit after each finalized trial

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:
All the studies files are archived under key. Electronic data are stored at one computer devoted specifically to that. There are automated backups that are also archived in a different place.

Unidad de Ensayos Clínicos de Alicante (UECA)

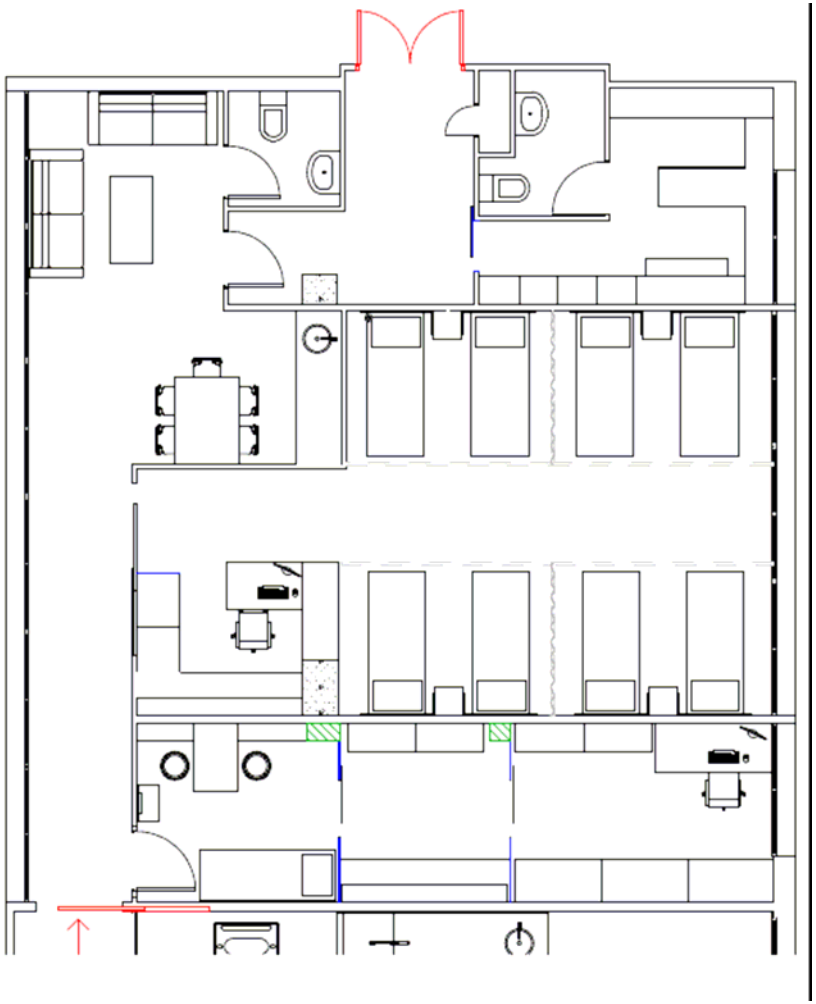
Facilities

Year of Unit building	1972	Last Unit reform	2009-10
Usable space	116 m^2	The Unit building is separate from the linked hospital	NO
Number of CTs the unit could perform simultaneously	2	Number of beds	8
Beds distribution	1 room with 8 beds with possible divisions in pairs		
Beds distribution allows a complete and continuous visual control by nurses			YES
Number of beds with intensive or continuous monitoring	2	Number of armchairs suitable for subject monitoring	2
Owned kitchen	NO	Meals supervision by dietitian	YES
Dining-room available for volunteers	YES	Individual lockers available for volunteers	YES
Relaxing room available for volunteers independent from the beds area			YES
Availability in the unit of an emergency trolley for cardiopulmonary resuscitation			YES
The emergency trolley has available suitable medications with immediate by controlled access			YES
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)	Advanced Life Support		
Unit availability of an evacuation plan for volunteers in emergency situations			YES
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			YES
Volunteers/patients healthcare would be covered by the national or the regional health system if required			YES
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers	Emergencies, ICU of the HGUA. SAMU/Emergecies staff:physicians and nurses within the UECA.		
Distance and time to get the former services	Located in the same hospital (200 m and 5 min)		
Unit entrance/Exit door controlled	YES	Unit with Closed Circuit Television	NO
Availability of an alternate electrical generating set that automatically works in case of a general system failure			YES

Unidad de Ensayos Clínicos de Alicante (UECA)

Facilities

Unit distribution plan:



Unidad de Ensayos Clínicos de Alicante (UECA)

Staffing and Resources

Unit employees

Permanent staff 4 Fixed-term/contracted staff (internship, grant holders) 1 Part-time collaborators 12

Distribution of Unit staff by functions

Function	Permanent staff	Contracted or part-time staff
Principal Investigator	4	
Co-investigator (physician)	4	5
Nurse		7
Monitor or CRA		1
Pharmacist		1
Biometry	4	
Data management	4	1
Medical writing	4	1
Pharmacokinetics	4	
Quality assurance		1
Project Management	4	1
Finance	4	1
Recruitment	4	1
IT (informatics)	1	
Other (specify): CTA, psychologist, etc		

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit

X Physician X Nurse

Unidad de Ensayos Clínicos de Alicante (UECA)

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameters)	General Hospital of Alicante Laboratory (Rule ISO9001-2008)
The quality assurance activities are subcontracted by the Unit	YES, Foundation FISABIO
Availability of a specific area for drug storing and preparation of medications for the study	YES
The former area or room has restricted access by key or code	YES
Laminar flow chamber availability for preparation of parenteral treatments	NO
Perfusion pumps for intravenous treatment	YES
Who is the responsible for drug preparation and dispensing	**Dispensing:** Clinical Pharmacologist **Preparation**: Farmacy Service
Drug accountability procedures, such as reception, preparation and dispensing forms	YES
SOPs available for drug preparation and dispensing	YES
SOPs available for drawing and managing of biological fluids	YES
System or procedure used for samples identification	Tubes labels
Availability of a specific area for blood samples managing	YES
The former area or room has restricted access by key or code	YES
Number of centrifuges available	2 refrigerated
System for plasma/fluids samples storing	Tubes for freezing (cryovirals)
Fridges and freezers available in the Unit	2 fridges and 4 freezers
The Unit has its owned Bioanalytical Department	NO
Availability of genotyping or fenotyping methods for participants	

Unidad de Ensayos Clínicos de Alicante (UECA)

Services Capabilities

Data Management and software used	YES, Software: Excel and Access
Biometry or Statistical Analysis and software used	YES, Software: SPSS
Pharmacokinetic Analysis and software used	YES
Software WinNonlin	
Medical Writing and skilled languages	YES, Spanish and English
Owned archives in the same Unit building	YES
Fireproof cabinets in locked area with key access	
Regarding a specific clinical trial what documents are sent to the archives and for long time are archived	
All the study files on paper (from the initial project to close monitoring) are archived. Digitised copies for pharmacokinetic data and clinical data (keeping confidentiality of the subjects) are also stored according to the time set by law	
The study files are digitised and converted in a CD or web format	YES
Project management	YES

Unidad de Ensayos Clínicos de Alicante (UECA)

Study Participants

Kind of participants included in clinical trials performed in the Unit

X Healthy volunteers X Patients

Other populations

If the Unit has experience in oncology, detail kind of tumour and age groups

- Solid tumour - Haematological tumour - Adults - Paediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

Recruiting methods for healthy volunteers

Students recruited from the linked University by means of advertisements

Recruiting methods for patients

Collaboration with the suitable hospital services and Primary Care centers

Do you have surgery rooms available for screening (separated from the in-house area)? YES, 1 room

Do you keep a paper or electronic database of volunteers? NO

Have you implemented any measure for avoiding the over-volunteering? YES

Subjects' participation restricted to a limited number of clinical trials per year.

* The UECA is the only Unit that performs phase I studies in healthy volunteers in Valencia Autonomous Community. Others units of studies in early phases in Valencian Community only conduct studies in patients.

Unidad de Ensayos Clínicos de Alicante (UECA)

Pharmacodynamic / Pharmacokinetic Capabilities

Digital blood pressure devices	YES, 9	Pulsioximetry devices	YES, 2	12-leads ECG devices	YES, 3

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	YES
Availability in the Unit of tests for assessing CNS drug effects	NO
Familiarity in poblational analysis and PK/PD modelling, including writing of clinical reports	NO
Familiarity with Electronic Data Capture –EDC applied to clinical trials	YES
Experience in other kind of PD or PK evaluations not formerly collected	NO

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

-

Unidad de Ensayos Clínicos de Alicante (UECA)

Experience

Number of clinical trials per year and type of study	Year					
Type of study	**2009**	**2010**	**2011**	**2012**	**2013**	**2014**
Bioequivalence				1	2	2
First single-dose administration in humans						
First multiple-dose administration in humans						
Drug interaction						
Food interaction						
Special populations (Renal or liver impairment, elderly)						
Proof of concept (Phase Ib or I/II)			1			1
Own research lines						5
Others (specifying)			2	3	2	2

Number of trials linked to a PEI (IND) submission | 2009 | 0 | 2010 | 0 | 2011 | 0 | 2012 | 0 | 2013 | 0 | 2014 | 0

Type of drugs (pharmacological group or mechanism of action) tested in the trials performed in the last 4 years

Opioids; fluids; digestive system: bile acids and antivirals; cardiovascular system: antihypertensives, cholesterol-lowering drugs; anti-canceR drugsr; analgesic-anesthetic.

Sponsor typology for Early Stages trials performed in the last 4 years (2011 to 2014)

Number of trials promoted by Spanish companies 2 Number of trials promoted by multinational companies 3

Median time for approval by the Ethics Committee and the Spanish Agency for the Early Stages trials 60 days

Number of Early Stages trials performed in the Unit and published in the last 4 years 1

Linked hospital	Hematology and Oncology Dept. (HCUV)
Distance between linked hospital and Unit	Same location
Linked Ethics Committee (CEIC)	CEIC HCUV

Unit Manager

First and last names	Andrés Cervantes Ruipérez
Qualifications	Doctor
Medical specialty	Medical Oncology
Manager since	01/01/2004
E-mail and phone	Andres.cervantes@uv.es 626 858 757

Short CV

Education

Bachelor of Medicine by the Universidad de Murcia on June 20, 1980
MD specialized in Medical Oncology by the Universidad de Valencia on February 28, 1986
PhD in Medicine by the Universidad de Valencia on June, 1987

Current Professional Status

Professor at the Universidad de Valencia
Head of Section - Hematology and Medical Oncology, Hospital Clínico Universitario de Valencia
Responsible of the Hematology and Oncology Clinical Trials Unit of the Hospital Clínico Universitario de Valencia

Experience as Investigator

Research Projects: Principal Investigator of four Research Projects. He has also participated as a collaborator investigator in other projects.

Clinical Trials: Principal Investigator in 120 clinical trials, thirty of them being Phase I clinical trials.

Publications: Co-author of 48 international articles and 13 national articles (1st author: 14 international articles and 7 national articles)

Doctoral theses: Director of 6 doctoral theses.

Unidad de Ensayos Clínicos Fase I de Hematología y Oncología Médica de INCLIVA

Accreditations and audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

NO

Audits by regulatory agencies (last 3 years)

NO

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? **YES**

Audits by sponsors (last 3 years)

NO

Do you follow your own Standard Operating Procedures (SOPs)? YES Do you supply with a SOP copy to a sponsor if requested? YES

Would you follow the sponsor SOPs if requested: -

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: -

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

Confidentiality is granted with the patient information sheet and the consent form. A specific folder with all base documents relative to the patient is used during his participation in the clinical trial. When his participation is over, this folder is transfered to the patient's medical record.

Unidad de Ensayos Clínicos Fase I de Hematología y Oncología Médica de INCLIVA

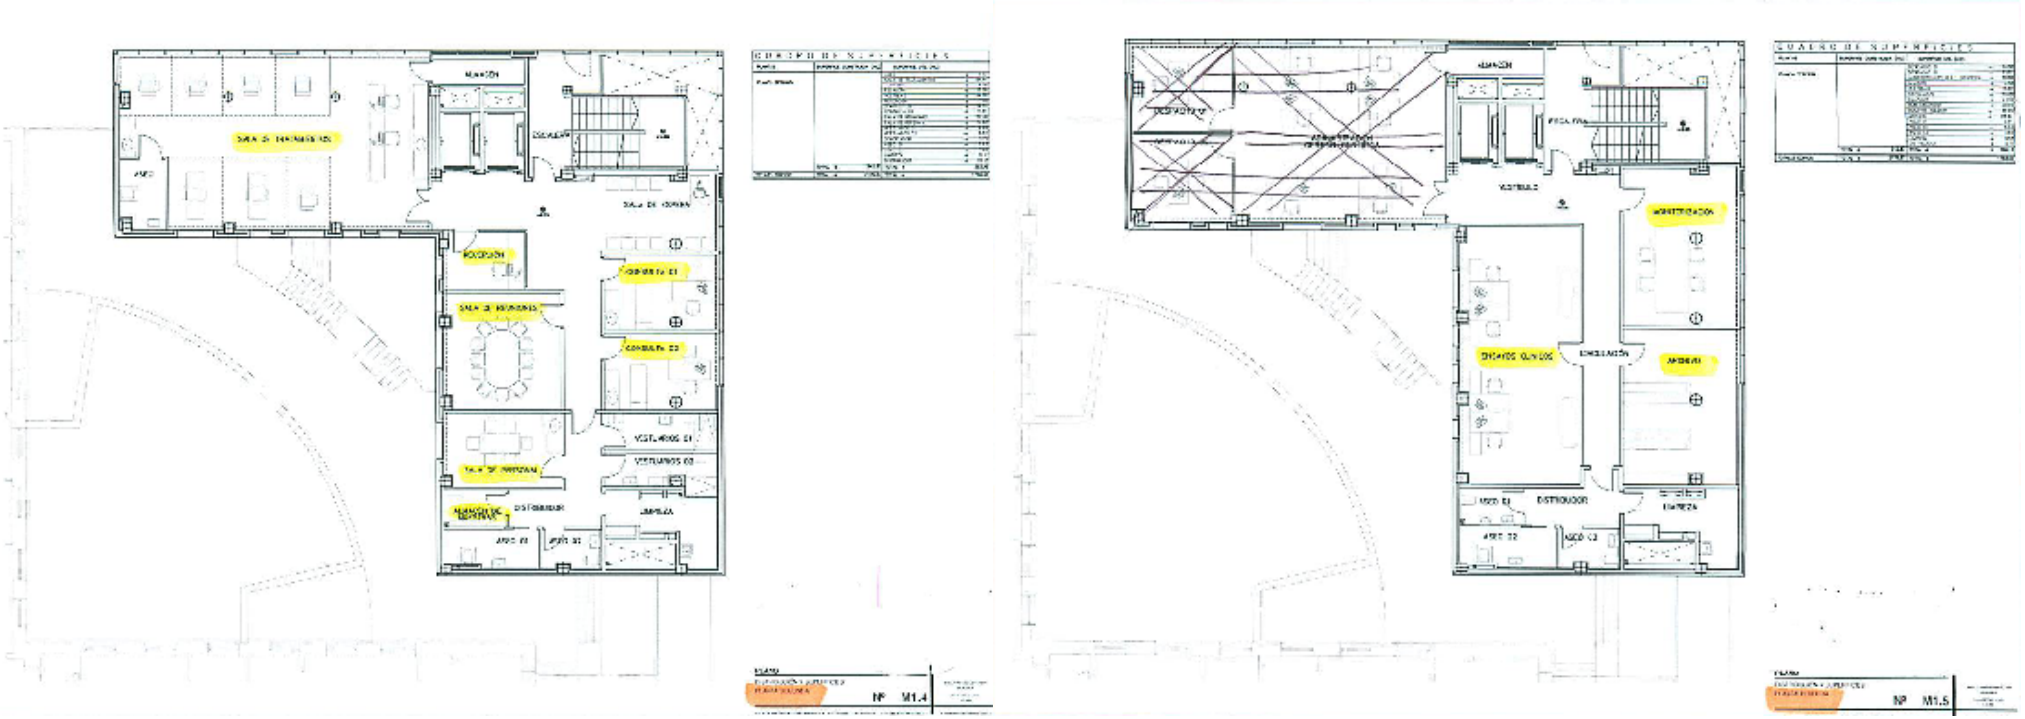
Facilities

Year of Unit building	2013	Last Unit reform	-
Usable space	377.84m^2	The Unit building is separate from the linked hospital	YES
Number of CTs the unit could perform simultanously	15	Number of beds	2
Beds distribution	Oncology Day Hospital is an Unit that has two beds and five armchairs		
Beds distribution allows a complete and continuous visual control by nurses			YES
Number of bed with intensive or continuous monitoring	ALL BEDS AND ARMCHAIRS	Number of armchairs suitable for subject monitoring	5
Owned kitchen	NO	Meals supervision by dietitian	YES
Dining-room available for volunteers	NO	Individual lockers available for volunteers	NO
Relaxing room available for volunteers independent from the beds area			NO
Availability in the unit of an emegency trolly for cardiopulmonary resuscitation			YES
The emergency trolly has available suitable medications with immediate by controlled access			YES
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)	ADVANCED LS		
Unit availability of an evacuation plan for volunteers in emergency situations			YES
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			YES
Volunteers/patients healthcare would be covered by the national or the regional health system if required			YES
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers	Anesthesia and resuscitation Department		
Distance and time to get the former services	50 m, in the Hospital		
Unit entrance/Exit door controlled	YES	Unit with Closed Circuit Television	NO
Availability of an alternate electrical generating set that automatically works in case of a general system failure			YES

Unidad de Ensayos Clínicos Fase I de Hematología y Oncología Médica de INCLIVA

Facilities

Unit distribution plan



Unidad de Ensayos Clínicos Fase I de Hematología y Oncología Médica de INCLIVA

Staffing and Resources

Unit employees

Permanent staff 13 Fixed-term/contracted staff (internship, grant holders) Part-time collaborators

Distribution of Unit staff by functions

Function	Permanent staff	Contracted or part-time staff
Principal Investigator	1	
Co-investigator (physician)	4	
Nurse	2	
Monitor or CRA	-	
Pharmacist	2	
Biometry	-	
Data management	1	
Medical writing	-	
Pharmacokinetics	-	
Quality assurance	-	
Project Management	3	
Finance	-	
Recruitment	-	
IT (informatics)	-	
Other (specify): CTA, psychologist, etc	-	

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit
The are no volunteers

Physician Nurse

Unidad de Ensayos Clínicos Fase I de Hematología y Oncología Médica de INCLIVA

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameteres)	Central Laboratory Hospital
The quality assurance activities are subcontracted by the Unit	NO
Availability of a specific area for drug storing and preparation of medications for the study	NO, it is the Hospital's Pharmacy
The former area or room has restricted access by key or code	NO
Laminar flow chamber availability for preparation of parenteral treatments	YES
Perfusion pumps for intravenous treatment	YES
Who is the responsible for drug preparation and dispensing	**Dispensing:** Two pharmacists dedicated to clinical trials located in the Hospital's Pharmacy **Preparation**: Two pharmacists dedicated to clinical trials located in the Hospital's Pharmacy
Drug accountability procedures, such as reception, preparation and dispensing forms	YES
SOPs available for drug preparation and dispensing	YES
SOPs available for drawing and managing of biological fluids	YES
System or procedure used for samples identification	
Identificative tags issued by the sponsor or the institution	
Availability of a specific area for blood samples managing	YES
The former area or room has restricted access by key or code	NO
Number of centrifuges available	1
System for plasma/fluids samples storing	FREEZER -80º
Fridges and freezers available in the Unit	1 FRIDGE AND 2 FREEZERS
The Unit has its owned Bioanalytical Department	NO
Availability of genotyping or fenotyping methods for participants	NO

Unidad de Ensayos Clínicos Fase I de Hematología y Oncología Médica de INCLIVA

Services Capabilities

Data Management and software used (describe)	NO
Biometry or Statistical Analysis and software used (describe)	NO
Pharmacokinetic Analysis and software used (describe)	NO
Medical Writing and skilled languages	NO
Owned archives in the same Unit building (describe)	Located in the third floor of INCLIVA, which is access with a key only by the clinical trial personnel.

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

It's send to an external archive for 15 years

The study files are digitized and converted in a CD or web format	NO
Project management	YES

Unidad de Ensayos Clínicos Fase I de Hematología y Oncología Médica de INCLIVA

Study Participants

Kind of participants included in clinical trials performed in the Unit

- Healthy volunteers — X Patients
- Other populations

If the Unit has experience in oncology, detail kind of tumour and age groups

X Solid tumour — X Haematological tumour — X Adults — Pediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

All

Recruiting methods for healthy volunteers

There are no volunteers

Recruting methods for patients

Refered by oncology specialist from the same department

Do you have sugery rooms available for screening (separated from the in-house area)? (number)	YES, 2
Do you keep a paper or electronic database of volunteers? (describe)	-
Have you implemented any measure for avoiding the over-volunteering? (describe)	-

Unidad de Ensayos Clínicos Fase I de Hematología y Oncología Médica de INCLIVA

Pharmacodynamic/Pharmacokinetic Capabilities

Digital blood pressure devices (number)	YES, 6	Pulsioximetry devices (number)	YES, 8	12-leads ECG devices (number)	YES, 4

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	YES
Availability in the Unit of tests for assessing CNS drug effects	-
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	-
Familiarity with Electronic Data Capture –EDC applied to clinical trials	YES
Experience in other kind of PD or PK evaluations not formerly collected	-

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted:

Código: 20040235. TItulo: ESTUDIO ABIERTO MULTICENTRICO DE BUSQUEDA DE DOSIS PARA EVALUAR LA SEGURIDAD Y TOLERABILIDAD DEL AMG 706, PANITUUMAB. Y LA COMBINACION DE AMG 706 Y PANITUMUMAB CUANDO SON ADMINISTRADOS CON QT DE INDUCCION Y/O QUIMIORRADITERAPIA EN SUJETOS CON CARCINOMA DE CELULAS ESCAMOSA DE CABEZA Y CUELLO LOCOREGIONAL AVANZADO.
Promotor: AMGEN
Año de Inicio: 2006 Año de Cierre: 2011

Código: C14002. TItulo: ENSAYO EN FASE I, CLÍNICO Y FARMACODINAMICO, DE MLN8237, UN NOVEDOSO INHIBIDOR DE LA AURORA A CINASA, EN PACIENTES CON PROCESOS MALIGNOS AVANZADOS, VERSIÓN ORIGINAL, 14 FEB 2007
Promotor: MILLENNIUM PHARMACEUTICALS, INC
Año de Inicio: 2007 Año de Cierre: 2011

Código: MK 8669-004. TItulo: ESTUDIO EN FASE I DE MK-8669 (DEFOROLIMUS) EN COMBINACION CON MK-0646 (IGF-1R ANTICUERPOS MONOCLONALES EN PACIENTES CON CANCER AVANZADO
Promotor: MERCK SHARP & DOHME ESPAÑA S.A.
Año de Inicio: 2008 Año de Cierre: 2011

Unidad de Ensayos Clínicos Fase I de Hematología y Oncología Médica de INCLIVA

Pharmacodynamic/Pharmacokinetic Capabilities

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

Código: BO21495. TItulo: "Estudio de fase I/II multicéntrico, abierto, de escalada de dosis, para evaluar la seguridad, farmacocinética y actividad de RO5083945, un anticuerpo glico-modificado anti-EGFR, en pacientes con tumores sólidos malignos metastáticos y/o localmente avanzados EGFR+."
Promotor: ROCHE
Año de Inicio: 2008 Año de Cierre: 2011

Código: MK 0646-013. TItulo: ESTUDIO PARA ESTABLECER PRUEBA DE CONCEPTO BIOLOGICO DE MK-0646 EN EL CANCER DE MAMA
Promotor: MERCK SHARP & DOHME ESPAÑA S.A.
Año de Inicio: 2008 Año de Cierre: 2011

Código: 1200.70. TItulo: ENSAYO CLÍNICO ABIERTO DE FASE IB, CON TRATAMIENTO CONTINUO UNA VEZ AL DIA VIA ORAL CON BIBW 2992 Y SIROLIMUS (RAPAMUNE ®) EN PACIENTES CON CARCINOMA NO MICROCITICO DE PULMÓN CON UNA MUTACIÓN DE EGFR Y/O CON ENFERMEDAD EN PROGRESIÓN TRAS ERLOTINIB (TARCEVA®)
Promotor: BOEHRINGER INGELHEIM ESPAÑA.S.A.
Año de Inicio: 2009 Año de Cierre: 2013

Código: 20070411. TItulo: ESTUDIO ABIERTO DE FASE 1B/2 CON ESCALADA DE DOSIS DE AMG655 EN COMBINACIÓN CON AMG479 EN SUJETOS CON TUMORES SÓLIDOS REFRACTARIOS Y AVANZADOS
Promotor: AMGEN
Año de Inicio: 2009 Año de Cierre: 2012

Código: ALN-VSP02-001. TItulo: A MULTI-CENTER, OPEN LABEL PHASE 1 DOSE-ESCALATION TRIAL TO EVALUATE THE SAFETY, TOLERABILITY, PHARMACOKINETICS AND PHARMACODYNAMICS OF INTRAVENOUS ALN-VSP02 EN PATIENTS WITH ADVANCED SOLID TUMORS WITH LIVER INVOLVEMENT.
Promotor: ALNYLAM PHARMACEUTICALS INC
Año de Inicio: 2010 Año de Cierre: 2011

General Information

Who filled in this survey	JAVIER MILARA PAYÁ
E-mail contact (Phone number)	xmilara@hotmail.com / ceicvalencia_hgv@gva.es
Date of survey filling in	19-05-2015
Unit web address	
Formal name of the unit	Clinical Research Unit. Research Foundation of University General Hospital Consortium
Postal address	Hospital Clínico Universitario de Valencia AVENIDA TRES CRUCES Nº 2, Consorcio HOSPITAL General de Valencia, Unidad de Investigación Clínica, Pabellón B, D-2-4, 2ª PLANTA, VALENCIA, SPAIN. CP: 46014

Unidad de Investigación Clínica del Consorcio Hospital General Universitario de Valencia

Location

The Clinical Research Unit of the University General Hospital Consortium of Valencia (CHGUV) is located in the Av.DE LES TRES CREUS (Av. tres cruces) nº2, in the second floor, Pabillion B, D2-4 section of the CHGUV, Valencia,Spain. Postal code: 46014.

Unidad de Investigación Clínica del Consorcio Hospital General Universitario de Valencia

Ownership

Ownership	Public - Research foundation of the University General Hospital of Valencia
Established	2011
Linked hospital	University Consortium General Hospital of Valencia, Spain
Distance between linked hospital and Unit	The Clinical Research Unit is integrated into the University Consortium General Hospital of Valencia
Linked Ethics Committee (CEIC)	CEIC of the University Consortium General Hospital of Valencia

Unit Manager

First and last names	Julio Cortijo Gimeno
Qualifications	Full professor of pharmacology, PhD, PharmD
Medical specialty	Pharmacology
Manager since	2011
E-mail and phone	julio.cortijo@uv.es

Short CV

- Head of Unit of Teaching and Research and Chief of Research Foundation of the University General Hospital of Valencia. HGUV consortium.
- Doctor of Pharmacy from University of Valencia. Professor at the University of Valencia, Department of Pharmacology, Faculty of Medicine and Dentistry.
- His scientific work has been awarded with the Galien Award in Pharmacology Research; with the University-Society Award; with the Upiohn-Spanish Society of Pharmacology Award; National Prize of the V Military Hospital, Valencia; National Young Investigator Award from the Spanish Society of Pharmacology; the award M.I. Official College of Pharmacists of Valencia and the prize of the Royal Academic of Medicine and Surgery of Valencia, in five contests.
- He is member of the Spanish Society of Pharmacology, the Spanish Respiratory Society and the British Pharmacological Society and academic corresposal of the Royal Academy of Medicine of Valencia and the Royal National Academy of Pharmacy.
- He has more than 200 indexed publication with more than 500 cumulative impact factor and H index higher than 30.

Unidad de Investigación Clínica del Consorcio Hospital General Universitario de Valencia

Accreditations and audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

An official accreditation is spected by the General Directorate of Pharmacy and Health Products of the Valencian community, Spain.

Audits by regulatory agencies (last 3 years)

- May 2014: Pharmaceutical Inspection of Sanitary Services Department of Health. Territorial delegation Valencian

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? YES

Audits by sponsors (last 3 years)

June 2014: AUDIT Amgen Inc.

Do you follow your own Standard Operating Procedures (SOPs)? YES Do you supply with a SOP copy to a sponsor if requested? YES

Would you follow the sponsor SOPs if requested: YES

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: **2**

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:
The Clinical Research Unit has a Standard Operating Procedures (SOPs) developed by those responsible for it and known to the rest of the staff working in the studies. The SOPs are written for all operations that make up the conduct of a clinical trial, providing researchers, research assistants and monitors the exact instructions of activity in different areas of competence description. All persons involved in any of the activities of the UIC must know the SOPs and commit to comply.

Unidad de Investigación Clínica del Consorcio Hospital General Universitario de Valencia

Accreditations and audits

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data (cont.):

Group 4 of the working procedures of the SOPs covers all the activities undertaken with participant subjects, their security and confidentiality of their data following the requirements of Law 15/1999, of 13 December, data protection character staff. All actions involving trial subjects shall conform to the recommendations of the Declaration of Helsinki, including its latest update.
Safety of subjects: direct and continuous supervision of volunteers during the time they remain admitted to the unit, the unit has security cameras connected to the area of supervision of medical staff. Access to the locked unit delimited.
Data security: log files and access keys. CRF and medical records on file with limited access. All computer equipment under safety standards with access by key hospital and periodic backups according PNT's.
The UIC will have a database with all the volunteers who have expressed their desire to participate in further studies or who have participated in previous studies. This list personal data and contact information are included. The subjects entered in the database of interested volunteers accept having read and understood how to proceed with the processing of data. Treatment, communication and transfer of personal data from all participating subjects, shall comply with the provisions of the legislation on protection of personal data. According to the provisions of the above legislation, subjects can exercise the rights of access, modification, opposition and cancellation of data.

Unidad de Investigación Clínica del Consorcio Hospital General Universitario de Valencia

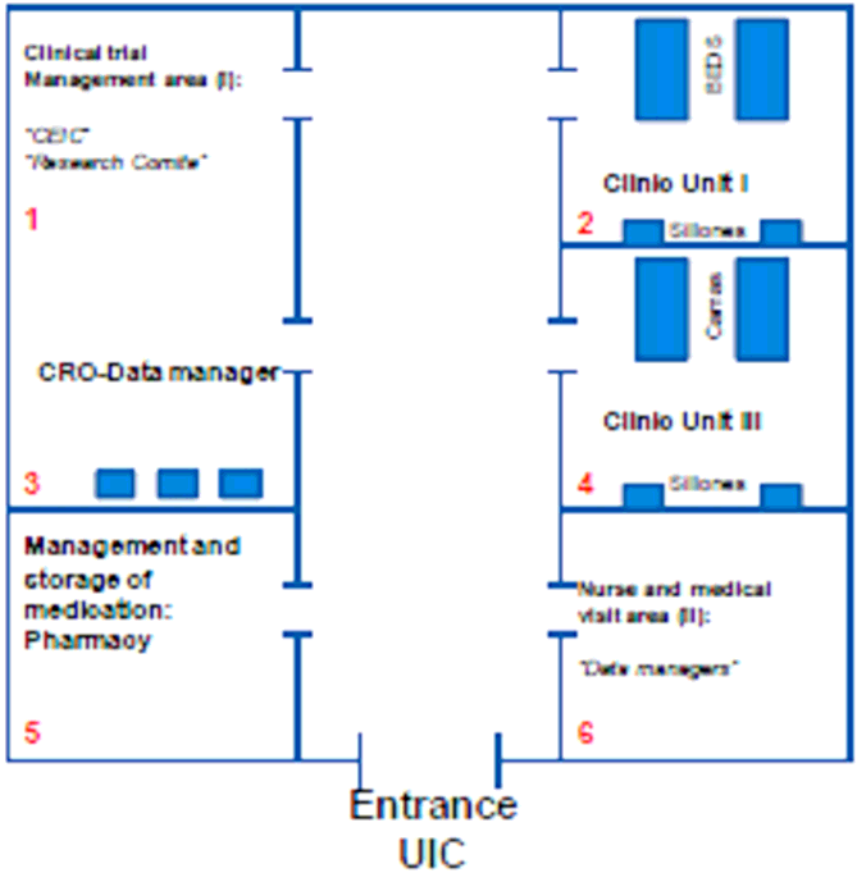
Facilities

Year of Unit building	1962	Last Unit reform	2011
Usable space	2350 m^2	The Unit building is separate from the linked hospital	NO
Number of CTs the unit could perform simultaneously	3	Number of beds	4
Beds distribution	1 room with 4 beds and another room with 8 treatment chairs		
Beds distribution allows a complete and continuous visual control by nurses			YES
Number of bed with intensive or continuous monitoring	4	Number of armchairs suitable for subject monitoring	8
Owned kitchen	YES	Meals supervision by dietitian	YES
Dining-room available for volunteers	YES	Individual lockers available for volunteers	YES
Relaxing room available for volunteers independent from the beds area			YES
Availability in the unit of an emergency trolley for cardiopulmonary resuscitation			YES
The emergency trolley has available suitable medications with immediate by controlled access			YES
The medical and paramedical staff are trained and skilled to provide			Advanced Life Support
Unit availability of an evacuation plan for volunteers in emergency situations			YES
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			YES
Volunteers/patients healthcare would be covered by the national or the regional health system if required			YES
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers			Intensive Care Unit
Distance and time to get the former services	100 metres, 2 minutes walking		
Unit entrance/Exit door controlled	YES, Locked glass door	Unit with Closed Circuit Television	YES
Availability of an alternate electrical generating set that automatically works in case of a general system failure			YES

Unidad de Investigación Clínica del Consorcio Hospital General Universitario de Valencia

Facilities

Unit distribution plan



1. **Clinical trial Management area:** management documentation of CEIC and Clinical Research Committee; file reports and communications, testing and billing documents. Paper and computer processing of contracts between promoters, management and principal investigator.

2, 3 y 4. **Clinical Units:** Clinical Trial areas conducting Phase I to III, equipped with beds, monitoring equipment, emergency equipments, making medical gases, armchairs for drug administration, collection of biological samples etc ..

5. **Management and storage of medication: Pharmacy:** area with a fridge and freezer with computerized temperature control. Lockers for storing oral and intravenous medication. Lockers for archiving and documentation relating to Clinical trial Pharmacy Service.

6. **Nurse and medical visit area:** clinical data management concerning the initiation, inclusion, exclusion and monitoring and termination of Clinical Trials.

Unidad de Investigación Clínica del Consorcio Hospital General Universitario de Valencia

Staffing and Resources

Unit employees

Permanent staff 6 Fixed-term/contracted staff (internship, grant holders) 4 Part-time collaborators 15

Distribution of Unit staff by functions

Function	Permanent staff	Contracted or part-time staff
Principal Investigator	1	
Co-investigator (physician)	15	10
Nurse	2	
Monitor or CRA	1	2
Pharmacist	1	1
Biometry	1	
Data management	4	
Medical writing	1	
Pharmacokinetics	1	
Quality assurance	1	
Project Management	1	
Finance	1	
Recruitment	1	
IT (informatics)	1	
Other (specify)		

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit

X Physician X Nurse

Unidad de Investigación Clínica del Consorcio Hospital General Universitario de Valencia

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameters)	YES

Certification of the Spanish Society of Hematology and Hemotherapy (AEHH, PEEC-H), Certification Committee for Quality Assurance and Accreditation of Laboratory of the Spanish Society of Clinical Biochemistry and Molecular Pathology (SEQC)

The quality assurance activities are subcontracted by the Unit	NO
Availability of a specific area for drug storing and preparation of medications for the study	YES
The former area or room has restricted access by key or code	YES
Laminar flow chamber availability for preparation of parenteral treatments	YES
Perfusion pumps for intravenous treatment	YES
Who is the responsible for drug preparation and dispensing	**Dispensing:** HOSPITAL PHARMACIST AND NURSE **Preparation**: HOSPITAL PHARMACIST
Drug accountability procedures, such as reception, preparation and dispensing forms	YES
SOPs available for drug preparation and dispensing	YES
SOPs available for drawing and managing of biological fluids	YES

System or procedure used for samples identification

To avoid confusion, all tubes in which the blood (or other biological sample) obtained in each extraction is collected will be marked with an identification of the study in question, with the number of volunteer, time that corresponds to the sample and, if appropriate, with a key number that matches the key number that identifies the pipe where serum or plasma is stored. The latter is indicated only if the samples to be analyzed are sending with a blinded key.
All tubes will be placed in racks properly labeled and identified by the number of volunteers to which they relate. All material collection of biological samples will be labeled and identified in the manner appropriate to each case. All tubes will be left prepared the day before the test day. Samples must be stored in freezers at -20 ° C or -80 ° C in the UIC.

Unidad de Investigación Clínica del Consorcio Hospital General Universitario de Valencia

Services Capabilities

System or procedure used for samples identification (cont.)

The sample storage racks will be made or waterproof plastic bags and sealed and labeled with the following information:
Freezing Date, Issue protocol, Day collection, Number of patient
All calibrated annually certified and temperature monitoring system with computerized record probe.

Availability of a specific area for blood samples managing	YES
The former area or room has restricted access by key or code	YES
Number of centrifuges available	2
System for plasma/fluids samples storing	YES
Fridges and freezers available in the Unit	2 FRIDGES AND 2 FREEZERS
The Unit has its owned Bioanalytical Department	YES
Availability of genotyping or fenotyping methods for participants	YES
Data Management and software used	NO
Biometry or Statistical Analysis and software used	NO
Pharmacokinetic Analysis and software used	NO
Medical Writing and skilled languages	NO
Owned archives in the same Unit building	YES

Closed access only accessible by nurses and members of investigation team

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

Docs, such as study file, study data, subject files, or SOP's are sent to an external archive for a minimum of 15 years

The study files are digitised and converted in a CD or web format	NO
Project management	YES

Unidad de Investigación Clínica del Consorcio Hospital General Universitario de Valencia

Services Capabilities

Data Management and software used	YES (Fundanet)
Biometry or Statistical Analysis and software used	Yes (SPSS, stata, prisma v6, WinOnline Softwares)
Pharmacokinetic Analysis and software used	Yes (WinOnline) (Attached document with available techniques)
Medical Writing and skilled languages	Yea, Spanish and English
Owned archives in the same Unit building	Yes

Access control and protection measures as required by legislation. Total capacity of 36 m2

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

Legislation RD 223/224 Art. 39

Article 39. The documents forming the master file of a clinical trial must be retained for the time and according to the specifications in the Instructions for completion of Clinical Trials in Spain or, when appropriate, the guidelines of the European Commission or those published by the ministry of Health.

TMF, CRF trials remain in the file itself, in the unit for 15 years from the end of the clinical trial. The patient history file is returned to the hospital center.

The study files are digitised and converted in a CD or web format	YES
Project management	YES

Unidad de Investigación Clínica del Consorcio Hospital General Universitario de Valencia

Study Participants

Kind of participants included in clinical trials performed in the Unit

X Healthy volunteers X Patients

X Other populations Special risk groups, pediatrics, olders, renal or hepatic failure

If the Unit has experience in oncology, detail kind of tumour and age groups

X Solid tumour X Haematological tumour X Adults X Paediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

The Unit has experience in LUNG tumor treatments, but not exclude other tumors

Recruiting methods for healthy volunteers

Since not all interested persons can be reached with a single method, the UIC develops different recruiting techniques to reach various groups and ensure the availability of volunteers to initiate a clinical trial. Some media described to reach interested individuals are described:
University General Hospital Consortium and its environment:

Medical reference (these may offer other colleagues recruitment)

1. Database center "Quering Database"
2. Conduct meetings with:
- All services
- Nurses,
- Medical center, residents, adjuncts,
- Patient,
- Services involved in the trial
3. Help other centers in the area.
4. Other health professionals
5. Magazines of the University
6. Website of the FiCHGUV
7. Facilitate quizzes, brochures ... in admissions, information point, center entrance, waiting rooms, secretarial service.
8. Signs
9. Pharmacy near the CHGUV
10. Cofee shops
11. Dental Clinics
12. Universities
13. Sports Institutions

Unidad de Investigación Clínica del Consorcio Hospital General Universitario de Valencia

Study Participants

Recruiting methods for patients

Medical reference (these may offer other colleagues recruitment)

1. Database center "Quering Database"
2. Conduct meetings with:
- All services
- Nurses
- Medical center, residents, adjuncts,
- Patient,
- Services involved in the trial

3. Help other centers in the area

Do you have surgery rooms available for screening (separated from the in-house area)? YES

Do you keep a paper or electronic database of volunteers? YES

Date of inclusion, , name, surname, date of birth, age, sex, dni, nationality, address, location, cp, province, phone, mail.

Have you implemented any measure for avoiding the over-volunteering? YES

There is a procedure that limits the number of volunteers per year. The file lists the number of entries for each volunteer

Unidad de Investigación Clínica del Consorcio Hospital General Universitario de Valencia

Pharmacodynamic/Pharmacokinetic Capabilities

Digital blood pressure devices	YES, 2	Pulsioximetry devices	YES, 2	12-leads ECG devices	YES, 1

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules YES

Availability in the Unit of tests for assessing CNS drug effects YES

Psychomotor performance tests, neuropsychological evaluations (EEG and evoked potentials), pupillometry, stabilometry and polysomnography.

Familiarity in poblational analysis and PK/PD modelling, including writing of clinical reports YES

Familiarity with Electronic Data Capture –EDC applied to clinical trials YES

Experience in other kind of PD or PK evaluations not formerly collected YES

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

Unidad de Investigación Clínica del Consorcio Hospital General Universitario de Valencia

Experience

Number of clinical trials per year and type of study	Year					
Type of study	**2009**	**2010**	**2011**	**2012**	**2013**	**2014**
Bioequivalence						
First single-dose administration in humans						
First multiple-dose administration in humans			5	12	11	6
Drug interaction						
Food interaction						
Special populations (Renal or liver impairment, elderly)						
Proof of concept (Phase Ib or I/II)			1			
Own research lines						
Others (specifying)						

Number of trials linked to a PEI (IND) submission | 2009 | 0 | 2010 | 0 | 2011 | 1 | 2012 | 0 | 2013 | 0 | 2014 | 0

Type of drugs (pharmacological group or mechanism of action) tested in the trials performed in the last 4 years

Antiangiogenic inhibitors of EGFR, HER2, IGFR, TGFbeta-R, farnesyl transferase, tubulin-interacting agents, cytotoxic, antiarrhythmics, antihypertensives, statins, antidiabetic agents, antibiotics, antifungals, antidepressants, SSRIs, IBP, monoclonal, anti-dementia, muscle relaxants etc

Sponsor typology for Early Stages trials performed in the last 4 years (2011 to 2014)

Number of trials promoted by Spanish companies 2 Number of trials promoted by multinational companies

Median time for approval by the Ethics Committee and the Spanish Agency for the Early Stages trials 45 days

Number of Early Stages trials performed in the Unit and published in the last 4 years 0

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

None.

Audits by regulatory agencies (last 3 years)

None.

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? **Yes**

Audits by sponsors (last 3 years)

1, October 2014.

Do you follow your own Standard Operating Procedures (SOPs)? yes Do you supply with a SOP copy to a sponsor if requested? yes

Would you follow the sponsor SOPs if requested: yes

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: 1general audit and 5 or 6 specific per year.

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

Regarding the safety of patients UICAB follows the clinical trial protocols and own protocols of the Hospital on Patient Safety. The treatment of personal data of subjects complies with the Organic Law 15/99 of December 13, Protection of Personal Data and the EU directive 95/45 / EC on the protection of individuals with regard to the processing of personal data and the free movement of such data.

UICAB - Instituto de Investigación Sanitaria La Fe

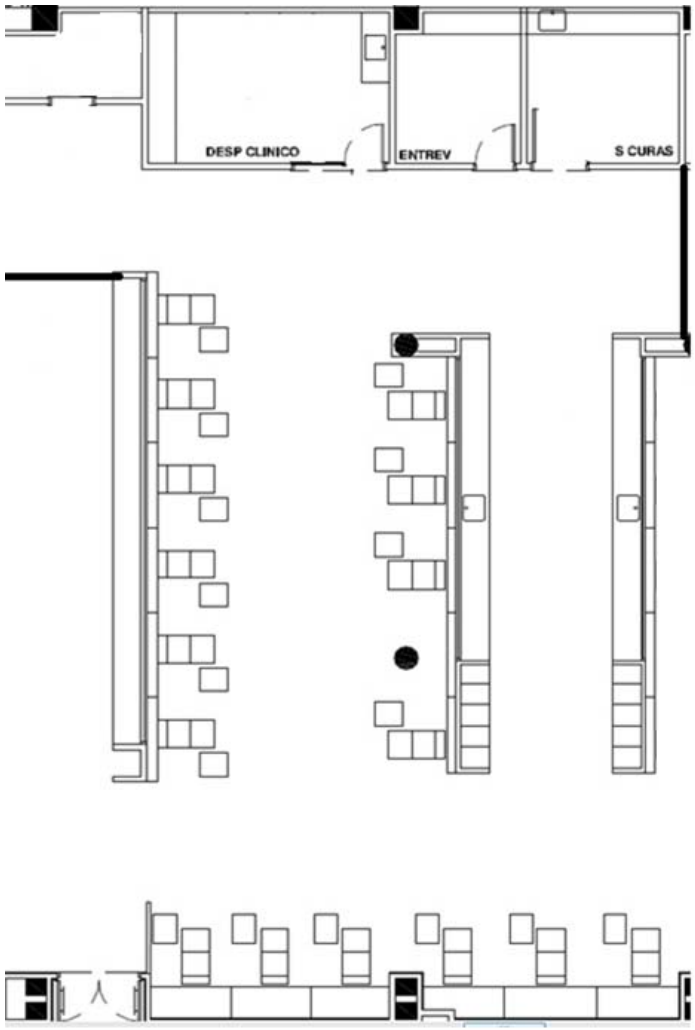
Facilities

Year of Unit building	2011	Last Unit reform	
Usable space	300 m2.	The Unit building is separate from the linked hospital	No
Number of CTs the unit could perform simultanously	8	Number of beds	4
Beds distribution	Two bedrooms with two beds.		
Beds distribution allows a complete and continuous visual control by nurses			Yes
Number of bed with intensive or continuous monitoring	4	Number of armchairs suitable for subject monitoring	9
Owned kitchen	yes	Meals supervision by dietitian	yes
Dining-room available for volunteers	No	Individual lockers available for volunteers	Yes
Relaxing room available for volunteers independent from the beds area			No
Availability in the unit of an emegency trolly for cardiopulmonary resuscitation			Yes
The emergency trolly has available suitable medications with immediate by controlled access			Yes
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)	Advanced LS		
Unit availability of an evacuation plan for volunteers in emergency situations			Yes
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			Yes
Volunteers/patients healthcare would be covered by the national or the regional health system if required			Yes
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers	ICU and Emergency Services.		
Distance and time to get the former services	ICU and Emergency services are in the same building, just 50 m2; 2/8 minutes		
Unit entrance/Exit door controlled	Yes	Unit with Closed Circuit Television	No
Availability of an alternate electrical generating set that automatically works in case of a general system failure			Yes

UICAB - Instituto de Investigación Sanitaria La Fe

Facilities

Unit distribution plan:



UICAB - Instituto de Investigación Sanitaria La Fe

Staffing and Resources

Unit employees

Permanent staff 18 Fixed-term/contracted staff (internship, grant holders) Part-time collaborators 5

Distribution of Unit staff by functions

Function	Permanent staff	Contracted or part-time staff
Principal Investigator	1	
Co-investigator (physician)		
Nurse	4	2
Monitor or CRA	3	
Pharmacist	1	
Biometry		1
Data management		1
Medical writing		
Pharmacokinetics	1	
Quality assurance	2	
Project Management		1
Finance	3	
Recruitment	4	
IT (informatics)	2	
Other (specify): CTA, psychologist, etc	2 laboratory technicians.	

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit

x Physician **x** Nurse

UICAB - Instituto de Investigación Sanitaria La Fe

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameteres)	Yes
The quality assurance activities are subcontracted by the Unit	No, the Unit have its own quality department.
Availability of a specific area for drug storing and preparation of medications for the study	Yes
The former area or room has restricted access by key or code	Yes
Laminar flow chamber availability for preparation of parenteral treatments	Yes
Perfusion pumps for intravenous treatment	Yes
Who is the responsible for drug preparation and dispensing	**Dispensing:** Pharmacists. **Preparation**: Nurses.
Drug accountability procedures, such as reception, preparation and dispensing forms	Pharmacy assistant.
SOPs available for drug preparation and dispensing	Yes
SOPs available for drawing and managing of biological fluids	Yes
System or procedure used for samples identification	
Tags and systems provided by sponsors of clinical trials	
Availability of a specific area for blood samples managing	Yes
The former area or room has restricted access by key or code	Yes
Number of centrifuges available	2
System for plasma/fluids samples storing	Freezers and Fridges properly monitored and controlled.
Fridges and freezers available in the Unit	Fridges: 1 Freezers -70ºC: 2
The Unit has its owned Bioanalytical Department	
Availability of genotyping or fenotyping methods for participants	Yes

UICAB - Instituto de Investigación Sanitaria La Fe

Services Capabilities

Data Management and software used (describe)	Software R versión 3.1.2
Biometry or Statistical Analysis and software used (describe)	Software R versión 3.1.2
Pharmacokinetic Analysis and software used (describe)	Non compartmental and compartmental pharmacokinetics analysis depending on the study drug was used. Softwares used: PKS y Nonmen.
Medical Writing and skilled languages	No.
Owned archives in the same Unit building (describe)	60 m2 with access control by key with fire protection measures.

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

All original source documents and records are kept for 5 years, the rest of the documentation is digitized.

The study files are digitized and converted in a CD or web format	The study files are digitized and converted in a CD format
Project management	Yes

UICAB - Instituto de Investigación Sanitaria La Fe

Study Participants

Kind of participants included in clinical trials performed in the Unit

Healthy volunteers Yes Patients Yes

Other populations Pediatrics population.

If the Unit has experience in oncology, detail kind of tumour and age groups

Yes Solid tumour Yes Haematological tumour Yes Adults Yes Pediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

All kinds of tumors to be a reference center of them all.

Recruiting methods for healthy volunteers

Accompanying patients in outpatient clinics, web and newspaper advertisements.

Recruting methods for patients

Patients who came to outpatient clinics regularly and patients referred from other hospitals.

Do you have sugery rooms available for screening (separated from the in-house area)? (number)	Yes we have 1room for screening.
Do you keep a paper or electronic database of volunteers? (describe)	No
Have you implemented any measure for avoiding the over-volunteering? (describe)	No

UICAB - Instituto de Investigación Sanitaria La Fe

Pharmacodynamic/Pharmacokinetic Capabilities

Digital blood pressure devices (number)	2	Pulsioximetry devices (number)	1	12-leads ECG devices (number)	1

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	Yes
Availability in the Unit of tests for assessing CNS drug effects	No
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	Yes
Familiarity with Electronic Data Capture –EDC applied to clinical trials	No
Experience in other kind of PD or PK evaluations not formerly collected	Dose increases and decreases and AUC

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

All the Phase I trials conducted in our Center involved the realization of at least one PK evaluation that were performed in external sponsor departments .

UICAB - Instituto de Investigación Sanitaria La Fe

Experience

Number of clinical trials per year and type of study	Year					
Type of study	**2009**	**2010**	**2011**	**2012**	**2013**	**2014**
Bioequivalence						1
First single-dose administration in humans						1
First multiple-dose administration in humans						1
Drug interaction						
Food interaction						
Special populations (Renal or liver impairment, elderly)						1
Proof of concept (Phase Ib or I/II)						4
Own research lines						1
Others (specificying)						

Number of trials linked to a PEI (IND) submission	2009	2010	2011	2012	2013	2014

Type of drugs (pharmacological group or mechanism of action) tested in the trials performed in the last 4 years

Cytostatics, oral anticoagulants, monoclonal antibody, anti-TNF, immunosuppressants, anti-angiogenic inhibitors of EGFR, HER2, IGFR, TGFbeta-R, farnesyl transferase, etc

Sponsor typology for Early Stages trials performed in the last 4 years (2011 to 2014)

Number of trials promoted by Spanish companies 1 Number of trials promoted by multinational companies 8

Median time for approval by the Ethics Committee and the Spanish Agency for the Early Stages trials 60 days

Number of Early Stages trials performed in the Unit and published in the last 4 years

Short CV

Degree in Medicine and Surgery in Autonoma University of Madrid (1994-2000) marked with 3 possible 4.
Spring 2001: National Examination for entrance into specialist training (MIR system).
Four-year training residency in Medical Oncology in University Hospital La Fe in Valencia.
2001-2003: Completed initial two years of PhD at the Universitat Autònoma de Barcelona.
Awarded title of research proficiency in October 2003.
Three months training at Royal Marsden Hospital in Breast Cancer Unit (2005)
Three months training at NYU Langone Medical Center in New York (2008)
Two years Master in Molecular Oncology at CNIO (Spanish National Cancer Research Center).
Finish 1 year course:" Principles of Oncology Research, Epidemiolgy and Statistics" at Catalunya University, November 2006.
Last GCP training done on 03/jun/2013
Member of Spanish Society of Medical Oncology (SEOM)
Member of Spanish Breast Cancer Research Group (GEICAM)
Language Certificate 2007: University of Cambridge Advanced Certificated in English: grade a pass

Short CV

Director of the Clinical Research Center in the University Hospital in Badajoz Spain. He is also professor of Pharmacology and Clinical Pharmacology in the Medical School of the University of Extremadura; between 1989-1993 he did his post doc at Karolinska Institute Sweden focusing on Clinical Pharmacogenetics. His teaching experience is of more than 20 years in Spain and of about 9 years in Portugal. He has supervised more than 10 Ph.D. theses so far. He has also been an invited professor in different Universities in USA such as University of California at Los Angeles 2004 Mount Sinai Medical School at NY 2005 and Miller Medical School at Miami 2006 and in Latin America such as UNAM in Mexico San Marcos in Peru, Chile UFMG Brasil, Australian National University in Camberra, etc. He has published more than 150 peer reviewed papers and book chapters. He is also coordinating the Iberoamerican network of Pharmacogenetics since 2006. He served in different Scietific societies as IberoAmerican Society of Pharmacogenomics. He has been principal investigator in more than 30 national and european research projects.

Unit availability of an evacuation plan for volunteers in emergency situations			yes
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			yes
Volunteers/patients healthcare would be covered by the national or the regional health system if required			yes
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers			Yes

The phase I unit is integrated into the hospital itself .The Intensive Care Unit and Emergency Service are informed of clinical trials underway and of admission of patients so they are ready in case of emergency

Distance and time to get the former services	Emergency service is at the top of the unit (ground floor) at a distance of 1.5 minutes and the Intensive Care Unit on the 1st floor to floor about 3 minutes distance.		
Unit entrance/Exit door controlled	yes	Unit with Closed Circuit Television	No
Availability of an alternate electrical generating set that automatically works in case of a general system failure			Yes

Staffing and Resources

Unit employees

Permanent staff Fixed-term/contracted staff (internship, grant holders) Part-time collaborators

Distribution of Unit staff by functions

Function	Permanent staff	Contracted or part-time staff
Principal Investigator	1	
Co-investigator (physician)	1	1
Nurse	1	1
Monitor or CRA		1
Pharmacist	Pharmacy Hospital Service	
Biometry		1
Data management		
Medical writing		
Pharmacokinetics		1 (Manager of Clinical Trial Laboratory)
Quality assurance		
Project Management		
Finance	2	
Recruitment	10	10
IT (informatics)	Informatic Hospital Service	
Other (specify): CTA, psychologist, etc		Project Technicians (3), Research fellows (2), Statistic/Methodologist (1)

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit

Physician Nurse

CICAB- Centro de Investigación Clínica del Área de Salud de Badajoz

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameteres)	yes
The quality assurance activities are subcontracted by the Unit	no
Availability of a specific area for drug storing and preparation of medications for the study	yes
The former area or room has restricted access by key or code	yes
Laminar flow chamber availability for preparation of parenteral treatments	yes
Perfusion pumps for intravenous treatment	yes
Who is the responsible for drug preparation and dispensing	**Dispensing:** Principal Investigator or Nurse as applicable **Preparation**: Pharmacist or Nurse as applicable
Drug accountability procedures, such as reception, preparation and dispensing forms	yes
SOPs available for drug preparation and dispensing	yes
SOPs available for drawing and managing of biological fluids	yes
System or procedure used for samples identification	

Anonymous codes:
- Traxis system (Micronic): use of tubes with 2D encoding.
- Labeling of alphanumeric coding that relates to the code of the protocol, the subject, visit number and sample data collection.
- Labeling provided by the sponsor with the information required in each case

Availability of a specific area for blood samples managing	yes
The former area or room has restricted access by key or code	yes
Number of centrifuges available	2

CICAB- Centro de Investigación Clínica del Área de Salud de Badajoz

Services Capabilities

System for plasma/fluids samples storing

In clear plastic boxes labeled with the protocol code, subject code and collection date, stored at the required temperature according to the protocol of the clinical trial. The material provided by the specific promoter is used in each case.

Fridges and freezers available in the Unit	4 fridges, 5 freezers
The Unit has its owned Bioanalytical Department	yes
Availability of genotyping or fenotyping methods for participants	yes
Data Management and software used (describe)	yes

Excell, Access, Meditata RAVE, Inform, DataLabs, Enable, Sbir, Clinphone, Cenduit, Impala,etc.

Biometry or Statistical Analysis and software used (describe)	yes

SPSS

Pharmacokinetic Analysis and software used (describe)	no
Medical Writing and skilled languages	English and Spanish

Owned archives in the same Unit building (describe)

The archive unit is located at the research center with restricted access by key and all the security controls provided by Hospital security. If necessary the archive unit of the hospitalary complex could also be used

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

The study files are digitized and converted in a CD or web format	If required
Project management	no

CICAB- Centro de Investigación Clínica del Área de Salud de Badajoz

Study Participants

Kind of participants included in clinical trials performed in the Unit

X Healthy volunteers X Patients

Other populations

If the Unit has experience in oncology, detail kind of tumour and age groups

X Solid tumour Haematological tumour X Adults Pediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

All kind of cancer except hematologic cancer

Recruiting methods for healthy volunteers

Website, brochures, students from Health Sciences Faculties.

Recruting methods for patients

Recruitment in Hospital and Primary Care centers, other hospitals and associations of patients.

Do you have sugery rooms available for screening (separated from the in-house area)? (number) yes

Do you keep a paper or electronic database of volunteers? (describe) yes

Electronic (in process)

Have you implemented any measure for avoiding the over-volunteering? (describe) yes

- Set as exclusion criteria to have participated in a clinical trial in the past X months (depending on the protocol).
- CICAB has a database that includes all patients who have participated in clinical trials at the Centre, this will allow us to verify that the subject has not participated in an clinical trial in the previous three months (there is only one Phase I unit acreditated in Extremadura).

CICAB- Centro de Investigación Clínica del Área de Salud de Badajoz

Pharmacodynamic/Pharmacokinetic Capabilities

Digital blood pressure devices (number)	2	Pulsioximetry devices (number)	2	12-leads ECG devices (number)	2

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	yes
Availability in the Unit of tests for assessing CNS drug effects	CANTAB Neurocognitive Evaluation Program
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	no
Familiarity with Electronic Data Capture –EDC applied to clinical trials	yes
Experience in other kind of PD or PK evaluations not formerly collected	yes

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

yes

CICAB- Centro de Investigación Clínica del Área de Salud de Badajoz

Manager since	
E-mail and phone	Rafael.lopez.lopez@sergas.es 981 951 471

Short CV

Actual Position: Head of Medical Oncology Department. Hospital Clínico de Santiago
Qualifications:
1983: Degree in Medicine and Surgery
1995: Doctor in Medicine and Surgery
1988 Specialist in Medical Oncology (Hospital General de Asturias)
Previous positions: 2005-to date: Associate Medical Oncology Professor. Universidad de Santiago de Compostela.
1993-1998: Acting Head of Medical Oncology Department. Hospital Txagorritxu.
Co-author of more thab 30 papers in different national and internaticonal publications.

Unidad de Ensayos Clínicos - Hospital Clínico Universitario de Santiago

Accreditations and audits (*)

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

No. Nowadays, their is not any official accreditation in our region.

Audits by regulatory agencies (last 3 years)

NA

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? **Yes**

Audits by sponsors (last 3 years)

2010 and 2013

Do you follow your own Standard Operating Procedures (SOPs)? Yes Do you supply with a SOP copy to a sponsor if requested? Yes

Would you follow the sponsor SOPs if requested: As a general rule forever. Each case will be examined on an individual basis.

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: 2 (according to department)

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

The system for collecting clinical data of patients is done through electronic medical records, with individual access and identification of responsibility for the patient. The personal data and other specific study of each patient are collected for each service and are guarded by the personnel responsible on computers with personalized access.

Unidad de Ensayos Clínicos - Hospital Clínico Universitario de Santiago

Facilities (*)

Year of Unit building	1999	Last Unit reform	NA
Usable space	Different areas inside Hospital	The Unit building is separate from the linked hospital	No
Number of CTs the unit could perform simultanously	6 aprox.	Number of beds	6
Beds distribution	One bedroom with 4 beds and another with 2 (new Unit).		
Beds distribution allows a complete and continuous visual control by nurses			Yes
Number of bed with intensive or continuous monitoring	2 (new Unit)	Number of armchairs suitable for subject monitoring	16+6 (new Unit)
Owned kitchen	No	Meals supervision by dietitian	Yes
Dining-room available for volunteers	No	Individual lockers available for volunteers	No
Relaxing room available for volunteers independent from the beds area			No
Availability in the unit of an emegency trolly for cardiopulmonary resuscitation			Yes
The emergency trolly has available suitable medications with immediate by controlled access			Yes
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)	Yes, both		
Unit availability of an evacuation plan for volunteers in emergency situations			Yes
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			Yes
Volunteers/patients healthcare would be covered by the national or the regional health system if required			Yes
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers	Urgencies and Intensive Care Unit		
Distance and time to get the former services	Same building		
Unit entrance/Exit door controlled	No	Unit with Closed Circuit Television	No
Availability of an alternate electrical generating set that automatically works in case of a general system failure			Yes

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

- Reference Site for care of the elderly population of the European Union, as Region of Madrid Health Department, Academic Hospital of Getafe. 01/07/2013
- The investigation of Hospital of Getafe has obtained quality certification under the UNE 166002 Management Research, Development and Innovation (R + D + i). Granted by the Ministry of Health Planning and Infrastructure. 03/12/2014

Audits by regulatory agencies (last 3 years)

Non

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? Yes

Audits by sponsors (last 3 years)

Non

Do you follow your own Standard Operating Procedures (SOPs)? Yes

Do you supply with a SOP copy to a sponsor if requested? Yes

Would you follow the sponsor SOPs if requested: We will assume the SOPs after agreement of both parties and as long as this doesn't interfere with the objectives and ethical standards of the unit.

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: the monitoring visits as established by each promoter

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

All documents relating to a clinical trial shall be filed in a folder labeled with the name and study code, in the clinical trials unit (CICA). Within each section the documents are ordered of date entry (the newest at the top). The documents from a clinical trial, described in ICH GCP and the Organic Law 15/1999 of 13 December on the protection of personal data, would be retained until sponsor notification and for 15 years after the completion of the study.

The personal data that are available in these units relate to health, which, according to this Law, are specially protected. All data and documents of the study could be provided to regulatory authorities, if they request them.

Centro de Investigación Clínica del Anciano CICA. Hospital Universitario de Getafe

Facilities

Year of Unit building	1986	Last Unit reform	Non
Usable space	38m2	The Unit building is separate from the linked hospital	Non
Number of CTs the unit could perform simultanously	2	Number of beds	2
Beds distribution	A room with 2 beds and 4 recliners.		
Beds distribution allows a complete and continuous visual control by nurses			2
Number of bed with intensive or continuous monitoring	Yes	Number of armchairs suitable for subject monitoring	4
Owned kitchen	No	Meals supervision by dietitian	Yes
Dining-room available for volunteers	Yes	Individual lockers available for volunteers	Yes
Relaxing room available for volunteers independent from the beds area			Yes
Availability in the unit of an emegency trolly for cardiopulmonary resuscitation			Yes
The emergency trolly has available suitable medications with immediate by controlled access			Yes
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)	Advance LS		
Unit availability of an evacuation plan for volunteers in emergency situations			Yes
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			Yes
Volunteers/patients healthcare would be covered by the national or the regional health system if required			Yes
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers	A geriatrician and nurse will take care of the basic life support, and they will decide if the patient requires admission in geriatric ward, the intensive care unit or some other unit available to the hospital, and these procedures should be responsibility for the geriatrician on duty in the unit.		
Distance and time to get the former services	The Unit is located in the premises of the Hospital		
Unit entrance/Exit door controlled	Key that only the nurse or doctor has, and each patient should register the date and time of arrival and signature	Unit with Closed Circuit Television	No
Availability of an alternate electrical generating set that automatically works in case of a general system failure			Yes

Staffing and Resources

Unit employees

Permanent staff 12 Fixed-term/contracted staff (internship, grant holders) 10 Part-time collaborators 4

Distribution of Unit staff by functions

Function	Permanent staff	Contracted or part-time staff
Principal Investigator	1-3-4-5-6-7	20-21-22-23-24-25-26-27
Co-investigator (physician)	3-4-5-6-7	14:27
Nurse	7	
Monitor or CRA		
Pharmacist	10	14-15
Biometry		
Data management	3-4-5-6-7-9	
Medical writing	1-3-4-5-6-7-9	14:27
Pharmacokinetics		
Quality assurance	3-4-7	
Project Management	3-4-7	
Finance	1-11	
Recruitment	3-4-5-6-7	14:27
IT (informatics)	12-13	
Other (specify): CTA, psychologist, etc	9-statistical	

Total: 13 employees collaborating as Permanent Staff and 14 as Part-time collaborators, 6 of them under MIR.

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit

1 Physician **1** Nurse

Centro de Investigación Clínica del Anciano CICA. Hospital Universitario de Getafe

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameteres)	Yes, Academic Hospital of Getafe laboratory
The quality assurance activities are subcontracted by the Unit	yes

Physiotherapy, Pharmacogenetics, CRO. To hire any of the companies, the founding values the CV and budgets of each.

Availability of a specific area for drug storing and preparation of medications for the study	yes
The former area or room has restricted access by key or code	yes
Laminar flow chamber availability for preparation of parenteral treatments	yes
Perfusion pumps for intravenous treatment	yes
Who is the responsible for drug preparation and dispensing	**Dispensing:** Pharmacy Service in the Academic Hospital of Getafe **Preparation**: Pharmacy Service in the Academic Hospital of Getafe
Drug accountability procedures, such as reception, preparation and dispensing forms	yes
SOPs available for drug preparation and dispensing	yes
SOPs available for drawing and managing of biological fluids	yes
System or procedure used for samples identification	

The samples shall be identified by the code of the study participants with labels.

Availability of a specific area for blood samples managing	yes
The former area or room has restricted access by key or code	yes
Number of centrifuges available	1 refrigerated
System for plasma/fluids samples storing	Refrigerator freezer 4 ° C and -80 ° C
Fridges and freezers available in the Unit	2 Fridge /2 freezer

Centro de Investigación Clínica del Anciano CICA. Hospital Universitario de Getafe

Services Capabilities

The Unit has its owned Bioanalytical Department	Yes, Academic Hospital of Getafe laboratory
Availability of genotyping or fenotyping methods for participants	Yes, Sistemas genómicos / SERMAS / CAMBRIDGE / Evercyte / Cardiff Metropolitan / Mosaiques / University of Innsbruck / JENA

Data Management and software used (describe)

Yes, SPPS, Excel

Biometry or Statistical Analysis and software used (describe)

Yes , SPPS - R

Pharmacokinetic Analysis and software used (describe)

Non

Medical Writing and skilled languages	Spanish - English - French

Owned archives in the same Unit building (describe)

4 offices requiring key to get in, with lockable cupboards.

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

15 years

The study files are digitized and converted in a CD or web format	No
Project management	Yes,

Centro de Investigación Clínica del Anciano CICA. Hospital Universitario de Getafe

Study Participants

Kind of participants included in clinical trials performed in the Unit

x Healthy volunteers x Patients

x Other populations Geriatrics

If the Unit has experience in oncology, detail kind of tumour and age groups

x Solid tumour x Haematological tumour x Adults Pediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

We have tracking service geriatric, palliative patients and have the cooperation of the service of general oncology.

Recruiting methods for healthy volunteers

Advertising unit (advertising (in the hospital, in recreation centers of 3rd age ...), database previously enrolled healthy volunteers

Recruting methods for patients

Geriatric service hasconsultation scheduled, hospital ward, day hospital, associated residences, health centers, Toledo cohort, primary care and patients in other services.

Do you have sugery rooms available for screening (separated from the in-house area)? (number) Yes, 1

Do you keep a paper or electronic database of volunteers? (describe)

Non

Have you implemented any measure for avoiding the over-volunteering? (describe)

The over-volunteering is not a common problem in the elderly

Centro de Investigación Clínica del Anciano CICA. Hospital Universitario de Getafe

Pharmacodynamic/Pharmacokinetic Capabilities

Digital blood pressure devices (number)	Yes, 1	Pulsioximetry devices (number)	yes	12-leads ECG devices (number)	Yes, 1

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	Yes
Availability in the Unit of tests for assessing CNS drug effects	Encephalogram Cranial CT Cranial MRI Cranial PET Cognitive assessment
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	Yes, > 100 bioequivalence studies of some members of the unit
Familiarity with Electronic Data Capture –EDC applied to clinical trials	Yes, > 10 since the beginning of CICA
Experience in other kind of PD or PK evaluations not formerly collected	Non

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

No

Centro de Investigación Clínica del Anciano CICA. Hospital Universitario de Getafe

Experience

Number of clinical trials per year and type of study	Year					
Type of study	**2009**	**2010**	**2011**	**2012**	**2013**	**2014**
Bioequivalence						
First single-dose administration in humans						
First multiple-dose administration in humans						
Drug interaction						
Food interaction

- Internacional journals papers 48
- Book chapters 23

Unidad de Ensayos Clínicos Facultad de Medicina Universidad Autónoma de Madrid

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

- **GENERAL SUBDIRECTORATE OF EVALUATION AND CONTROL. COMUNIDAD DE MADRID. CONSEJERIA DE SANIDAD D.G.** Inspected to verify compliance with the principal of Good Clinical Practice (GCP) in force of the European Union and Spain and the "Technical requirements for the Units which conduct early stage clinical trials with medicines in the Community of Madrid".The inspection visit took place on October 13th, 2011.

  Re-accredited for four years in February 2013

Audits by regulatory agencies (last 3 years)

Inspection by the AEMPS in July 2012 and November 2008

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? **YES**

Audits by sponsors (last 3 years)

Seven by different sponsors

Do you follow your own Standard Operating Procedures (SOPs)? yes Do you supply with a SOP copy to a sponsor if requested? yes

Would you follow the sponsor SOPs if requested: Yes,only if the Sponsor SOPs they do not contradict with SOPs Unit and do not involve additional work or data duplication.

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: One per trial by our QA Unit

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

The team members sign a confidentiality agreement. Unit with controlled limited access. Trial documentation stored in a locked, double door and fire alarm protected archive. Trial electronic files stored in our Unit located server protected with periodic back up. The team members have a password restricted access to the server.

Unidad de Ensayos Clínicos Facultad de Medicina Universidad Autónoma de Madrid

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameteres)	No, we use Hospital La Paz laboratories
The quality assurance activities are subcontracted by the Unit	No, we have specific department
Availability of a specific area for drug storing and preparation of medications for the study	No, locked cabinet and temperature monitored
The former area or room has restricted access by key or code	Yes
Laminar flow chamber availability for preparation of parenteral treatments	No
Perfusion pumps for intravenous treatment	Yes
Who is the responsible for drug preparation and dispensing	**Dispensing:** Investigator Team Members **Preparation:** The clinical pharmacologist responsible for each study day
Drug accountability procedures, such as reception, preparation and dispensing forms	Yes
SOPs available for drug preparation and dispensing	Yes
SOPs available for drawing and managing of biological fluids	Yes

System or procedure used for samples identification

Samples of each subject are labelled with the number of subject, admission period, sampling time and study code.

Availability of a specific area for blood samples managing	Yes
The former area or room has restricted access by key or code	Yes, restricted access by key
Number of centrifuges available	1
System for plasma/fluids samples storing	They are stored in labeled transparent plastic bags for each volunteer
Fridges and freezers available in the Unit	2 fridges and 4 freezers (2 of them reach -70ºC and 2 reach -20ºC)
The Unit has its owned Bioanalytical Department	No. Generally, the sponsor outsources bioanalysis laboratory
Availability of genotyping or fenotyping methods for participants	Yes, RT-PCR system

Unidad de Ensayos Clínicos Facultad de Medicina Universidad Autónoma de Madrid

Services Capabilities

Data Management and software used (describe)	Yes
Clinical pharmacologists team handles the data management unless the sponsor decides otherwise	
Biometry or Statistical Analysis and software used (describe)	Yes
Clinical pharmacologists team handles the data management unless the sponsor decides otherwise. Software: Microsoft Excel 2013, R, STATA 11 and Phoenix WinNolin 6.3	
Pharmacokinetic Analysis and software used (describe)	Yes
Clinical pharmacologists team handles the data management unless the sponsor decides otherwise. No compatimental analysis. Software:Phoenix WinNolin 6.3 and R	
Medical Writing and skilled languages	Yes, English and Spanish
Owned archives in the same Unit building (describe)	Yes
Fireproof access through double doors locked. Smoke detectors. 15m^2	
Regarding a specific clinical trial what documents are sent to the archives and for long time are archived	
All documentation referred to trial (protocol, administration, development of the study, final report, CRDs, medical records and analytical is stored during the period of time according to current legislation.	
The study files are digitized and converted in a CD or web format	No
Project management	No, Unit staff memebers performs that function

Unidad de Ensayos Clínicos Facultad de Medicina Universidad Autónoma de Madrid

Study Participants

Kind of participants included in clinical trials performed in the Unit

x	Healthy volunteers	x	Patients
x	Other populations		

If the Unit has experience in oncology, detail kind of tumour and age groups

x	Solid tumour	x	Haematological tumour	x	Adults	x	Pediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

All kinds except critically ill patients, the Unit has contact with the oncology department of the Hospital La Paz

Recruiting methods for healthy volunteers

The Clinical Trials Unit performs briefings for each study. Potential participants are advertised briefings dates through Unit website and Twitter account.

Recruting methods for patients

Usually through hospital specialists

Do you have sugery rooms available for screening (separated from the in-house area)? (number)	Yes (1)
Do you keep a paper or electronic database of volunteers? (describe)	Yes

Both

Have you implemented any measure for avoiding the over-volunteering? (describe)	Yes

Database searching to verify that the volunteer has not participated in an trial in previous three months.

Unidad de Ensayos Clínicos Facultad de Medicina Universidad Autónoma de Madrid

Pharmacodynamic / Pharmacokinetic Capabilities

Digital blood pressure devices (number)	Yes(2)	Pulsioximetry devices (number)	Yes(2)	12-leads ECG devices (number)	Yes(2)

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	Yes
Availability in the Unit of tests for assessing CNS drug effects	Yes
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	Yes
Familiarity with Electronic Data Capture –EDC applied to clinical trials	Yes
Experience in other kind of PD or PK evaluations not formerly collected	Pk/PD, cardiovascular parameters

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

Stadistical data analysis, bioequivalence studies, dose linearity, interaction and dose-finding studies

First and last names	Francisco Abad-Santos
Qualifications	Medical Doctor, PhD
Medical specialty	Clinical Pharmacologist
Manager since	1997
E-mail and phone	francisco.abad@salud.madrid.org +34 915202247

Short CV

Professional activity: current positions

Medical especialist on Clinical Pharmacology Service of Hospital Universitario de la Princesa since March 1995. Section chief since 2011
Associate Professor of Pharmacology Department, Universidad Autónoma de Madrid since 2000-2001.
Ethics Committee President of Hospital Universitario de la Princesa.
Group leader of Instituto de Investigación Sanitaria del Hospital Universitario de La Princesa.

Experience in Clinical Research

Clinical Trial experience: phase I trials with healthy volunteers and patients (pharmacodynamics, pharmacokinetics, dose finding, bioequivalence) and phase II and III trials in colaboration with other services of Hospital (digestive, oncology, dermatology, psiquiatry, radiotherapy, endocrinology, hematology….)
Extensive knowledge on Good Clinical Practice
Line of investigation: Pharmacogenetics.

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

Comunidad de Madrid, Servicio de Control Farmacéutico y Productos Sanitarios.

24th January 2014. Accreditation of Good Clinical Practices for period 2014-2018.

Audits by regulatory agencies (last 3 years) Agencia Española de Medicamentos y Productos Sanitarios (AEMPS) 10, 11 and 13 of April 2012

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? **Yes**

Audits by sponsors (last 3 years)

1 audit in 2012, 2 audits in 2013 and 1 audit in 2014.

Do you follow your own Standard Operating Procedures (SOPs)? YES Do you supply with a SOP copy to a sponsor if requested? YES

Would you follow the sponsor SOPs if requested: Yes, but always that SOPs follow the GCPs and European and Spanish legislation.

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: Around three

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

The quality policy of UECHUP is conducting clinical trials in strict accordance with the study protocol and all its processes comply with all current legislation and the Guidelines for Good Clinical Practice.

Healthy subjects and patients admitted to our unit are constantly monitored by a video surveillance system; at any time in the unit, there is a nurse, a doctor and a member of the Clinical Pharmacology Service properly trained in Life Support. In addition, the UECHUP has the necessary means to monitor a patient and / or volunteer in an emergency. As the UECHUP is fully integrated within the hospital, it is also included within the system of the hospital emergency.

All data are archived in our department, on paper or in electronic format. The data are included in a database which follows the Law 15/1999 on Protection of Personal Data and it is registered in the Data Protection Agency (Clinic Research File of the University Hospital of La Princesa). The members of the Clinical Pharmacology Service are required to maintain the confidentiality of the information. Data may be accessed by a representative of sponsor and / or public health authorities. The information sent to the sponsor is coded for anonymity. The identity of subjects is not revealed if the study results are published.

Unidad de Ensayos Clínicos del Hospital Universitario de la Princesa UECHUP

Facilities

Year of Unit building	1955	Last Unit reform	2010
Usable space	193	The Unit building is separate from the linked hospital	No
Number of CTs the unit could perform simultanously	2	Number of beds	14
Beds distribution	Two rooms with 6 beds and two rooms with an individual bed		
Beds distribution allows a complete and continuous visual control by nurses			Yes
Number of bed with intensive or continuous monitoring	1	Number of armchairs suitable for subject monitoring	1
Owned kitchen	No	Meals supervision by dietitian	Yes
Dining-room available for volunteers	No	Individual lockers available for volunteers	Yes
Relaxing room available for volunteers independent from the beds area			Yes
Availability in the unit of an emegency trolly for cardiopulmonary resuscitation			Yes
The emergency trolly has available suitable medications with immediate by controlled access			Yes
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)	Yes		
Unit availability of an evacuation plan for volunteers in emergency situations			Yes
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			Yes
Volunteers/patients healthcare would be covered by the national or the regional health system if required			Yes
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers	Intensive Care Unit (ICU), Anestesiology and Resuscitation Service and Emergency Service of Hospital Universitario de La Princesa		
Distance and time to get the former services	ICU: One floor (<5 min). Anestesiology and Resuscitation Service: in front of UECHUP (<1 min). Emergency service: 8 floors (<8 min)		
Unit entrance/Exit door controlled	Yes	Unit with Closed Circuit Television	Yes
Availability of an alternate electrical generating set that automatically works in case of a general system failure			Yes

Unidad de Ensayos Clínicos del Hospital Universitario de la Princesa UECHUP

Facilities

Unit distribution plan:

Unidad de Ensayos Clínicos del Hospital Universitario de la Princesa UECHUP

Staffing and Resources

Unit employees

Permanent staff 5 Fixed-term/contracted staff (internship, grant holders) 7 Part-time collaborators 45

Distribution of Unit staff by functions

Function	Permanent staff	Contracted or part-time staff
Principal Investigator	2	
Co-investigator (physician)		26
Nurse		25
Monitor or CRA	1	1
Pharmacist	1	
Biometry		
Data management	2	1
Medical writing		1
Pharmacokinetics	3	
Quality assurance	1	
Project Management	2	
Finance	1	
Recruitment	5	7
IT (informatics)		
Other (specify): Secretary	1	

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit

1 Physician **1 or 2** Nurse

Unidad de Ensayos Clínicos del Hospital Universitario de la Princesa UECHUP

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameteres)	No
The quality assurance activities are subcontracted by the Unit	No
Availability of a specific area for drug storing and preparation of medications for the study	Yes
The former area or room has restricted access by key or code	Yes
Laminar flow chamber availability for preparation of parenteral treatments	Yes
Perfusion pumps for intravenous treatment	Yes
Who is the responsible for drug preparation and dispensing	**Dispensing:** Two members of UECHUP **Preparation**: One member of UECHUP and One member of Quality Control Assurance of UECHUP
Drug accountability procedures, such as reception, preparation and dispensing forms	Yes
SOPs available for drug preparation and dispensing	Yes
SOPs available for drawing and managing of biological fluids	Yes

System or procedure used for samples identification

The plasma samples are labelled with the protocol code, subject number, period and extraction time.

Availability of a specific area for blood samples managing	Yes
The former area or room has restricted access by key or code	Yes
Number of centrifuges available	2 with temperature control and 1 without temperature control
System for plasma/fluids samples storing	Describes on SOP (UECHUP/PNT-11)
Fridges and freezers available in the Unit	1 fridge and 5 freezers (3 of them of -70ºC)
The Unit has its owned Bioanalytical Department	No, this activity is subcontract by sponsor
Availability of genotyping or fenotyping methods for participants	Yes (CYP2D6, CYP2C9, CYP2C19, CYP2C8, TPMT, HLAB*5701, DPYD, IL23, IL28, TNFα.).

Unidad de Ensayos Clínicos del Hospital Universitario de la Princesa UECHUP

Services Capabilities

Data Management and software used (describe)	Excel, Acces and eCRF elaborated by Xolomon
Biometry or Statistical Analysis and software used (describe)	SPSS
Pharmacokinetic Analysis and software used (describe)	Winonlin 6.3
Medical Writing and skilled languages	English and Spanish
Owned archives in the same Unit building (describe)	Yes

Capacity for more than 60 clinical trials

Access control of inputs and outputs file. Located in a room with fire detection system

Note: When the archives are completed, the older studies are sended to external archive (ADEA). This archive is provided by Fundación de Investigación Biomédica del Hospital de La Princesa

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

All the essentials documents of study and all study records are archive beetwen 10 and 15 years according legislation and sponsor procedures

The study files are digitized and converted in a CD or web format	Yes
Project management	Yes

Unidad de Ensayos Clínicos del Hospital Universitario de la Princesa UECHUP

Study Participants

Kind of participants included in clinical trials performed in the Unit

Yes	Healthy volunteers	Yes	Patients
Yes	Other populations	Patients with hepatic or renal impairment. Elderly population and postmenopausal women	

If the Unit has experience in oncology, detail kind of tumour and age groups

Yes	Solid tumour	Yes	Haematological tumour	Yes	Adults	No	Pediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

Leukemias, lymphomas, multiple myeloma, breast, lung, colorectal, urological, prostate

Recruiting methods for healthy volunteers

The existence of the clinical trial is not published in any media. It simply reports the start of the briefing via twitter at the following address:

@UEC_Princesa

Recruting methods for patients

The investigators makes a screening of the stories and looking for potentially eligible patients in a study according to the inclusion and exclusion criteria of the protocol.

Do you have sugery rooms available for screening (separated from the in-house area)? (number)	Yes (3)
Do you keep a paper or electronic database of volunteers? (describe)	Yes

Name, age, sex, direction, DNI and study participation history

Have you implemented any measure for avoiding the over-volunteering? (describe)	Yes

We registrated in own database and we ask them about their participation in other studies.

Unidad de Ensayos Clínicos del Hospital Universitario de la Princesa UECHUP

Pharmacodynamic/Pharmacokinetic Capabilities

Digital blood pressure devices (number)	Yes (4)	Pulsioximetry devices (number)	Yes (1)	12-leads ECG devices (number)	Yes (3)

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	No
Availability in the Unit of tests for assessing CNS drug effects	No (in these studies we colaborete with other service of hospital such as psychiatry and neurology)
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	Yes, 3 studies performed on 1997, 2000 and 2003
Familiarity with Electronic Data Capture –EDC applied to clinical trials	Yes, 10 on the last 3 years
Experience in other kind of PD or PK evaluations not formerly collected	
Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted	

Unidad de Ensayos Clínicos del Hospital Universitario de la Princesa UECHUP

Experience

Number of clinical trials per year and type of study	Year					
Type of study	**2009**	**2010**	**2011**	**2012**	**2013**	**2014**
Bioequivalence	6	5	9	12	20	14
First single-dose administration in humans	1					1
First multiple-dose administration in humans						
Drug interaction						
Food interaction			1			
Special populations (Renal or liver impairment, elderly)					1	1
Proof of concept (Phase Ib or I/II)						
Own research lines			1	1		
Others (specificying) Phases II, III and IV	8	10	15	20	20	22

Number of trials linked to a PEI (IND) submission | 2009 | 8 | 2010 | 10 | 2011 | 15 | 2012 | 20 | 2013 | 20 | 2014 | 22

Type of drugs (pharmacological group or mechanism of action) tested in the trials performed in the last 4 years

Anti-inflammatory drugs, proton-pump inhibitors, iron salts, bisphosphonates, calcium, calcium channel blockers, angiotensin receptor antagonists, vasoconstrictors, diuretics, heparins, hypolipidemic, antipsychotics, selective inhibitors of serotonin reuptake, 5-alpha-reductase inhibitors, estrogen, gout drugs, beta-lactam antibiotics, mucolytics, antiasthmatic, vaccines, cholinesterase inhibitors, functional foods

Sponsor typology for Early Stages trials performed in the last 4 years (2011 to 2014)

Number of trials promoted by Spanish companies 66 Number of trials promoted by multinational companies 22

Median time for approval by the Ethics Committee and the Spanish Agency for the Early Stages trials 30 days

Number of Early Stages trials performed in the Unit and published in the last 6 years 5

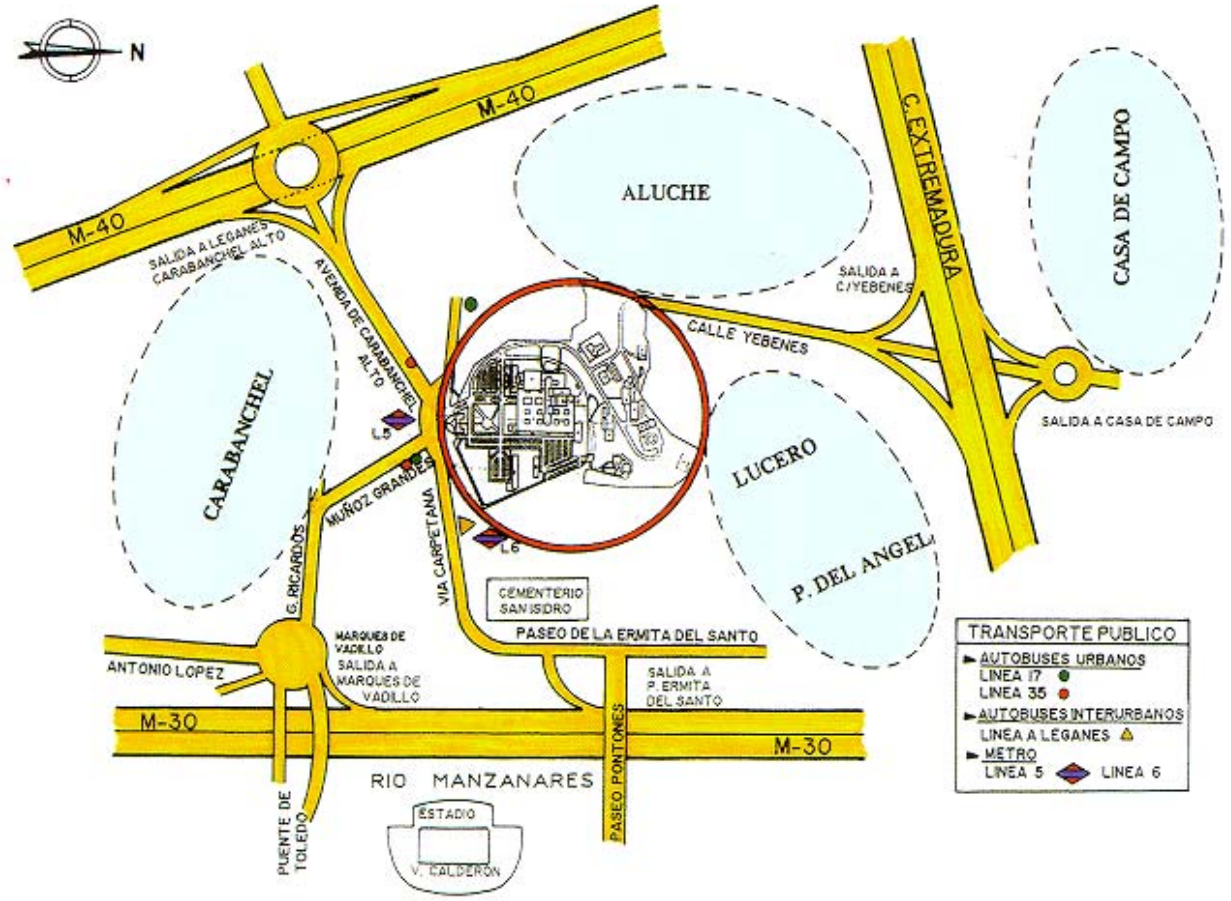
General Information

Who filled in this survey	Miguel Puerro Vicente / Amelia García Luque
E-mail contact (Phone number)	mpuevi1@oc.mde.es (91 422 21 86) agarluq@oc.mde.es (91 422 21 86)
Date of survey filling in	25/05/2015
Unit web address	No
Formal name of the unit	Clinical Trial Unit. Clinical Pharmacology Service
Postal address	Hospital Central de la Defensa "Gómez Ulla" Glorieta del Ejército, 1 28047 Madrid. Spain

Unidad de Ensayos Clínicos del Hospital Central de la Defensa Gómez Ulla

Location



Unidad de Ensayos Clínicos del Hospital Central de la Defensa Gómez Ulla

Ownership

Ownership	Public. Ministry of Defense.
Established	2002
Linked hospital	Hospital Central de la Defensa "Gómez Ulla"
Distance between linked hospital and Unit	Inside the hospital
Linked Ethics Committee (CEIC)	CEIC del Hospital Central de la Defensa

Unit Manager

First and last names	Miguel Puerro Vicente
Qualifications	Doctor
Medical specialty	Clinical Pharmacology
Manager since	2002
E-mail and phone	mpuevi1@oc.mde.es 91 422 81 86

Short CV

ACADEMIC QUALIFICATIONS:
Bachelor of Medicine and Surgery. Universidad Complutense de Madrid.
Specialist in Clinical Pharmacology.
Doctor of Pharmacology and Special Prize in the section "Fundamental"
PROFESSIONAL EXPERIENCE:
Chief of Clinical Pharmacology, Central Hospital of Defense.
Medical Resident (Clinical Pharmacology) Hospital Clínico San Carlos
TEACHING EXPERIENCE AND RESEARCH:
Associate Professor of Pharmacology, Faculty of Medicine at the Alcalá University of Madrid. 2012 –at the present.
Professor of Pharmacology, Faculty of Medicine of the Universidad San Pablo CEU. 2004-2011.
Associate Professor of Pharmacology, Faculty of Medicine at the Complutense University of Madrid. 1989 -2003.
Director and co-head of 23 doctoral courses.
Participation as a researcher in 22 clinical trials (17 as principal investigator)
Participation as a researcher in 13 research projects funded by official agencies
President of the Research Committee of the Central Hospital of Defense.
Books and publications in national and international magazines

Unidad de Ensayos Clínicos del Hospital Central de la Defensa Gómez Ulla

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

Yes

Audits by regulatory agencies (last 3 years)

No

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? Yes

Audits by sponsors (last 3 years) No

Do you follow your own Standard Operating Procedures (SOPs)? Yes Do you supply with a SOP copy to a sponsor if requested? No

Would you follow the sponsor SOPs if requested: Usually it is working with a sum of SOPs (own + promoter)

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: 1

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

PNT - 15: Process safety analysis.

PNT - 18: Handling Procedures and file.

Unidad de Ensayos Clínicos del Hospital Central de la Defensa Gómez Ulla

Facilities

Year of Unit building	1973	Last Unit reform	2015
Usable space	600 m^2	The Unit building is separate from the linked hospital	No
Number of CTs the unit could perform simultanously	2	Number of beds	24
Beds distribution	4 bedrooms with 6 beds		
Beds distribution allows a complete and continuous visual control by nurses			No
Number of bed with intensive or continuous monitoring	2	Number of armchairs suitable for subject monitoring	0
Owned kitchen	Yes	Meals supervision by dietitian	Yes
Dining-room available for volunteers	Yes	Individual lockers available for volunteers	Yes
Relaxing room available for volunteers independent from the beds area			Yes
Availability in the unit of an emegency trolly for cardiopulmonary resuscitation			Yes
The emergency trolly has available suitable medications with immediate by controlled access			Yes
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)	Yes		
Unit availability of an evacuation plan for volunteers in emergency situations			Yes
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			Yes
Volunteers/patients healthcare would be covered by the national or the regional health system if required			Yes
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers	ICU and Emergency Hospital		
Distance and time to get the former services	Inside the hospital. Few minutes.		
Unit entrance/Exit door controlled	No	Unit with Closed Circuit Television	No
Availability of an alternate electrical generating set that automatically works in case of a general system failure			Yes

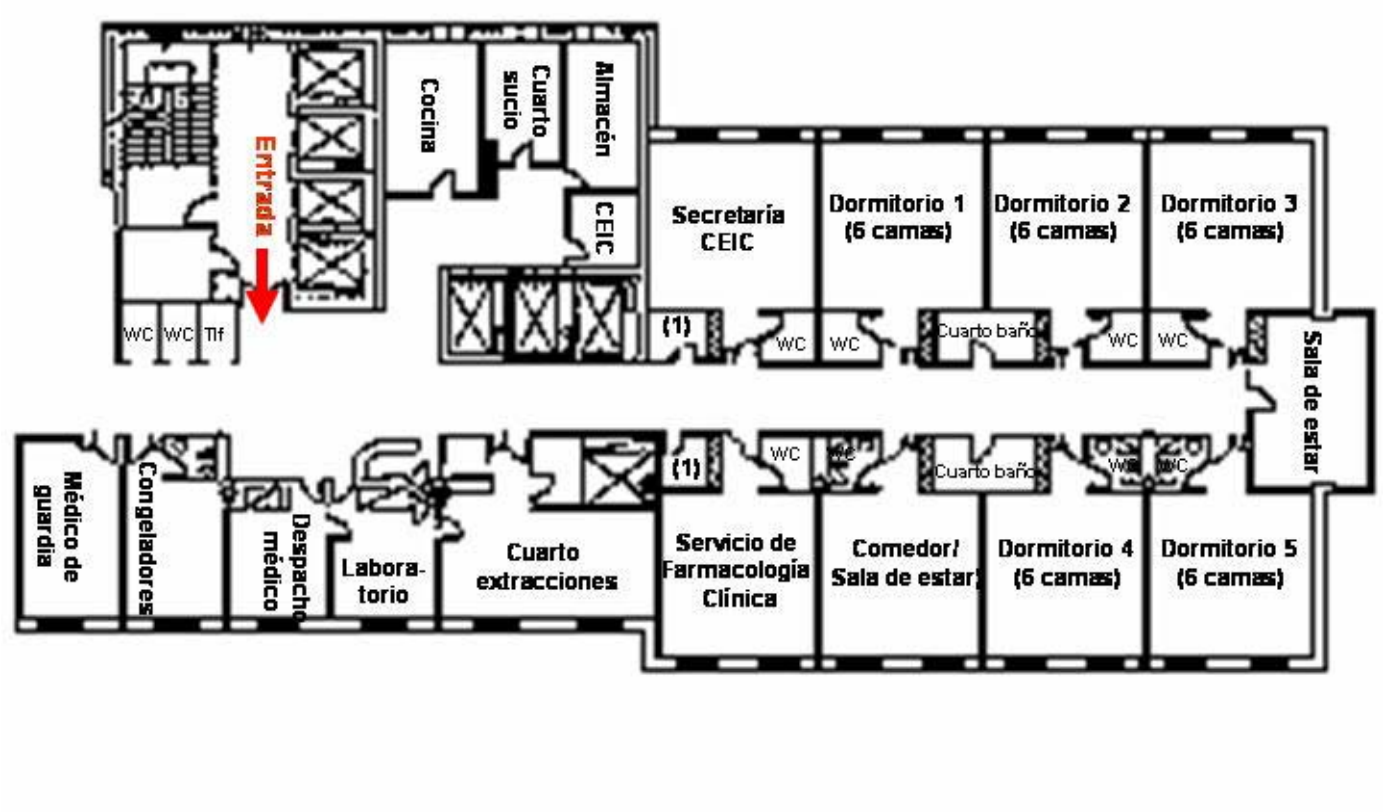
Unit distribution plan



Unidad de Ensayos Clínicos del Hospital Central de la Defensa Gómez Ulla

Staffing and Resources

Unit employees

Permanent staff Fixed-term/contracted staff (internship, grant holders) Part-time collaborators

Distribution of Unit staff by functions

Function	Permanent staff	Contracted or part-time staff
Principal Investigator	1	
Co-investigator (physician)	1	8 medical staff
Nurse		10
Monitor or CRA		1
Pharmacist		1
Biometry		
Data management		1
Medical writing		1
Pharmacokinetics		1
Quality assurance		1
Project Management		1
Finance		
Recruitment		1
IT (informatics)		
Other (specify): CTA, psychologist, etc		

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit

X Physician X Nurse

Unidad de Ensayos Clínicos del Hospital Central de la Defensa Gómez Ulla

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameteres)	No
The quality assurance activities are subcontracted by the Unit	Yes
Availability of a specific area for drug storing and preparation of medications for the study	Yes
The former area or room has restricted access by key or code	No
Laminar flow chamber availability for preparation of parenteral treatments	No
Perfusion pumps for intravenous treatment	Yes
Who is the responsible for drug preparation and dispensing	**Dispensing:** Physician (Dr. Garcia Luque) **Preparation**: Physician (Dr. Garcia Luque)
Drug accountability procedures, such as reception, preparation and dispensing forms	Yes
SOPs available for drug preparation and dispensing	Yes
SOPs available for drawing and managing of biological fluids	Yes
System or procedure used for samples identification	

Labels with the code of the study and number of volunteer figure below, followed by number indicating the period, followed by the time of extraction

Availability of a specific area for blood samples managing	Yes
The former area or room has restricted access by key or code	Yes
Number of centrifuges available	2
System for plasma/fluids samples storing	6 freezers at -30º and 2 at -80º
Fridges and freezers available in the Unit	6 freezers at -30º and 2 at -80º
The Unit has its owned Bioanalytical Department	No
Availability of genotyping or fenotyping methods for participants	No

Unidad de Ensayos Clínicos del Hospital Central de la Defensa Gómez Ulla

Services Capabilities

Data Management and software used (describe)	Microsoft Access
Biometry or Statistical Analysis and software used (describe)	WinNolin Professional Edition version 2.0 (Scientific Consulting, Inc, Cary USA)
Pharmacokinetic Analysis and software used (describe)	WinNolin Professional Edition version 2.0 (Scientific Consulting, Inc, Cary USA)
Medical Writing and skilled languages	Spanish and English
Owned archives in the same Unit building (describe)	Yes

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

The entire file of the investigator and CRDs is saved during 15 years

The study files are digitized and converted in a CD or web format	No
Project management	No

Unidad de Ensayos Clínicos del Hospital Central de la Defensa Gómez Ulla

Study Participants

Kind of participants included in clinical trials performed in the Unit

Healthy volunteers	Yes	Patients	Yes
Other populations	No		

If the Unit has experience in oncology, detail kind of tumour and age groups

No	Solid tumour	No	Haematological tumour	Yes	Adults	No	Pediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

Recruiting methods for healthy volunteers

Phoning and social networks volunteers

Recruting methods for patients

Phoning and social networks volunteers

Do you have sugery rooms available for screening (separated from the in-house area)? (number) Yes 2 rooms

Do you keep a paper or electronic database of volunteers? (describe)

Name, phone number (s), date of birth, sex, participation in previous trials

Have you implemented any measure for avoiding the over-volunteering? (describe) No

Unidad de Ensayos Clínicos del Hospital Central de la Defensa Gómez Ulla

Pharmacodynamic / Pharmacokinetic Capabilities

Digital blood pressure devices (number)	2	Pulsioximetry devices (number)	2	12-leads ECG devices (number)	2

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	Yes
Availability in the Unit of tests for assessing CNS drug effects	No
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	Yes
Familiarity with Electronic Data Capture –EDC applied to clinical trials	Yes
Experience in other kind of PD or PK evaluations not formerly collected	No

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

No

Unidad de Ensayos Clínicos del Hospital Central de la Defensa Gómez Ulla

Experience

Number of clinical trials per year and type of study	Year					
Type of study	**2009**	**2010**	**2011**	**2012**	**2013**	**2014**
Bioequivalence						5
First single-dose administration in humans						
First multiple-dose administration in humans

Brochure

CLINICAL PHARMACOLOGY STUDY UNIT
DEPARTMENT OF CLINICAL PHARMACOLOGY
HOSPITAL CLÍNICO SAN CARLOS
C/ Prof. Martín Lagos s/n 28040 Madrid
Phone: 00 34 91 3303413
Fax: 00 34 91 3303299
e-mail: aportoles.hcsc@salud.madrid.org
Coordinator: Dr. Antonio Portolés

Location:

The Unit is located in the Hospital Clínico San Carlos, a third-level hospital with 1200 beds, including all medical disciplines. A complete renovation was undertaken recently, which provided the hospital with the most modern facilities and technologies.

The hospital, with a strong research and teaching background, has provided complete support to the Unit since its creation, assisting the Unit and supplying the necessary resources and equipment. Research is essential to the Hospital; with an Independent Ethics Committee that supervises about 200 clinical trials a year, with biweekly meetings, and considered as one of the most efficient committees in Spain.

Facilities:

The Clinical Pharmacology Study Unit is part of the Department of Clinical Pharmacology. Located on the first floor, in direct connexion with Emergencies and the Intensive Care Unit, it offers the maximum safety guarantees for our volunteers.

The Unit comprises about 350 m2, which include laboratory, exploration room, archives, library, meeting room, offices, administrative area and subject's facilities (two rooms with three beds each, living room and dinning room).

Since its creation in 1985, the Clinical Pharmacology Department was certified for 1resident training, and undertook undergraduate and graduate education (including PhD studies and continuing education courses). As health care providers, our activity is part of the National Health system and the Hospital management plan.

The Clinical Pharmacology Study Unit was established in 1998 and since then our clinical research output has expanded rapidly.

Staff:

The Unit provides clinical research support services with experienced faculty and staff which include: 14 physicians (Head of Department, 5 specialists in Clinical Pharmacology and 8 residents in Clinical Pharmacology), 9 nurses (2 complete, 7 partial dedication) and 3 secretaries.

Recent research:

The Clinical Pharmacology department has participated in numerous research projects and has received public (DGF and FISS) and private funding. Fifteen PhD theses have been written over the last years.

Research has basically focused on Pharmacoepidemiology and Pharmacokinetics. More than ten pharmacoepidemiologic studies using advanced methodology, statistics and computing have been performed during the past five years.

The unit has also conducted over 70 clinical trials since 1998; mostly concerning pharmacokinetics, interactions, bioavailability, pharmacokinetic or pharmacodynamic bioequivalence and safety.

The research activity of the Department is completed with pharmacokinetic and drugutilization studies (generally as part of the prescription advising role within the Hospital), methodological counselling in numerous phase II, III and IV clinical trials, elaboration of expert reports or participation in drug evaluation programs.

Study subjects:

Our database is composed of more than 1500 volunteers, which allow us to perform an efficient recruitment in a short period of time.

Quality:

Our unit offers the best quality guarantees. In December 2002 we obtained the ISO9002, later converted to ISO9001/2000, presently certified under ISO9001/2008 rules. In 2004 we obtained the credential as Bioequivalence Centre (Clinical and Statistical Phase) by the National Health Surveillance Agency of Brazil.

Short CV

PROFESSIONAL EXPERIENCE

Since - 2000: Clinical Pharmacology Consultant in University Hospital "Puerta de Hierro".
1997 - 2000. Clinical Pharmacology Service in Hospital "La Paz" Clinical Pharmacokinetic. Monitoring medicinal products. Hospital pharmacovigilance. Therapeutic consultations. Drug utilisation research studies. Pharmacoeconomic studies. Collaboration in the methodological and ethics assessment of Clinical trials phase I-IV, which were evaluated in the Ethic Committee of the Hospital "La Paz" Clinical trials Unity: Clinical investigator Performance of phase I-IV clinical trials, including design and analysis of data.
1996 - 1997. Internal medicine, Haematology, Intensive care, Nefrology Services, in Hospital "La Paz" Clinical activity with hospitalised patients in the different service above cited.
1996 - 2000. Emergency Service in Hospital "La Paz" Between four and seven sessions per month in the mentioned service.

Short CV (cont.)

ACADEMIC ACTIVITY

1998-2000 Collaboration as professor in doctorate course imparted by Clinical Pharmacology Service of Hospital "La Paz", belong to program doctorate of Pharmacology and Therapeutics of Autonoma University.

1999-2002 Collaboration as professor in several courses related to Clinical and General Pharmacology (3º - 6º course)

2002-2006 Professor in the Course of European Procedure of Registry of Drugs, organizated by The Official College of Pharmacist of Madrid.

OTHER RELEVANT INFORMATION

EMEA expert. Member of the Spanish Society of Clinical Pharmacology. Trained yearly in Good Clinical Practice

Unidad de Investigación Farmacológica. Hospital Universitario Puerta de Hierro Majadahonda

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

None

Audits by regulatory agencies (last 3 years)

None

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? **N/A**

Audits by sponsors (last 3 years)

Yes 2012/2013/2014

Do you follow your own Standard Operating Procedures (SOPs)? Y Do you supply with a SOP copy to a sponsor if requested? Y

Would you follow the sponsor SOPs if requested: Yes, if they fulfil our Unit requirements

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: 4

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

In our Unit we work following Good Clinical Practice as well as the ethical principles subscribed at Helsinki Declaration and The Convention on Human Rights and Biomedicine (Oviedo Convention). The Royal Decree-Law 223/2004 for the regulation of clinical trials is enforced. The personal and clinical data of patients/volunteers who participate in clinical trials are kept locked at the Unit and only the staff involved in the study have access to this information. Patient/volunteers personal data are codified according to sponsor requirements. The name of the volunteers/patients will only be shown at clinical notes, informed consent and volunteers/patients logs which will be kept at the Unit.

Unidad de Investigación Farmacológica. Hospital Universitario Puerta de Hierro Majadahonda

Facilities

Year of Unit building	2007	Last Unit reform	None
Usable space	150m2	The Unit building is separate from the linked hospital	No
Number of CTs the unit could perform simultaneously	4	Number of beds	2
Beds distribution	1 room with 2 beds		
Beds distribution allows a complete and continuous visual control by nurses			Yes
Number of bed with intensive or continuous monitoring	2	Number of armchairs suitable for subject monitoring	6
Owned kitchen	No	Meals supervision by dietician	Yes
Dining-room available for volunteers	Yes	Individual lockers available for volunteers	Yes
Relaxing room available for volunteers independent from the beds area			Yes
Availability in the unit of an emergency trolley for cardiopulmonary resuscitation			Yes
The emergency trolley has available suitable medications with immediate by controlled access			Yes
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)	Yes/ALS		
Unit availability of an evacuation plan for volunteers in emergency situations			Yes
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			Yes
Volunteers/patients healthcare would be covered by the national or the regional health system if required			Yes
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers	A+E, ICU, OR, as required		
Distance and time to get the former services	In site		
Unit entrance/Exit door controlled	Yes, key	Unit with Closed Circuit Television	No
Availability of an alternate electrical generating set that automatically works in case of a general system failure			Yes

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit:

1 Physician **1** Nurse

Unidad de Investigación Farmacológica. Hospital Universitario Puerta de Hierro Majadahonda

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameters)	Yes
The quality assurance activities are subcontracted by the Unit	Yes
Availability of a specific area for drug storing and preparation of medications for the study	Yes
The former area or room has restricted access by key or code	Yes
Laminar flow chamber availability for preparation of parenteral treatments	Yes
Perfusion pumps for intravenous treatment	Yes
Who is the responsible for drug preparation and dispensing	**Dispensing:** pharmacist/nurses depending on the trial requirements **Preparation**: pharmacist/nurses depending on the trial requirements
Drug accountability procedures, such as reception, preparation and dispensing forms	Yes
SOPs available for drug preparation and dispensing	Yes
SOPs available for drawing and managing of biological fluids	Yes
System or procedure used for samples identification	
Bar codes stickers with name and ID number	
Availability of a specific area for blood samples managing	Yes
The former area or room has restricted access by key or code	Yes
Number of centrifuges available	2
System for plasma/fluids samples storing	freezer
Fridges and freezers available in the Unit	3
The Unit has its owned Bioanalytical Department	No
Availability of genotyping or fenotyping methods for participants	No at site, subcontracting is possible

Unidad de Investigación Farmacológica. Hospital Universitario Puerta de Hierro Majadahonda

Services Capabilities

Data Management and software used (describe)	Yes if software is provided by sponsor. Otherwise, it is subcontracted at Universidad Autonoma de Barcelona
Biometry or Statistical Analysis and software used (describe)	SPSS
Pharmacokinetic Analysis and software used (describe)	WinNolin
Medical Writing and skilled languages	Yes, English
Owned archives in the same Unit building (describe)	Yes. Aprox 15-20 clinical trials archives can be stored at site in locked cabinets. If more space is required, it is subcontracted with Iron Mountain, external archive.

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

ISF with all the documents within: informed consent forms, contracts, SUSARs, protocols, IB, CRF at least for 15 years or as required by sponsor.

The study files are digitized and converted in a CD or web format	Yes
Project management	Yes

Unidad de Investigación Farmacológica. Hospital Universitario Puerta de Hierro Majadahonda

Study participants

Kind of participants included in clinical trials performed in the Unit

X Healthy volunteers X Patients

Other populations

If the Unit has experience in oncology, detail kind of tumour and age groups

Solid tumour Haematological tumour X Adults X Paediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

Recruiting methods for healthy volunteers

Recruiting it is done according to the Unit SOPs and the specific protocol. Most of the volunteers are Medicine/Nursing students.

Recruiting methods for patients

In collaboration with other clinical departments at the hospital, through the principal investigator of every trial, according to the Unit SOPs

Do you have surgery rooms available for screening (separated from the in-house area)? (number) Yes, 1

Do you keep a paper or electronic database of volunteers? (describe) No

Have you implemented any measure for avoiding the over-volunteering? (describe) Yes

According to Royal Decree-Law 223/2004, no more than 3 trials/year. The data will be checked through the clinical notes of the volunteer/patient.

Unidad de Investigación Farmacológica. Hospital Universitario Puerta de Hierro Majadahonda

Pharmacodynamic/Pharmacokinetic Capabilities

Digital blood pressure devices (number)	4	Pulsioximetry devices (number)	2	12-leads ECG devices (number)	2

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	Yes, 1(2005), 2 (2008), 1 (2013)
Availability in the Unit of tests for assessing CNS drug effects	
Familiarity in poblational analysis and PK/PD modelling, including writing of clinical reports	Subcontratad at Universidad Autonoma de Madrid
Familiarity with Electronic Data Capture –EDC applied to clinical trials	Yes
Experience in other kind of PD or PK evaluations not formerly collected	

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

Regular collaborations with pharmaceutical companies and independent researches

Unidad de Investigación Farmacológica. Hospital Universitario Puerta de Hierro Majadahonda

Accreditations and audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

Health Council, Community of Madrid

Audits by regulatory agencies (last 3 years) None

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? Yes

Audits by sponsors (last 3 years)

None

Do you follow your own Standard Operating Procedures (SOPs)? Yes Do you supply with a SOP copy to a sponsor if requested? Yes

Would you follow the sponsor SOPs if requested: The unit could follow the SOPs of the sponsor assuming they do not conflict with those of the unit.

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial:

The internal audit plan of the unit is 1 year and may increase its frequency depending on the number of trials and patients recruited.

Audits for a clinical trial would be the ones indicated by the promoter.

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

In compliance with the Data Protection Act, we have developed a security document in which are collected, among other things, all technical procedures that have been adopted and implemented at the Institute of Health Research Puerta de Hierro for proper use of the information systems as required by the rules of data protection as well as correct treatment of personal data as warranty of its confidentiality and integrity. Specifically, we have defined the following procedures and standards:

- Delegation of authorizations
- Access data over communications networks
- Working outside local files
- Temporary files
- Backup & Recovery
- Physical Access Control
- Tests with real data
- Incident Record
- Support and Document Management
- Identification and Authentication
- Creating and Using Passwords
- Custom treatment

Who is the responsible for drug preparation and dispensing	**Dispensing:** NURSE **Preparation**: PHARMACY DEPARTMENT
Drug accountability procedures, such as reception, preparation and dispensing forms	YES
SOPs available for drug preparation and dispensing	YES
SOPs available for drawing and managing of biological fluids	NO
System or procedure used for samples identification	Identification sticker with barcode
Availability of a specific area for blood samples managing	YES
The former area or room has restricted access by key or code	YES
Number of centrifuges available	1
System for plasma/fluids samples storing	Unit´s own fridge and freezer
Fridges and freezers available in the Unit	2
The Unit has its owned Bioanalytical Department	NO
Availability of genotyping or fenotyping methods for participants	NO

Unidad de de Estudios de Medicamentos en Fase Temprana ONCO-FI. HUPH Majadahonda

Services Capabilities

Data Management and software used (describe)	NO
Biometry or Statistical Analysis and software used (describe)	NO
Pharmacokinetic Analysis and software used (describe)	NO

Medical Writing and skilled languages

Owned archives in the same Unit building (describe) YES

The hospital has an active file with an approximate area of 1000 m2́ and a capacity of 200,000 clinical records. Restricted access and registration of inputs and outputs available.

It also has a passive file where the documentation is kept indefinitely (IRON MOUNTAIN)

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

Once the trial is completed, all documentation related is sent to the external file of the hospital IRON MOUNTAIN (Daganzo de Arriba) where it can be stored indefinitely so as to recover if necessary for any inspection or audit

The study files are digitized and converted in a CD or web format	NO
Project management	NO

Unidad de de Estudios de Medicamentos en Fase Temprana ONCO-FI. HUPH Majadahonda

Study Participants

Kind of participants included in clinical trials performed in the Unit

	Healthy volunteers	X	Patients
	Other populations		

If the Unit has experience in oncology, detail kind of tumour and age groups

X	Solid tumour		Haematological tumour	X	Adults		Pediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

LUNG, BREAST, COLORECTAL, LYNPHOMA, GASTRIC…

Recruiting methods for healthy volunteers

THERE IS NO RECRUITMENT OF HEALTHY PATIENTS

Recruting methods for patients

Patients are recruited from our own service but can also be referred from other hospitals

Do you have sugery rooms available for screening (separated from the in-house area)? (number)	YES
Do you keep a paper or electronic database of volunteers? (describe)	NO
Have you implemented any measure for avoiding the over-volunteering? (describe)	NO

Unidad de de Estudios de Medicamentos en Fase Temprana ONCO-FI. HUPH Majadahonda

Pharmacodynamic/Pharmacokinetic Capabilities

Digital blood pressure devices (number)	1	Pulsioximetry devices (number)	1	12-leads ECG devices (number)	1

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	Cardiology department collaborates regularly and are responsible for such assessments
Availability in the Unit of tests for assessing CNS drug effects	YES
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	NO
Familiarity with Electronic Data Capture –EDC applied to clinical trials	YES (SINCE 2008, 50 STUDIES approximately)
Experience in other kind of PD or PK evaluations not formerly collected	NO

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

NO

Unidad de de Estudios de Medicamentos en Fase Temprana ONCO-FI. HUPH Majadahonda

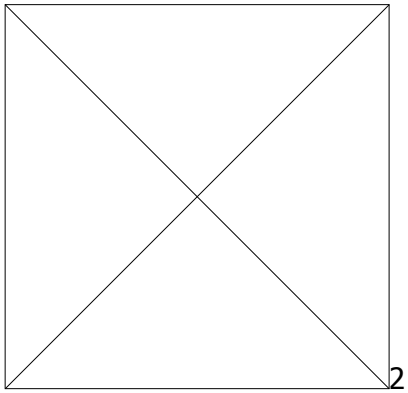
Short CV

Head of the Clinical Pharmacology Unit at the Ramon y Cajal Hospital since October 2003 and manager of the Clinical Trial Unit since 2009. Vice President of the Ethical committee of the hospital Ramon y Cajal. Executive Committee member and Training Manager of the Spanish platform of clinical trials (SCReN)

Unidad de Ensayos Clínicos. Hospital Ramón y Cajal

Accreditations and audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years



2 accreditations by the Council of Health of the Community of Madrid. The first in October 2012 for two years. In October 2013 it was re-accredited for a period of four years

Audits by regulatory agencies (last 3 years)

None

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? Yes

Audits by sponsors (last 3 years)

Yes

Do you follow your own Standard Operating Procedures (SOPs)? Yes Do you supply with a SOP copy to a sponsor if requested? Yes

Would you follow the sponsor SOPs if requested: Yes

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: One per year by the quality manager

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

We have specific SOPs and Data are included in the hospital Clinical Investigation File

Unidad de Ensayos Clínicos. Hospital Ramón y Cajal

Facilities

Year of Unit building	1980	Last Unit reform	2009
Usable space	200m2	The Unit building is separate from the linked hospital	No
Number of CTs the unit could perform simultanously	4-5	Number of beds	4/8
Beds distribution	2 per room		
Beds distribution allows a complete and continuous visual control by nurses			
Number of bed with intensive or continuous monitoring	4	Number of armchairs suitable for subject monitoring	8
Owned kitchen	yes	Meals supervision by dietitian	yes
Dining-room available for volunteers	yes	Individual lockers available for volunteers	yes
Relaxing room available for volunteers independent from the beds area			yes
Availability in the unit of an emegency trolly for cardiopulmonary resuscitation			yes
The emergency trolly has available suitable medications with immediate by controlled access			yes
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)	yes		
Unit availability of an evacuation plan for volunteers in emergency situations			yes
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			yes
Volunteers/patients healthcare would be covered by the national or the regional health system if required			yes
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers	Intensive Care Unit		
Distance and time to get the former services	Several floors below (5 minutes taking the elevator) but the intensivist physician attends the unit to the emergency call		
Unit entrance/Exit door controlled	yes	Unit with Closed Circuit Television	yes
Availability of an alternate electrical generating set that automatically works in case of a general system failure			yes

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit

Physician Nurse

Unidad de Ensayos Clínicos. Hospital Ramón y Cajal

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameteres)	yes
The quality assurance activities are subcontracted by the Unit	no
Availability of a specific area for drug storing and preparation of medications for the study	yes
The former area or room has restricted access by key or code	yes
Laminar flow chamber availability for preparation of parenteral treatments	No, it is available in the Pharmacy
Perfusion pumps for intravenous treatment	yes
Who is the responsible for drug preparation and dispensing	**Dispensing:** Nurse or MD **Preparation**: pharmacist and nurse
Drug accountability procedures, such as reception, preparation and dispensing forms	yes
SOPs available for drug preparation and dispensing	yes
SOPs available for drawing and managing of biological fluids	Yes (still in preparation)
System or procedure used for samples identification	still in preparation
Availability of a specific area for blood samples managing	yes
The former area or room has restricted access by key or code	yes
Number of centrifuges available	one
System for plasma/fluids samples storing	yes
Fridges and freezers available in the Unit	One fridge and two freezers (-80ºC and -20ºC)
The Unit has its owned Bioanalytical Department	no
Availability of genotyping or fenotyping methods for participants	No but we collaborate closely with the laboratory that performs the analysis

Unidad de Ensayos Clínicos. Hospital Ramón y Cajal

Services Capabilities

Data Management and software used (describe)	CTMS (Clinical Trial Management System), Pharmacovigilance database (PcV manager "excedo")
Biometry or Statistical Analysis and software used (describe)	yes
MACRO	
Pharmacokinetic Analysis and software used (describe)	yes
Winnonlin	
Medical Writing and skilled languages	yes
Owned archives in the same Unit building (describe)	
locked cabinets, which is controlled by the Unit Manager	
Regarding a specific clinical trial what documents are sent to the archives and for long time are archived	
All documents are archived for 15 years in an specific file after trial completion	
The study files are digitized and converted in a CD or web format	Not yet
Project management	yes

Unidad de Ensayos Clínicos. Hospital Ramón y Cajal

Study Participants

Kind of participants included in clinical trials performed in the Unit

Healthy volunteers x Patients x

Other populations

If the Unit has experience in oncology, detail kind of tumour and age groups

Solid tumour x Haematological tumour x Adults x Pediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

Any type of tumor. There are currently trials on different type of cancer

Recruiting methods for healthy volunteers

We have a database

Recruting methods for patients

Doctors who are part of the research team recruited patients who visit the clinic

Do you have sugery rooms available for screening (separated from the in-house area)? (number) Yes

Do you keep a paper or electronic database of volunteers? (describe) Yes

Yes, a database with minimal information: ID number card, age, gender, contact address and phone number

Have you implemented any measure for avoiding the over-volunteering? (describe)

Internal control. In addition, the subject is asked about their participation in clinical trials in other units

Unidad de Ensayos Clínicos. Hospital Ramón y Cajal

Pharmacodynamic / Pharmacokinetic Capabilities

Digital blood pressure devices (number)	Yes, 6	Pulsioximetry devices (number)	6	12-leads ECG devices (number)	Yes, 1

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	yes
Availability in the Unit of tests for assessing CNS drug effects	hospital resources
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	yes
Familiarity with Electronic Data Capture –EDC applied to clinical trials	yes
Experience in other kind of PD or PK evaluations not formerly collected	no

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

some collaborations with the pharmaceutical industry

Annexes Brochure

SERVICES PORTFOLIO

The CTU is prepared for the admission of patients or healthy volunteers in phase I studies. Phase II to IV studies are conducted in a collaboration with several other clinical services which can include , but are not limited to nursing support and specific visits according to protocol, this may include studies with medical products, medical devices, diagnostic techniques, etc.

Furthermore, CTU staff assits in:

1. Support to the investigator/sponsor in design of the protocol, CRF and/or informed consent form and implementation of different clinical studies.
2. Monitoring of clinical trials and observational studies.
3. Analysis of results and elaboration of final and annual reports.
4. Support in the process to submit the request of the clinical study to EC and AEMPS according to the current legislation.
5. Pharmacovigilance activities: assessment of serious adverse events and reporting if applicable

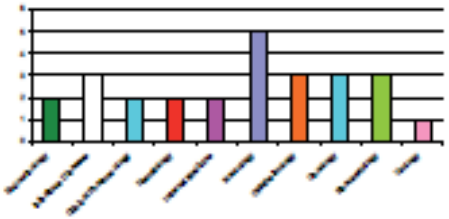

Figure 1. Number of Clinical Trials (CT) with hospital admissions in the CT Unit, by Service, during 2012

In addition, the CTU has assisted in the implementation, administrative procedures, and monitoring of 27 CT from different Hospital Services

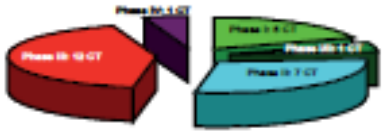

Figure 2. Phase of CT performed in the CT Unit during 2012

Annexes Brochure

Contribute to innovation in the field of biosciences is our main objective. Clinical research with medicinal products is a paradigm of this innovation. We consistenly wish to participate in the creation in Spain of a platform of excellence. Therefore, we present this new set of goals that aim to improve our efficiency and competitiveness.

COMMITMENT WITH THE DEADLINES IN CLINICAL TRIALS

Before the aproval of the Ethics Commitee (EC)

- Will not exceed **60 days**, since the validation of the documentation, when the Hospital Universitario Ramón y Cajal (HURYC) is the Reference EC.
- Will give an expert report **within 30 days** when the HURYC acts as the local EC.
- For single-center phase I clinical trials (CT), a clinical pharmacologist will make an assessment prior to the evaluation by the EC and the deadline for approval will be in **30-45 days.**

Time to aproval of the Center

Aproval will be released at the same time that the opinion of the EC.

Time of execution of the contract

In this case, it is a commintment shared with the sponsors, which can only be be met if there are no delays by part of sponsor

- Contract management in parallel with the presentation of the CT to the EC.
- Signature of the Contract made before the CT has obtained relevant authorizations but with a clause stating that the CT will not start until the corresponding authorizations have been sent to the Centre.

COMMITMENT WHIT THE RECRUITMENT OF THE PATIENTS

- The principal investigator (PI) performs a pre-selection of patients coinciding with the entry of the CT for its assessment by the EC of the Center.
- The PI is informed in time to sign the contract and bearing in mind the start date and deadline of the trial.
- Certain measure have been established for researchers to comply with the deadlines and for the inclusion of the first patient as well as anticipated recruitment of patients.

COMMITMENT WITH THE RESEARCH IN EARLY PHASES

The Phase I Clinical Trials Unit (CTU) of the Hospital Universitario Ramón y Cajal has been certified by the General Department of Evaluation and Control of the Ministry of Health of the Community of Madrid in September 2012.

COMMITMENT WITH THE PATIENTS AND THE HEALTY VOLUNTEERS INVOLVED IN CT

The creation of the CTU has improved the comfort and well-being of patients. Until now, the CTU has been used by 181 patients and 24 healthy volunteers. In a recently conducted survey, 97% of our users would return to participate in a clinical trial. The assessment about our facilities received a "very good" and "excellent" valuation by 82% of respondents and the personal attention was considereded "very good" and "excellent" by 94%

PHASE I CLINICAL TRIAL UNIT OF HOSPITAL RAMÓN Y CAJAL. IRYCIS

The Clinical Research Unit (CRU) is located in the hospital itself, on the 7th floor, but in an independent area with a private entrance. It has easy access to the emergency services.

STAFF: All personel in the Unit are specialized in clinical research. The current staff is as follows:

- Three Clinical Pharmacologists
- One Clinical Research Associate (CRA).
- One Research Nurse and Laboratory Technician
- One Technical Specialist in economic management of clinical trials

INFRASTRUCTURE:

Hospital ward. Four beds and eight fully reclining chairs, oxygen uptake, vital signs monitors, central monitoring system, synchronized clocks, security cameras, continuous monitoring system defibrillator and resuscitation equipment.

Laboratory. Equipment for processing biological samples, refrigerated centrifuge, refrigerator and freezers (-20ºC and -80ºC) to store biological samples gifted with temperature control and alarm system.

Multipurpose room. Conference room with TV, Internet, Bed-sofa, Lockers and can also be utilized as a waiting area.

Medical Office. a separate area for medical examination to ensure privacy. It includes: a scale to measure weight, height and BMI; electrocardiograph and viewbox.

Nursing control

Staff office. A computer connected to the hospital intranet with access to patient files and file cabinets for documents relating to the clinical trial.

Have you implemented any measure for avoiding the over-volunteering? (describe) Yes

Previous studies data (volunteers participation) is checked in order to prevent a volunteer participation to be repeated in less than 3 months

Unidad Central de Investigación Clínica y Ensayos Clínicos. Hospital Universitario La Paz

Pharmacodynamic/Pharmacokinetic Capabilities

Digital blood pressure devices (number)	4	Pulsioximetry devices (number)	5	12-leads ECG devices (number)	1

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	Yes, during the last 4 years, in about 5 studies/year
Availability in the Unit of tests for assessing CNS drug effects	No
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	Yes, 2 per year (Nonmen® y R)
Familiarity with Electronic Data Capture –EDC applied to clinical trials	Yes, in about 7 studies/year for the last 7 years
Experience in other kind of PD or PK evaluations not formerly collected	
Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted	

Unidad Central de Investigación Clínica y Ensayos Clínicos. Hospital Universitario La Paz

Ownership

Ownership	START (South Texas Accelerated Research Therapeutics)
Established	2008
Linked hospital	Hospital HM Universitario Sanchinarro
Distance between linked hospital and Unit	Unit inside Hospital
Linked Ethics Committee (CEIC)	

Unit Manager

First and last names	Emiliano Calvo
Qualifications	MD, PhD
Medical specialty	Oncologist
Manager since	2008
E-mail and phone	Emiliano.calvo@start.stoh.com 0034 91 756 78 25

Short CV

Director of Clinical Research and Head of the START Madrid Programme of Early Clinical Development in Madrid, Spain, as well as Associate Professor of Oncology at the University CEU San Pablo, Madrid, and co-founder and president of Foundation Intheos (Investigational Therapeutics in Oncological Sciences)
He earned his M.D. in 1993 at the Universidad Autónoma de Madrid in Madrid, Spain and his Ph.D. in 2003 at the Universidad de Navarra in Pamplona, Spain, with highest commendation. He trained in Medical Oncology at the Clínica Universitaria de Navarra in Pamplona, Spain. He completed his Advanced Fellowship in Drug Development at the Cancer Therapy & Research Center's Institute for Drug Development in San Antonio, Texas, from 2003 to 2005, where he was a Senior Fellow and Clinical Investigator.
While working in the Medical Oncology Department at the Hospital Vall d'Hebron in Barcelona, Spain, Dr. Calvo headed the Brain Tumors Area from 2007 until 2008, the Genitourinary Tumor and Sarcoma Area from 2006 until 2008, the Pharmacokinetics Unit from 2005 until 2008, and was Co-Director and Senior Researcher of the Phase I Unit.

Unidad de Ensayos START Madrid-CIOCC. Hospital HM Universitario Sanchinarro

Ownership

Unit Manager

Nombre y apellidos	Emiliano Calvo Aller

Short CV (cont.)

Dr. Calvo's major interests are the early clinical development of novel anticancer drugs, and pharmacokinetics.
Dr. Calvo has co-authored more than 100 scientific articles, abstracts and oncology book chapters, and is an international lecturer on drug development in multiple conferences and meetings, and a reviewer for several oncology journals He has also participated in approximately 90 clinical trials, two thirds of them in Phase I international studies, as an investigator. He serves as an ad-hoc reviewer of various oncology journals.
He is a faculty member of the Educational Committee of ESMO and a member of the Scientific Committee of the ESMO-ECCO (European CanCer Organisation) Multidisciplinary Congress, for the Drug Development track committee, and the non-prostate genitourinary committee, and is also currently a member of the Scientific Program Committee on the Developmental Therapeutics - Clinical Pharmacology & Experim Track of ASCO, and an international member of the peer review panel for the National Cancer Research Institute of Renal Clinical Studies Group of the United Kingdom. Also, he serves as a member of the Scientific Committee of the EORTC-NCI-AACR annual Symposium on Molecular Targets and Cancer Therapeutics on early clinical drug development in Oncology
Dr. Calvo is a member of the European Organization for Research and Treatment of Cancer, American Society of Clinical Oncology, the Sociedad Española de Oncología Médica, and the European Society of Medical Oncology.

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

January 2013, Certificate of Excellence in ICH GCP Guidelines and Oncology Phase I Unit Requirements by Comunidad Autónoma de Madrid (CAM).

Audits by regulatory agencies (last 3 years)

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? **Yes**

Audits by sponsors (last 3 years)

March 2012, Roche by Covance (CRO)

June 2012, Pharmamar

August 2014, Janssen-Cilag

Do you follow your own Standard Operating Procedures (SOPs)? Yes Do you supply with a SOP copy to a sponsor if requested? No

Would you follow the sponsor SOPs if requested: Yes

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: 2

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

Electronic Medical Records restricted access by user and password. Paper source documentation and study files are stored in a secure and restricted area of the Unit.

Unidad de Ensayos START Madrid-CIOCC. Hospital HM Universitario Sanchinarro

Facilities

Year of Unit building	2008	Last Unit reform	2011
Usable space	250	The Unit building is separate from the linked hospital	No
Number of CTs the unit could perform simultanously	6 treatment chairs	Number of beds	40
Beds distribution			
Beds distribution allows a complete and continuous visual control by nurses			Yes
Number of bed with intensive or continuous monitoring	6 chairs	Number of armchairs suitable for subject monitoring	6
Owned kitchen	Hospital kitchen	Meals supervision by dietitian	yes
Dining-room available for volunteers	yes	Individual lockers available for volunteers	No, only at bedrooms
Relaxing room available for volunteers independent from the beds area			yes
Availability in the unit of an emegency trolly for cardiopulmonary resuscitation			yes
The emergency trolly has available suitable medications with immediate by controlled access			yes
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)	Yes, advanced		
Unit availability of an evacuation plan for volunteers in emergency situations			yes
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			yes
Volunteers/patients healthcare would be covered by the national or the regional health system if required	Private insurance		
Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers			yes
Distance and time to get the former services	Unit inside the hospital		
Unit entrance/Exit door controlled	yes	Unit with Closed Circuit Television	no
Availability of an alternate electrical generating set that automatically works in case of a general system failure			yes

Unidad de Ensayos START Madrid-CIOCC. Hospital HM Universitario Sanchinarro

Facilities

Unit distribution plan: Not available

Unidad de Ensayos START Madrid-CIOCC. Hospital HM Universitario Sanchinarro

Staffing and Resources

Unit employees

Permanent staff 20 Fixed-term/contracted staff (internship, grant holders) Part-time collaborators

Distribution of Unit staff by functions

Function	Permanent staff	Contracted or part-time staff
Principal Investigator	1, 2, 3, 4, 5	
Co-investigator (physician)	2, 3, 4, 5	
Nurse	6, 7, 8, 9, 10, 11, 12,	
Monitor or CRA		
Pharmacist	18	
Biometry		
Data management	13, 14, 15, 16, 17	
Medical writing		
Pharmacokinetics		
Quality assurance	1, 6, 13, 18	
Project Management		
Finance		
Recruitment		
IT (informatics)		
Other (specify): Pharmacy technician, and Scheduler	19, 20	

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit

X Physician **X** Nurse

Unidad de Ensayos START Madrid-CIOCC. Hospital HM Universitario Sanchinarro

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameteres)	yes
The quality assurance activities are subcontracted by the Unit	sponsor
Availability of a specific area for drug storing and preparation of medications for the study	yes
The former area or room has restricted access by key or code	Yes
Laminar flow chamber availability for preparation of parenteral treatments	yes
Perfusion pumps for intravenous treatment	yes
Who is the responsible for drug preparation and dispensing	**Dispensing:** Pharmacist, and Nursing for IV treatment **Preparation**: Pharmacist
Drug accountability procedures, such as reception, preparation and dispensing forms	yes
SOPs available for drug preparation and dispensing	yes
SOPs available for drawing and managing of biological fluids	yes
System or procedure used for samples identification	Identification according to SOP of local lab or central lab
Availability of a specific area for blood samples managing	yes
The former area or room has restricted access by key or code	yes
Number of centrifuges available	2
System for plasma/fluids samples storing	Freezer or refrigerator
Fridges and freezers available in the Unit	3
The Unit has its owned Bioanalytical Department	no
Availability of genotyping or fenotyping methods for participants	yes

Unidad de Ensayos START Madrid-CIOCC. Hospital HM Universitario Sanchinarro

Services Capabilities

Data Management and software used (describe)	sponsor
Biometry or Statistical Analysis and software used (describe)	sponsor
Pharmacokinetic Analysis and software used (describe)	sponsor
Medical Writing and skilled languages	English and spanish

Owned archives in the same Unit building (describe)

Storage restricted area for owned archives

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

The company "Recall Management" is used to store archives for long period of time (the years required by law)

The study files are digitized and converted in a CD or web format	no
Project management	sponsor

Unidad de Ensayos START Madrid-CIOCC. Hospital HM Universitario Sanchinarro

Study Participants

Kind of participants included in clinical trials performed in the Unit

Healthy volunteers	Patients	Yes, all tumor types
Other populations		

If the Unit has experience in oncology, detail kind of tumour and age groups

All	Solid tumour	All	Haematological tumour	X	Adults		Pediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

All tumor types

Recruiting methods for healthy volunteers

Recruting methods for patients

We are a highly specialized Early Clinical Anticancer Drug Development Program (www.startmadrid.com), with experience in all type of early Phase 1 trials (FIH, FIC, Phase 1b, Phase 1b/2, DDI, Mass Balance, molecular-based selection targeted drugs, tumor type specific expansion cohorts, etc), and fully dedicated and trained/experienced staff for these type of studies, in all the required specialized positions.

We are integrated in the Centro Integral Oncologuico Clara Campal (CIOCC), an oncology center that sees 2500 new patients per year. 80% of our patients are reffered from CIOCC, and 20 % are reffered from other private hospitals in Spain or around the world.

We perform weekly phase I meetings to inform about availability of these studies to Oncologists Head of each tumor type in the Hospital

Do you have sugery rooms available for screening (separated from the in-house area)? (number)	Yes (4)
Do you keep a paper or electronic database of volunteers? (describe)	no

Have you implemented any measure for avoiding the over-volunteering? (describe)

Unidad de Ensayos START Madrid-CIOCC. Hospital HM Universitario Sanchinarro

Pharmacodynamic/Pharmacokinetic Capabilities

Digital blood pressure devices (number)	1	Pulsioximetry devices (number)	1	12-leads ECG devices (number)	2

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	yes
Availability in the Unit of tests for assessing CNS drug effects	no
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	yes
Familiarity with Electronic Data Capture –EDC applied to clinical trials	yes
Experience in other kind of PD or PK evaluations not formerly collected	yes

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

Annexes

START (South Texas Accelerated Research Therapeutics) Madrid refers to the international program START of Oncology Early Clinical Drug Development, located in Madrid, Spain.
The mission of START is to accelerate the development of new anticancer drugs with the purpose of improving quality of life and survival for patients with cancer. With increased international presence, START has taken the first step toward establishing an around-the-clock presence in its development of anticancer agents.
START Madrid shares the same SOPs, highly specialized organization, central budgeting, efficient and proactive IRBs, IT systems, expert and fully dedicated staff, as it occurs in the original START in San Antonio (USA).
START Madrid has currently two sites located in Madrid, Spain's capital city of six million residents: START Madrid-CIOCC, since 2008, and START Madrid-FJD, launched in 2013. START Madrid-FJD is located in a National Health Public System Hospital, and START Madrid-CIOCC is located in a Private Hospital. Both sites are synergistic, because while START Madrid-CIOCC treats patients that belong to the private health system, START Madrid-FJD treat those from the public health system, and, all together, provide us with a total population base of around 5,000 new Oncology patients taking together the Medical Oncology departments of both Cancer Centers where our START Madrid units are located, which potentiate recruitment possibilities in any indication within our excellence quality environment for Ph1 studies.
This way, START Madrid is able to provide all patients from Madrid and abroad with access to our innovative drugs, regardless of their health coverage system, without exceptions.
START Madrid is an institutional priority of Fundación Jiménez Díaz (FJD), integrated within the Center's major Oncology Group. As a consequence, START Madrid-FJD is able to obtain daily referrals from these Oncologists consistent with selection criteria of our active studies. In addition, there are weekly Phase 1 meetings with the general oncology group, at which time available slots are noted and recruitment of eligible patients is promoted.
About two thousand new cancer patients come to the Oncology Department of FJD every year. Furthermore, **FJD is a referral Hospital for two other Centres located in Madrid surrounding areas (Rey Juan Carlos Hospital at Mosotoles and Infanta Elena at Valdemoro) that share common management by IDC-Salud.** In addition, START Madrid-FJD sees patients referred directly from other public hospitals of Spain to be considered for phase I clinical trials.

Qualifications	Professor of Medicine Head, Medical Oncology Service
Medical specialty	Medical Oncology
Manager since	Since 2010
E-mail and phone	mmartin@geicam.org +34 91 586 8115

Short CV

Prof. Miguel Martin is currently Head of the Medical Oncology Service at the Hospital General Universitario Gregorio Marañón in Madrid (Spain).
He is also a Professor of Medical Oncology at the Complutense University of Madrid.
Since 1990, Prof. Martin is fully devoted to breast cancer research and treatment.
His main areas of research are systemic treatment of breast cancer, where he has led m national and and international clinical trials, and genomic/molecular characterization of breast cancer.
Prof. Martin is the Chairman of GEICAM (Spanish Group for Breast Cancer Research), a cooperative network involving more than 170 Spanish institutions.
He is a founder member of CIRG -Cancer International Research Group-, an International Cooperative Group (now named TRIO).

Short CV

Head of Clinical Pharmacology Service (Clínica Universidad de Navarra)

Director of Clinical Research Unit (Clínica Universidad de Navarra)

Professor of Clinical Pharmacology (School of Medicine and School of Nursing), University of Navarra. Pamplona, Spain. Acredited by the Ministry of Education (Spanish National Agency for Quality Assessment and Accreditation - ANECA).

Academic Division President of Official School of Doctors of Navarra.

President of Continued Medical Training Commission. Government of Navarra.

He has been a part of a work-team in some financed research projects in competitive calls.

As a researcher, he has also participated in more than 100 clinical trial, especially in phases I in healthy volunteers and in phases III in patients.

Director of 7 doctoral dissertations and examiner of more than 25 ones.

311 scientific articles, 106 communications presented to National and International Medical Congresses, 35 books, 115 chapters of books written in collaboration.

400 lectures and 70 practical university teaching courses.

Unidad de Investigación Clínica - Clínica Universitaria de Navarra

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

No the Clinical Research Unit by itself, but the hospital (Clinica Universitaria de Navarra) as a Research Centre is recognised by the "Joint Commission International".

Audits by regulatory agencies (last 3 years)

Government of Navarra - 2013

Spanish Agency for Medications and Healthcare Products (AEMPS) - 2010

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? **YES**

Audits by sponsors (last 3 years)

YES - 2013

Do you follow your own Standard Operating Procedures (SOPs)? YES Do you supply with a SOP copy to a sponsor if requested? NO

Would you follow the sponsor SOPs if requested: YES

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: It depends on the CTs

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

The Clinica Universidad de Navarra uses a process on protection of personal data in accordance with the Organic Law 15/99. There is a medical history computerized system with sign-in register using a individual code. Everybody has a profile, according to which a clearly defined access is allowed. On-line user can only Access the medical history of his patients.
Personal data which are in a specific server (out of the medical history computerized system) also have a sign-in register with a set profile depending on the accessible information. Anonymous personal data are in Clinical Research Unit (CRU) location or CRU computers which are accessed by password. Label samples don't have personal data. Archived documentation is identified by a code.

The same person can carry out more than a task

In case of clinical trial requires the overnight stay of volunteers, what kind of healthcare providers will remain in the Unit

Physician **X** Nurse

Unidad de Investigación Clínica - Clínica Universitaria de Navarra

Services Capabilities

Availability of Central laboratory for safety analysis (biochemical and haematological parameteres)	YES, Joint Commission International
The quality assurance activities are subcontracted by the Unit	YES
Availability of a specific area for drug storing and preparation of medications for the study	YES
The former area or room has restricted access by key or code	YES
Laminar flow chamber availability for preparation of parenteral treatments	YES (Pharmacy Service)
Perfusion pumps for intravenous treatment	YES
Who is the responsible for drug preparation and dispensing	**Dispensing:** If necessary, Pharmacy Service is used. When pharmaceutical products don't need special conditions the investigator is responsible for preparation and dispensation. **Preparation**:
Drug accountability procedures, such as reception, preparation and dispensing forms	YES
SOPs available for drug preparation and dispensing	YES
SOPs available for drawing and managing of biological fluids	YES

System or procedure used for samples identification

Clinical analysis samples (biochemistry, haematology …) are identified by a barcode and CUN central laboratory process them through the medical history computerized system. Other biological analysis samples (drug quantification ….) are identified by the volunteer code, study code, and blood draw date/hour.

Availability of a specific area for blood samples managing	YES
The former area or room has restricted access by key or code	YES
Number of centrifuges available	1, no cool – 3, cool
System for plasma/fluids samples storing	Aliquoted samples are frozen in boxes
Fridges and freezers available in the Unit	FRIDGES: 2 – FREEZERS: 5 (3 of them until -70ºC)
The Unit has its owned Bioanalytical Department	NO. The sponsor chooses clinical analysis laboratory.
Availability of genotyping or fenotyping methods for participants	NO. The Universidad de Navarra have the methods.

Unidad de Investigación Clínica - Clínica Universitaria de Navarra

Services Capabilities

Data Management and software used (describe)	YES. Excell, SPSS, Stata, Phoenix Winnonlin.
Biometry or Statistical Analysis and software used (describe)	YES. SPSS, Stata.
Pharmacokinetic Analysis and software used (describe)	YES. Non-compartmental, Phoenix Winnonlin.
Medical Writing and skilled languages	Spanish and English.
Owned archives in the same Unit building (describe)	NO. CRU only stores documentation of studies which are being held at the moment and electronic documentation. The main storage is subcontracted to ATECNA.

Regarding a specific clinical trial what documents are sent to the archives and for long time are archived

Investigator archive, CRF copies, final report, clinical patients data and analytical data are sent to the subcontracted archive.

The study files are digitized and converted in a CD or web format	YES
Project management	NO in particular. It is a task that depends on the CRU's Director.

Unidad de Investigación Clínica - Clínica Universitaria de Navarra

Study Participants

Kind of participants included in clinical trials performed in the Unit

X Healthy volunteers X Patients

Other populations

If the Unit has experience in oncology, detail kind of tumour and age groups

X Solid tumour X Haematological tumour X Adults X Pediatrics

What kind of cancer (by organ) patients could be recruited by the Unit

Working together with the Oncology and Haematology Departments, the CRU could access any kind of cancer.

Recruiting methods for healthy volunteers

The CRU has a specific database, with personal data given by volunteers, when fullfilling a CRU card. CRU activity become known by volunteers word of mouth. Up to now it hasn't been necessary advertise for recruitment process. Using the database according to the needs of each study, volunteers are contacted by phone.

Recruting methods for patients

CRU collaborates with different medical departments, depending on patients needs.

Do you have sugery rooms available for screening (separated from the in-house area)? (number)	YES, 4 (1 in the CRU and 3 in the central investigation area)
Do you keep a paper or electronic database of volunteers? (describe)	YES

Name, surname, age, date of birth, telephone, health history (smoker, allergies, blood donation, weight, height, regular medication….), previous studies as a volunteer, update database.

Have you implemented any measure for avoiding the over-volunteering? (describe)	YES

It is the only CRU in the autonomous community, so we have no problems because in the database is stated every clinical research and the dates.

Unidad de Investigación Clínica - Clínica Universitaria de Navarra

Pharmacodynamic/Pharmacokinetic Capabilities

Digital blood pressure devices (number)	9	Pulsioximetry devices (number)	8	12-leads ECG devices (number)	1 + 8 monitors

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules: NO, count on Cardiology Department

Availability in the Unit of tests for assessing CNS drug effects

Sometimes we have worked with Neurology, Neurophysiology and Nuclear Medicine Departments, with whom the CRU could do these kind of studies. We also have experience on collaborations with Psychiatry Department.

Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports: NO, the Universidad de Navarra could take over this activity.

Familiarity with Electronic Data Capture –EDC applied to clinical trials: NO

Experience in other kind of PD or PK evaluations not formerly collected

Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted

Unidad de Investigación Clínica - Clínica Universitaria de Navarra

Experience

Manager since	2015
E-mail and phone	Jose.medranolaporte@osakidetza.eus Phone number: +34 945007437

Short CV

Jose Medrano is a physician specialist in Internal Medicine by the "Universidad Autónoma de Madrid" and specialist in Infectious Diseases and tropical medicine by the "Université ParisYvellines" (France). He mainly acquired clinical experience in infectious diseases and clinical virology at Hospital Paris Bichat (France) and Hospital Carlos III (Madrid). In these centres, he took care of patients and had teaching responsibilities, mainly at Université ParisBichat. He is currently in charge of 2 student´s PhD. His clinical research skills are proved by more than 20 publications in peer reviews journals and by the following degrees: Diplôme Universitaire (DU) Methodes en recherche cliniques (Methods in clinical research) at International school of public health (ISPED) Bordeaux; DU Gestion des bases de données en santé (data management in health sciences), ISPED; DU Méthodes statitisques en epidemiologie et recherche clinique (biostatistics), ISPED;

Unit Manager

First and last names	Jose Medrano Laporte

Short CV (cont.)

Diploma de Aplicaciones Web Dinámicas Aplicadas a la Enseñanza (web programing), Distance Educational National University (UNED) and Máster en Sida y Hepatitis V ricas, Universidad Complutense de Madrid. PUBLICATIONS: Principal Investigator has published during the last 4 years a dozen of prognostic studies at Hospital Carlos III concerning liver fibrosis progression and HCV clearance in HIVHCV coinfected patients. These studies led to an original approach to reliably predict SVR in HIVHCV coinfected patients, through webbased tools freely available and taking into account host genetics and noninvasive techniques of liver fibrosis assessment. These tools allow tailored therapy taking into account host and viral genetics, which may help decision making with new DAA.

Unit Manager

First and last names	Eider Larrarte Lazaro
Qualifications	Pharmacist
Medical specialty	
Manager since	2010 and co-manager since 2015
E-mail and phone	Eider.larrarte@tecnalia.com 677152891

Short CV

Eider Larrarte Lazaro holds a PhD in Pharmacy. Health and Quality of Life Director, She did a postdoctoral stage at the Surgery Department in the University of Liverpool. She is experienced in the management and direction of numerous research projects. She is director of Health and Quality of Life Area in TECNALIA.

Unidad de Ensayos Clínicos IIS Bioaraba. Hospital Universitario de Araba

Accreditations and Audits

Accreditations by the regions' administration o any other local, national or international organization in the last 3 years

No

Audits by regulatory agencies (last 3 years)

No

Would you provide to a sponsor if requested the result of the audits by the regulatory agencies? -

Audits by sponsors (last 3 years)

Yes, November 2012, June 2013 and July 2014

Do you follow your own Standard Operating Procedures (SOPs)? yes Do you supply with a SOP copy to a sponsor if requested? no

Would you follow the sponsor SOPs if requested: Yes, in case those SOPs follow an audited system and they conform to the good clinical practices of the unit

Internal audits performed per year, including the general audits and the audits related to a specific clinical trial: 1 general audit and 6 specific audits

Unit policy and procedures to guarantee the safety and confidentiality of volunteers and study data:

The computer database with personal data of the subjects is under key and only unit staff has access to it. This database is registered in both the State Data Protection Agency and the agency of the Basque Country.

Once subjects are included in a study are given a unique number of recruitment. This number and the number of the subject once is randomized, are registered in the study documentation. The initials of the subjects are never included.

The file of ongoing studies is in locked cabinets in the same medical office and under constant visual control of the unit staff. In the unit there is an archive with controlled access under a personal code. Only the responsible for the file has access to it.

Unidad de Ensayos Clínicos I IS Bioaraba. Hospital Universitario de Araba

Facilities

Year of Unit building	1979	Last Unit reform	2002
Usable space	308 m2	The Unit building is separate from the linked hospital	No
Number of CTs the unit could perform simultanously	2-3	Number of beds	12
Beds distribution	4 rooms with 3 beds each		
Beds distribution allows a complete and continuous visual control by nurses			No
Number of bed with intensive or continuous monitoring	4	Number of armchairs suitable for subject monitoring	0
Owned kitchen	Yes	Meals supervision by dietitian	Yes
Dining-room available for volunteers	Yes	Individual lockers available for volunteers	Yes
Relaxing room available for volunteers independent from the beds area			Yes
Availability in the unit of an emegency trolly for cardiopulmonary resuscitation			Yes
The emergency trolly has available suitable medications with immediate by controlled access			Yes
The medical and paramedical staff are trained and skilled to provide (Basic Life Support or/and Advanced LS)	Yes/ALS		
Unit availability of an evacuation plan for volunteers in emergency situations			Yes
There is an official agreement with a hospital for the volunteers/patients hospitalisation and treatment if required			Yes
Volunteers/patients healthcare would be covered by the national or the regional health system if required			Yes

Suitable services or departments of the linked hospital for management of emergencies and critical care of volunteers

The unit has emergency trolly and medication. The Hospital provides care plan protocol to life-threatening situations "Stops". In addition, the hospital has emergency room, intensive care unit (ICU) and hospital wards.

Distance and time to get the former services	The ICU is located in 5th floor, 2 min from the unit. The emergency service is in the -1 floor.		
Unit entrance/Exit door controlled	Yes/individual password	Unit with Closed Circuit Television	No
Availability of an alternate electrical generating set that automatically works in case of a general system failure			Yes

Short CV

Ander Urruticoechea is a physician specialised in medical oncology since 2002. He has a PhD in cancer research. Following his specialist training in the Catalan Institute of Oncology (ICO) he moved to the Royal Marsden Hopspital/Institute of Cancer Research in London for two years in order to develop a research fellowship in breast cancer biology and treatment. Back to ICO in Barcelona he worked as consultant in breast oncology between 2004 and 2010. From 2010 he was in charge of the breast cancer programme with the view to integrate patient cancer and research in a multidisciplinary team. From 2013 to date he moved to San Sebastian (Spain) to work as scientific director in a Cancer centre (Onkologikoa Fundation).

Recruiting methods for healthy volunteers

Recruting methods for patients

Consent inform in the medical oncology department

Do you have sugery rooms available for screening (separated from the in-house area)? (number)

Do you keep a paper or electronic database of volunteers? (describe)

Have you implemented any measure for avoiding the over-volunteering? (describe)

Unidad de Terapias Avanzadas – Onkologikoa Donostia

Pharmacodynamic/Pharmacokinetic Capabilities

Digital blood pressure devices (number)	2	Pulsioximetry devices (number)	1	12-leads ECG devices (number)	2

Familiarity with evaluation of the QTc interval prolongation accordingly with current rules	Yes
Availability in the Unit of tests for assessing CNS drug effects	
Familiarity in poblational analysis and PK/PD modeling, including writing of clinical reports	
Familiarity with Electronic Data Capture –EDC applied to clinical trials	Yes
Experience in other kind of PD or PK evaluations not formerly collected	Tumor biomarkers
Collaborations during the last 4 years with external departments related to efficacy, PD or PK evaluations not previously depicted	

Unidad de Terapias Avanzadas – Onkologikoa Donostia

Experience

Number of clinical trials per year and type of study	Year					
Type of study	**2009**	**2010**	**2011**	**2012**	**2013**	**2014**
Bioequivalence						
First single-dose administration in humans						
First multiple-dose administration in humans						
Drug interaction						
Food interaction						
Special populations (Renal or liver impairment, elderly)						
Proof of concept (Phase Ib or I/II)					1	1
Own research lines						
Others (specificying)						

Number of trials linked to a PEI (IND) submission | 2009 | 2010 | 2011 | 2012 | 2013 | 1 | 2014 | 1

Type of drugs (pharmacological group or mechanism of action) tested in the trials performed in the last 4 years

Sponsor typology for Early Stages trials performed in the last 4 years (2011 to 2014)

Number of trials promoted by Spanish companies 1 Number of trials promoted by multinational companies 1

Median time for approval by the Ethics Committee and the Spanish Agency for the Early Stages trials 60

Number of Early Stages trials performed in the Unit and published in the last 4 years

Unidad de Terapias Avanzadas – Onkologikoa Donostia

Introduction

GEICAM is a non-profit scientific group founded in 1995 with an ambitious and innovative objective: to develop the Breast Cancer Clinical Research initiatives of our members:

- Has performed 102 clinical trials in which more than 44.300 patients with breast cancer have participated.
- Has collaboration agreements with 184 Spanish centre's.
- Collaborates with international cooperative groups (TRIO, BIG, GBG, ICORG, SOWG, ECOG-ACRIN, etc), as well as with other scientific institutions (CNIO, CIC,…).
- Has also the mission to disseminate the acquired knowledge within and outside the group, through the organization of scientific meetings and educational programs at the national level.
- Collaborates with cancer patients associations (FECMA, GEPAC).

What is net GEICAM?

A selected group of research sites meeting excellence criteria in the conduction of early clinical research: Phase I y Phase IIA.

OUR AIM
The delivery of optimal early clinical research data working towards the cure of cancer.

OUR COMMITMENT
Conducting early stage trials with quality and excellence.

net GEICAM Grupo de Investigación

netGEICAM
net of early trialists

The net of early trialists GEICAM (netGEICAM) has been created with the intention to perform early phase studies with the same quality standards, taking advantage of a group with a strong trajectory in trials design, implementation and conduction, together with the high standards and expertise of a well-known collaborative group.

Our commitment is to **collaborate with the sponsors**, helping them in the design and conduction of early phase trials with the ultimate intention of helping patients. We will focus on phase I and IB as well as phase IIA studies with new drug combinations. For this purpose we have created a **collaborative group** or net of hospitals with a long history in conducting clinical trials, and with strong expertise.

Although GEICAM has primarily focused on the development of phase II and III studies in breast cancer, netGEICAM is open to the development of drugs in other tumor types, following standard approaches for phase I studies.

How do we achieve our objectives?

TRAINING PROGRAM

A trained team is synonymous of excellence in clinical research. Our objective in netGEICAM is to perform routine educational and training programs for all the team members including oncologists, nurses and study coordinators. For this purpose we have created a training program to assist all the teams on a routine basis.

STANDARD OPERATING PROCEDURES:

When conducting clinical trials it is exceptionally important to follow the principles of good clinical practice. To this end a key component in our policy is the definition of standard operating procedures (SOPs) among all the member units, with a close and routinely evaluation of such SOPs. Our intention is to secure the maximum standard of excellence performing clinical research.

SITES SELECTION:
Based on the in-depth knowledge of the research capacities of our centers and the investigator teams, we perform a selection process on the basis of the characteristics defining each trial. We reach agreement with the trial sponsors on the particularities of each protocol and select those of our centers that meet the optimal characteristics to deliver high quality research data. In this manner we guarantee rapid patient inclusion and quality of research output.

KEYS TO SUCCESS:
• Rapid center selection process
• Optimal patient inclusion rates
• High quality research data

The different units in each hospital have been selected from all over Spain, based on the group experience. Currently we comprise **9** hospitals that are coordinated by the experts of the netGEICAM central leading team.

Cetral Leading Team:

- Dr. Miguel Martín. netGEICAM Director and GEICAM Chairman.
- Dr. Ander Urruticoechea. netGEICAM Scientific Coordinator.
- Dr. Alberto Ocaña. netGEICAM Scientific Coordinator.
- Dra. Eva Carrasco. GEICAM Scientific Director.
- Andrés Hernando. GEICAM Project Manager.

In each hospital there is a group of people including oncologists, nurses and study coordinators, that has been selected by netGEICAM. All the units in each hospital follow standard operating procedures (SOPs) approved by netGEICAM. With this approach, we aim to establish a global consensus and guarantee abidance with the principles of good clinical practice (GCP).
In this context, netGEICAM will always guarantee a high standard in the conduction of the studies. It is also our obligation to closely monitor each unit and implement continuing educational programs for all the teams.

netGEICAM Affiliated Hospitals

Are the following:

1. **Hospital Universitario Virgen de la Victoria, Málaga**
2. **Hospital Clínico Universitario, Barcelona**
3. **Hospital del Mar, Barcelona**
4. **Instituto Catalán de Oncología (ICO), Barcelona**
5. **Complejo Hospitalario Universitario, A Coruña**
6. **Instituto Valenciano de Oncología (IVO), Valencia**
7. **Hospital Universitario Virgen del Rocío, Sevilla**
8. **Hospital General Universitario Gregorio Marañón, Madrid**
9. **Hospital Clínico San Carlos, Madrid**

Detailed information of each of these units can be found in this directory

CLINICAL TRIALS in netGEICAM

GEICAM/2010-04. Phase I closed, now Phase II on recruitment.

Title: "A phase I/II trial of dasatinib in combination with trastuzumab and paclitaxel in the first line treatment of HER2-positive Metastatic Breast Cancer (MBC) patients."

Phase I recruitment period: from March 2011 to May 2013
Number of sites: 6
Enroll patients: 16
Patients included: 10
Screening Failure: 6

GEICAM/2012-12. On recruitment.

Título "A Phase Ib dose escalation, open label, multi-center study evaluating LDE225 in combination with docetaxel in Triple Negative (TN) Advanced Breast Cancer (ABC) patients.."

Recruitment period: from May 2014 (real) to May 2016 (planned)
Number of patients to be included: minimum 9 and maximum 18
Number of sites: 5
Status:
Enrol patients: 13
Patients included: 12
Screening failure: 1

Study design:
