

Nanomedicine in Spain: 2006-2012

Prof. Josep Samitier
Spanish Nanomedicine Platform

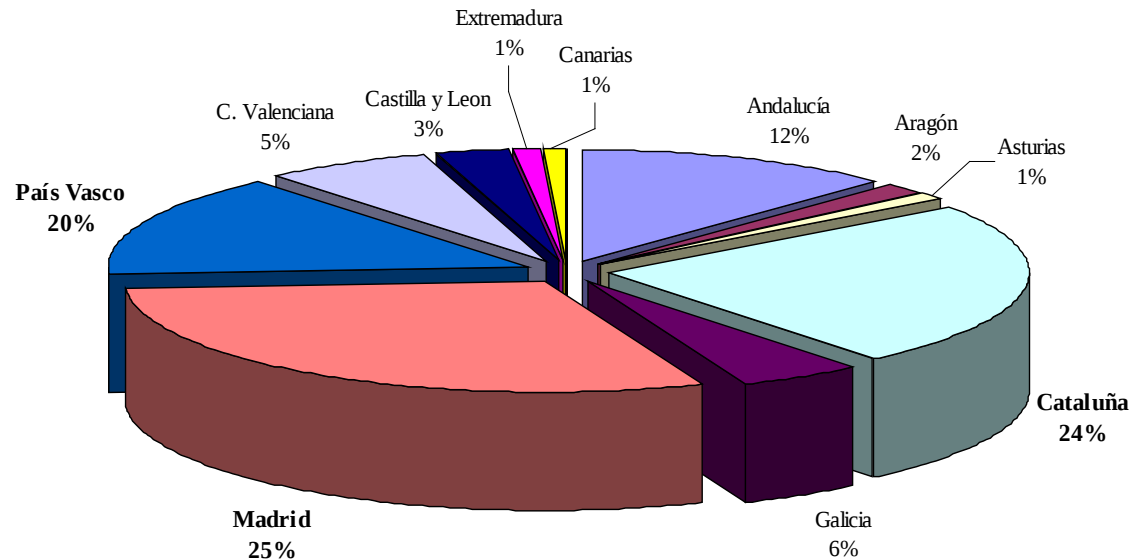

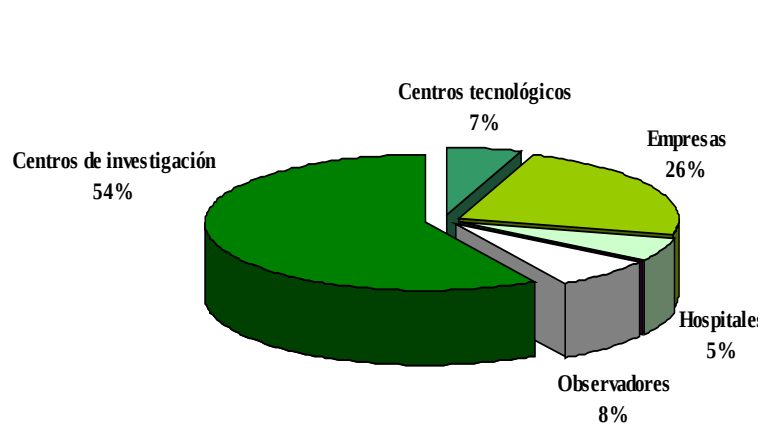

Institute for Bioengineering of Catalonia (IBEC)
CIBER-BBN; University of Barcelona

Barcelona, 14-February- 2012

Spanish Platform on Nanomedicine (2012)

Spanish Platform on Nanomedicine: Membership/distribution:

125 members (February 2012)

According to Profile:
Academia-Industry
+Clinic
+Policy makers/Gov.

Across Spanish Regions

NANOMED SPAIN (2011)

- Set up of a national networked institute, CIBER-BBN, with a research programme bring together the top Spanish research groups.
- Significant leadership of FP7 consortia in the area.
- Large private-public consortia (CENIT programme) for tech transfer to the pharma and medtech sectors.
- Entrepreneurship: spin off companies.
- Development of regional clusters in the framework of bioregions.
- New research institutes working in nanotechnology for health.

Preparing the Horizon 2020

GRUP
Connect-EU
Nanobio + Nanomed

Strategic Research Agenda (2011)

- Strategic research agenda on nanobiotechnology applications (2011)
 - o Mapping research strongest points
 - o Identifying local industry interests
- Sectors: Pharma, Medtech, Animal Health, Environment, Food and Drink...

oTRANSFERENCIA A LA CLINICA
oINTERNACIONALIZACIÓN

•NANOVAXID (UdN)

•STRUCTGEL (CIBER-
BBN; IBEC)

•nANGIOFRAC (CIBER-
BBN; IBEC, UPV)

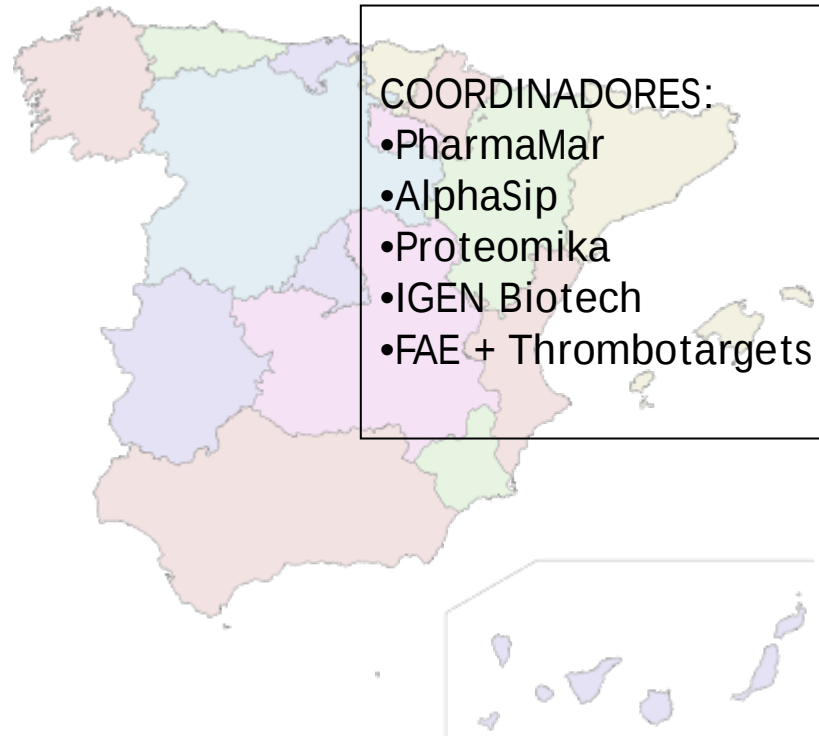

- 3rd (last) convocatoria – Dec 2011
- 8 proyectos financiados
- 3 proyectos con lider español
- Colaboración PENM-ISCIII para impulsar la ERANET PLUS NMP2012

oINNOVACION Y TRANSFERENCIA AL MERCADO

CONVOCATORIA 2011

- 5 proyectos financiados en nanomedicina (10 presentados)

COORDINADORES:

- PharmaMar
- AlphaSip
- Proteomika
- IGEN Biotech
- FAE + Thrombotargets

- o DIFUSIÓN A LA SOCIEDAD Y OTROS SECTORES PROFESIONALES
- o INNOVACIÓN

ACTUALIDAD

- Nanospain2012 Conf - Feb 27-March 01, 2012 - Santander (Spain)

During the last two decades, a revolutionary scientific new age, based on the capacity to observe, characterize, manipulate and organize matter in the nanometric scale, is appearing. In this scale, physics, chemistry, materials science, computational theory, and engineering converge towards the same theoretical principles and experimental findings that are basically governed by the laws of the Quantum Mechanics. Nanotechnology involves these interdisciplinary knowledge areas and methodologies in order to study, manufacture and characterize functional structures with dimensions of tens of nanometers.

In 2008, Spain, Portugal and France through their respective networks NanoSpain, PortugalNano and C'Nano GSO) decided to join efforts in order that NanoSpain events facilitate the dissemination of knowledge and promote interdisciplinary discussions not only in Spain but among the different groups from Southern Europe. Other objectives will also be to enhance industrial participation and permit considering the situation of Nanoscience and Nanotechnology in the south of Europe.

V Conferencia Anual de las Plataformas Tecnológicas de Investigación Biomédica

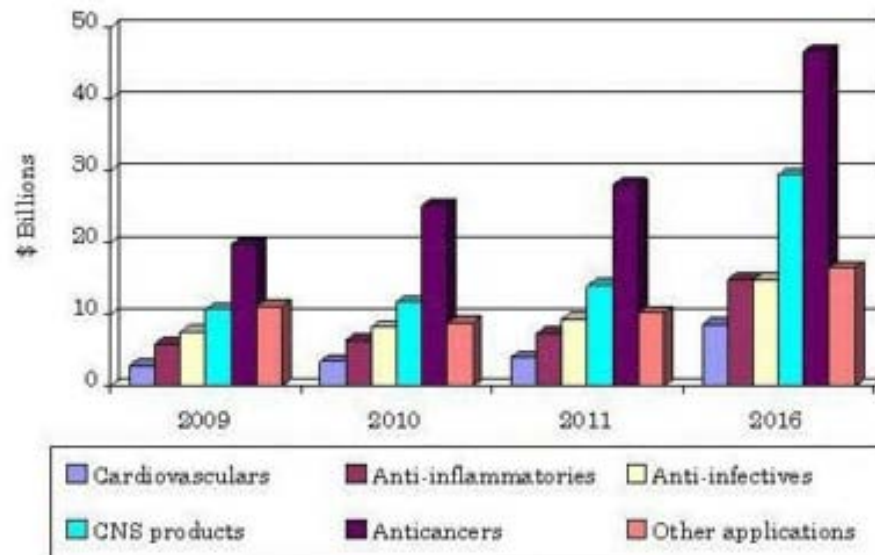

En los últimos años se han producido importantes cambios en la I+D+i biomédica, con la mirada puesta en los nuevos avances ómicos y en el incremento de la productividad. La colaboración entre todos los agentes involucrados en el proceso de innovación es una realidad, al mismo tiempo que una oportunidad para implicarse en proyectos de mayor alcance. En esta Conferencia se muestran ejemplos

- Colaboración para transferir expertise a las industrias de sectores medio ambiente y alimentación

- The global nanomedicine market reached \$63.8 billion in 2010 and \$72.8 billion in 2011. The market is expected to grow to \$130.9 billion by 2016 at a compound annual growth rate (CAGR) of 12.5% between years 2011 and 2016.
- Country markets analyzed are the U.S., Japan, Germany, France, UK, Italy, and Spain.

SUMMARY FIGURE
NANOMEDICAL GLOBAL SALES BY THERAPEUTIC AREA, 2009-2016
(\$ BILLIONS)
